Influenza Season is Around the Corner

As your patients age, their immune systems may weaken. This weakening can make seniors more susceptible to complications from seasonal influenza (flu). Now is the perfect time to remind your patients that seasonal influenza vaccination is the best defense against the flu. Medicare provides coverage for one flu vaccine and its administration per influenza season for seniors and other Medicare beneficiaries with no co-pay or deductible. Talk with your Medicare patients about their risk for getting the flu and start protecting your patients as soon as your 2012-2013 seasonal flu vaccine arrives. And, don't forget to immunize yourself and your staff. *Know what to do about the flu.*

Remember – Influenza vaccine plus its administration is a covered Part B benefit. Influenza vaccine is NOT a Part D covered drug. CMS will provide information and a link to the 2012-2013 Influenza Vaccine prices when they are available.

For more information on coverage and billing of the flu vaccine and its administration, as well as related educational resources for health care professionals and their staff, please visit the [CMS Medicare Learning Network Preventive Services Educational Products](#) and [CMS Immunizations](#) web pages. And, while some providers may offer the flu vaccine, others can help their patients locate a vaccine provider within their local community. [HealthMap Vaccine Finder](#) is a free, online service where users can search for locations offering flu vaccines.
