Medicare Provider Enrollment Updates

- Updated Medicare enrollment information is required for an IACS account, which is needed to access the PQRI Portal and view TIN-level PQRI/eRx feedback reports.
See <http://www.cms.gov/MedicareProviderSupEnroll>
- If you have not billed the Medicare program in more than a year or you have not updated your enrollment record with your designated Medicare contractor since November 2003, you will need to complete the Medicare enrollment application (CMS-8551 or the Internet-based PECOS enrollment application). You will not be able to receive your IACS account until the Medicare contractor reviews and approves your Medicare enrollment application.
- After your Medicare enrollment information is approved, you will then need to register in IACS to obtain a user ID and password needed to access your TIN-level PQRI/eRx feedback report which is available on the PQRI Portal at <http://www.qualitynet.org/pqri>. Please note that the IACS user ID and password is time-limited.
- See Medicare Fee-for-Service Provider Enrollment Contact List
