Home Health
Quality Reporting Program Provider Training

Introduction to OASIS-D

Kathryn D. Roby and Charlotte Steniger
Qualidigm

August 28, 2018
Housekeeping

- This webinar is being recorded
- Closed captioning is enabled and will appear at the bottom of your screen
- If you have a question at any point throughout today’s presentation, enter it at the bottom of the Q&A box in the lower left-hand corner of the screen. Submit by clicking the “Ask” button
How to Download Training Materials

• Training materials can be downloaded from:

• The **Downloads** section is at the bottom of the Training web pages
How to Enter Full Screen Mode

• Click on the PowerPoint Presentation Title located above the presentation area
• The option for FULL SCREEN will appear
• Click on FULL SCREEN to maximize and change your view to ONLY the presentation
• Hit the ESC key on your keyboard to return to the normal view
Knowledge Check Questions

• During this presentation, you will be asked to respond to questions that test your knowledge of the material presented.
• When prompted with a question, review the options offered and select your answer.
• Once you select your answer, it will automatically be submitted for you.
• Following a brief pause, the presenter will review the correct responses and rationale for each question.
How many people (including yourself) are attending this webinar together?

A. Just me—I am the only one participating
B. Two people
C. Three or four people
D. Five or more people
Disclaimer

This presentation was current at the time it was published or uploaded onto the web. Medicare policy changes frequently, so links to the source documents have been provided within the document for your reference.

This presentation was prepared as a service to the public and is not intended to grant rights or impose obligations. This presentation may contain references or links to statutes, regulations, or other policy materials. The information provided is only intended to be a general summary. It is not intended to take the place of either the written law or regulations. We encourage readers to review the specific statutes, regulations, and other interpretive materials for a full and accurate statement of their contents.
Today’s Presenters

Kathryn D. Roby, M.Ed., M.S., R.N., CHCE, CHAP/ACHC
Senior Consultant, Home Health Services
Qualidigm

Charlotte Steniger, R.N., M.S.N., COS-C, COQ-S, CHAP/ACHC
Consultant, Home Health Services
Qualidigm
Acronyms in This Presentation

- Activities of Daily Living (ADL)
- Certification and Survey Provider Enhancement Reports (CASPER)
- Centers for Disease Control and Prevention (CDC)
- Centers for Medicare & Medicaid Services (CMS)
- Diabetes Mellitus (DM)
- Drug Regimen Review (DRR)
- Home and Community-Based Services Continuity Assessment Record and Evaluation (HCBS CARE)
- Home Health (HH)
- Home Health Agency (HHA)
• Home Health Quality Reporting Program (HH QRP)
• Home Health Value-Based Purchasing (HH VBP)
• Instrumental Activities of Daily Living (IADL)
• Improving Medicare Post-Acute Care Transformation (IMPACT) Act
• Inpatient Rehabilitation Facility (IRF)
• Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF-PAI)
• Long-Term Care Hospital (LTCH)
• Long-Term Care Hospital Continuity Assessment Record and Evaluation (CARE) Data Set (LCDS)
• Medicare Learning Network (MLN)
• Minimum Data Set (MDS)
• National Pressure Ulcer Advisory Panel (NPUAP)
• Outcome and Assessment Information Set (OASIS)
• Peripheral Arterial Disease (PAD)
• Peripheral Vascular Disease (PVD)
• Post-Acute Care (PAC)
• Potentially Avoidable Event (PAE)
• Pressure Ulcer (PU)
• Prospective Payment System (PPS)
• Quality Improvement and Evaluation System (QIES)
• QIES Technical Support Office (QTSO)
• Quality Reporting Program (QRP)
• Registered Nurse (RN)
• Resumption of Care (ROC)
• Start of Care (SOC)
• Standardized Patient Assessment Data Elements (SPADEs)
Learning Objectives

1. Describe the Improving Medicare Post-Acute Care Transformation (IMPACT) Act of 2014 and resulting changes to Outcome and Assessment Information Set (OASIS)

2. Identify the major changes from OASIS-C2 to OASIS-D

3. Identify available resources for implementing OASIS-D
OASIS-D Training Opportunities

- Introduction to OASIS-D Webinar
  - August 28, 2018

- Introduction to OASIS-D Section GG Webinar
  - September 5, 2018

- Q&A Teleconference
  - Anticipated October/November 2018

- In-Person Home Health Provider Training, Baltimore, MD
  - Anticipated October/November 2018

Presentation and recording will be posted on the CMS website.

Webcast available!
Training Information and Updates

Spotlight and Announcements

Home Health Quality Reporting Training

Overview of OASIS-D and IMPACT Act of 2014
Overview

• IMPACT Act of 2014
• Changes from OASIS-C2 to OASIS-D
  – New, revised, and removed assessment items
  – Rationale for OASIS changes
IMPACT Act of 2014

- Bipartisan bill signed into law by President Obama on October 6, 2014
- Requires post-acute care (PAC) providers to report standardized patient assessment data and quality measure data
PAC Matters

LTCH, IRF, HHA, Nursing Homes

**POST-ACUTE CARE (PAC)**

Section 3004 of the Affordable Care Act mandates the establishment of PAC quality reporting programs (QRP) for long-term care hospitals (LTCH), inpatient rehabilitation facilities (IRF), and hospices. The Improving Medicare Post-Acute Care Transformation Act of 2014 mandates the establishment of QRP for skilled nursing facilities (SNF).

Section 1985 of the Social Security Act mandates the establishment of home health agencies (HHA) QRP.

**PAC Settings**

- **HHA**: Skilled nursing or therapy services provided to beneficiaries who are homebound.
- **IRF**: Inpatient rehabilitation services such as physical and occupational therapy, respiratory care, speech-language pathology, audiology, and other devices provided to patients after an illness, injury, or surgery.
- **HOSPICE**: Palliative and support services, including pain management and spiritual counseling.
- **SNF**: Short-term skilled nursing and rehabilitation services provided to individuals whose health problems are not severe or complicated, for home care or assisted living.

**Hospital level of care** is any prolonged ventilator support and cardiovascular or respiratory care management, care management, treatment for shock, and post-traumatic and postoperative therapies provided for sustained periods to patients with chronic conditions that are characterized by such medical, physiologic, and/or psychologic abnormalities that result in prolonged hospitalization and often ongoing respiratory therapy.

**Quality reporting in PAC settings aligns with the CMS National Quality Strategy Goals:**

- Making Care Safer
- Patient and Family Engagement
- Effective Prevention & Treatment of Chronic Diseases
- Communication & Care Coordination
- Best Practice of Healthy Living
- Making Care Affordable

2. Data from Centers for Medicare & Medicaid Services, National Nursing Home Survey (NHES) 2015
3. Data from Centers for Medicare & Medicaid Services, National Health Care Survey (HICS) 2016
4. CMS: Division of Quality Strategy for Post-Acute Care and Services (DQSS)
Driving Forces of the IMPACT Act

**Purpose:**
- Improve Medicare beneficiary outcomes
- Provide access to longitudinal data to facilitate coordinated care
- Enable comparable data and quality across PAC settings
- Improve hospital discharge planning
- Research

**Why the attention on Post-Acute Care?**
- Escalating costs associated with PAC
- Lack of data standards/interoperability across PAC
- Goal of establishing payment rates according to the individual characteristics of the patient, not the care setting
What Is Standardization?
Standardizing Function at the Item Level

- Inpatient Rehabilitation Facilities – Patient Assessment Instrument (IRF - PAI)
- Skilled Nursing Facilities – Minimum Data Set (MDS)
- Long-Term Care Hospitals – Continuity Assessment Record & Evaluation (CARE) Data Set (LCDS)

- IRF-PAI: Eating
- MDS: Eating
- OASIS: Eating
- LCDS: Eating
What Is Standardization?

Standardizing Function at the Item Level (cont.)

- **Inpatient Rehabilitation Facilities – Patient Assessment Instrument (IRF-PAI)**
- **Skilled Nursing Facilities – Minimum Data Set (MDS)**
- **Home Health Agencies – Outcome & Assessment Information Set (OASIS)**
- **Long-Term Care Hospitals – Continuity Assessment Record & Evaluation (CARE) Data Set (LCDS)**

**IRF-PAI**
- Eating

**MDS**
- Eating

**OASIS**
- Eating

**LCDS**
- Eating
Standardized Patient Assessment Data Elements (SPADEs)

- **SPADEs:**
  - Question and response options that are identical in all four PAC assessment instruments
  - Identical standards and definitions apply

- The move toward standardized assessment data elements facilitates cross-setting data collection, quality measurement, outcome comparison, and interoperable data exchange
• Overview of the IMPACT Act
  - This video from the November 2016 HH Quality Reporting Program (QRP) Provider Training held November 16 and 17, 2016, presents an overview of the IMPACT Act of 2014

Overview of OASIS Changes, Effective January 1, 2019

6 New Items
- GG0100
- GG0110
- GG0130
- GG0170
- J1800
- J1900

7 Revised Items
- M1028
- M1306
- M1311
- M1322
- M1324
- M2102
- M2310

28 Removed Items
- M0903, M1011, M1017, M1018, M1025, M1034, M1036, M1210, M1220, M1230, M1240, M1300, M1302, M1313, M1320, M1350, M1410, M1501, M1511, M1615, M1750, M1880, M1890, M1900, M2040, M2110, M2250, M2430
Overview of Guidance Manual Changes

Guidance Manual Changes for 33 Items

Why Is OASIS Being Changed?

**IMPACT Act/Standardization**

New Standardized Items
- Section J: J1800 & J1900
- Section GG: GG0100, GG0110, GG0130 & GG0170

**Cross-Setting Alignment**

Alignment in content of items that support cross-setting measures
- Drug Regimen Review (DRR)
- Pressure Ulcers
- Active Diagnoses
- Height & Weight

**Comprehensive Item Use Evaluation**

Reduction of burden
- Quality measure changes
- Survey and certification

**Updates/Corrections**

General updates/corrections made as necessary
Section J: Health Conditions (Falls)
• J1800. Any Falls Since SOC/ROC
• J1900. Number of Falls Since SOC/ROC

Section GG: Functional Abilities and Goals
• GG0100. Prior Functioning: Everyday Activities
• GG0110. Prior Device Use
• GG0130. Self-Care
• GG0170. Mobility

Data Items Removed From OASIS

• In 2017, CMS undertook a comprehensive review of the OASIS

• 28 OASIS items identified for removal to reduce data collection burden
Why Were These Items Removed?

- OASIS items were removed if they were not used to support:
  - HH QRP measures
  - HH Prospective Payment System (PPS)
  - Survey process for Medicare certification
  - HH Value-Based Purchasing (VBP) demonstration measures
  - Critical risk-adjustment factors
  - Conditions of Participation

</table>

**Enter Code**

Has the patient **had any falls since SOC/ROC, whichever is more recent?**

- **No** → Skip J1900
- **Yes** → Continue to J1900, Number of Falls Since SOC/ROC, whichever is more recent

#### J1900. Number of Falls Since SOC/ROC, whichever is more recent

**CODING:**

<table>
<thead>
<tr>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>0. None</td>
<td>A. <strong>No injury:</strong> No evidence of any injury is noted on physical assessment by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient's behavior is noted after the fall</td>
</tr>
<tr>
<td>1. One</td>
<td>B. <strong>Injury (except major):</strong> Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain</td>
</tr>
<tr>
<td>2. Two or more</td>
<td>C. <strong>Major injury:</strong> Bone <strong>fractures</strong>, joint dislocations, closed head injuries with altered consciousness, subdural hematoma</td>
</tr>
</tbody>
</table>

**Enter Codes in Boxes**
J1800:
Any Falls Since SOC/ROC, whichever is more recent
# New OASIS-D Item: J1800

Has the patient **had any falls since SOC/ROC**, whichever is more recent?

<table>
<thead>
<tr>
<th>Enter Code</th>
<th>Any Falls Since SOC/ROC, whichever is more recent</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Has the patient <strong>had any falls since SOC/ROC</strong>, whichever is more recent?</td>
</tr>
<tr>
<td>0. No</td>
<td>→ Skip J1900</td>
</tr>
<tr>
<td>1. Yes</td>
<td>→ Continue to J1900, Number of Falls Since SOC/ROC, whichever is more recent</td>
</tr>
</tbody>
</table>
J1800 Intent

- Identifies if the patient had any witnessed or unwitnessed falls since the most recent SOC/ROC
Definition of a Fall

• Unintentional change in position coming to rest on the ground, floor, or onto the next lower surface
  − E.g., a bed or chair

• Fall may be witnessed or unwitnessed, reported by the patient or an observer, or identified when a patient is found on the floor or ground

• Not a result of an overwhelming external force
  − E.g., a person pushes a patient
Definition of Intercepted Fall

- An **intercepted fall** occurs when the patient would have fallen if he or she:
  - Had not caught him/herself
  - Had not been intercepted by another person
- An intercepted fall is considered a fall
Challenging a Patient’s Balance

- CMS understands that challenging a patient’s balance and training him/her to recover from a loss of balance is an intentional therapeutic intervention and does not consider anticipated losses of balance that occur during supervised therapeutic interventions as intercepted falls.
J18000 Response-Specific Instructions

• Review:
  – Home health clinical record
  – Incident reports
  – Other relevant clinical documentation
    o Fall logs

• Interview patient and/or caregiver about occurrence of falls
J1800 Coding Instructions

- **Code 0, No**, if the patient has not had any fall since the most recent SOC/ROC
- **Code 1, Yes**, if the patient has fallen since the most recent SOC/ROC
  - Code falls no matter where the fall occurred
- **A dash** is a valid response for this item. CMS expects dash use to be a rare occurrence

<table>
<thead>
<tr>
<th>J1800.</th>
<th>Any Falls Since SOC/ROC, whichever is more recent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter Code</td>
<td>Has the patient <strong>had any falls since SOC/ROC</strong>, whichever is more recent?</td>
</tr>
<tr>
<td></td>
<td>0. <strong>No</strong> → Skip J1900</td>
</tr>
<tr>
<td></td>
<td>1. <strong>Yes</strong> → Continue to J1900, Number of Falls Since SOC/ROC, whichever is more recent</td>
</tr>
</tbody>
</table>
J1800 Practice Coding Scenario 1

- The discharging registered nurse (RN) reviews the clinical record and interviews the patient and caregiver, Mrs. K and her daughter Susan, determining that a single fall occurred since the most recent SOC/ROC
- The fall is documented on a clinical note from an RN home visit in which Susan reported her mother slipped from her wheelchair to the floor the previous day
How would you code J1800. Any Falls Since SOC/ROC?

A. Code 0, No
B. Code 1, Yes
J1800 Practice Coding Scenario 2

- An incident report describes an event in which Mr. S appeared to slip on a wet spot on the floor during a home health aide bath visit.
- He lost his balance and bumped into the wall, but was able to steady himself and remain standing.
How would you code J1800. Any Falls Since SOC/ROC?

A. Code 0, No
B. Code 1, Yes
J1800 Practice Coding Scenario 3

• A patient is participating in balance retraining activities during a therapy visit
• The therapist is intentionally challenging patient’s balance, anticipating a loss of balance
• The patient has a loss of balance to the left due to hemiplegia, and the physical therapist provides minimal assistance to allow the patient to maintain standing
How would you code J1800. Any Falls Since SOC/ROC?

A. Code 0, No
B. Code 1, Yes
J1900: Number of Falls Since SOC/ROC, whichever is more recent
## New OASIS-D Item: J1900

**J1900: Number of Falls Since SOC/ROC, whichever is more recent**

<table>
<thead>
<tr>
<th>CODING:</th>
<th>Enter Codes in Boxes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0. None</td>
<td>A. <strong>No injury</strong>: No evidence of any injury is noted on physical assessment by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient’s behavior is noted after the fall</td>
</tr>
<tr>
<td>1. One</td>
<td>B. <strong>Injury (except major)</strong>: Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain</td>
</tr>
<tr>
<td>2. Two or more</td>
<td>C. <strong>Major injury</strong>: Bone <strong>fractures</strong>, joint dislocations, closed head injuries with altered consciousness, subdural hematoma</td>
</tr>
</tbody>
</table>
J1900 Intent

• Identifies the number of falls a patient had since the most recent SOC/ROC, and fall-related injury
Definition: Injury Related to a Fall

Any documented injury that occurred as a result of, or was recognized within a short period of time (e.g., hours to a few days) after the fall and attributed to the fall.
J1900 Response-Specific Instructions

**Review**
Review the home health clinical record, incident reports, and any other relevant clinical documentation, such as fall logs.

**Interview**
Interview the patient and/or caregiver about occurrence of falls.

**Determine**
Determine the number of falls that occurred since the most recent SOC/ROC and code the level of fall-related injury for each.

**Code**
Code falls no matter where the fall occurred.
Code each fall only once.
- If the patient has multiple injuries in a single fall, code the fall for the highest level of injury.
Coding Instructions: J1900A. No Injury

• **Code 0, None**, if the patient had no injurious falls since the most recent SOC/ROC

• **Code 1, One**, if the patient had one non-injurious fall since the most recent SOC/ROC

• **Code 2, Two or more**, if the patient had two or more non-injurious falls since the most recent SOC/ROC

• **A dash** is a valid response for this item. CMS expects dash use to be a rare occurrence
Definition: No Injury

• No evidence of any injury noted on assessment
• No complaints of pain or injury by the patient
• No change in the patient’s behavior is noted after the fall
**Coding Instructions: J1900B. Injury, Except Major**

- **Code 0, None**, if the patient had no falls with injury, except major, since the most recent SOC/ROC

- **Code 1, One**, if the patient had one fall with injury, except major, since the most recent SOC/ROC

- **Code 2, Two or more**, if the patient had two or more falls with injury, except major, since the most recent SOC/ROC

- **A dash** is a valid response for this item. CMS expects dash use to be a rare occurrence

---

### B. Injury (except major):

<table>
<thead>
<tr>
<th>J1900: Number of Falls Since SOC/ROC, whichever is more recent</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CODING:</strong></td>
</tr>
<tr>
<td>0. None</td>
</tr>
<tr>
<td>1. One</td>
</tr>
<tr>
<td>2. Two or more</td>
</tr>
<tr>
<td><strong>Enter Codes in Boxes</strong></td>
</tr>
<tr>
<td>A. No Injury: No evidence of any injury is noted on physical assessment by the nurse or primary care clinician; no complaints of pain or injury by the patient; no change in the patient's behavior is noted after the fall</td>
</tr>
<tr>
<td>B. Injury (except major): Skin tears, abrasions, lacerations, superficial bruises, hematomas and sprains; or any fall-related injury that causes the patient to complain of pain</td>
</tr>
<tr>
<td>C. Major Injury: Bone fractures, joint dislocations, closed head injuries with altered consciousness, subdural hematoma</td>
</tr>
</tbody>
</table>
Definition: Injury (Except Major)

• Examples include:
  – Skin tears
  – Abrasions
  – Lacerations
  – Superficial bruises
  – Hematomas
  – Sprains
  – Any fall-related injury that causes the patient to complain
Coding Instructions: J1900C. Major Injury

- **Code 0, None**, if the patient had no falls with major injury since the most recent SOC/ROC
- **Code 1, One**, if the patient had one fall with major injury since the most recent SOC/ROC
- **Code 2, Two or more**, if the patient had two or more falls with major injury since the most recent SOC/ROC
- **A dash** is a valid response for this item. CMS expects dash use to be a rare occurrence
Definition: Major Injury

• Examples Include:
  − Bone fractures
  − Joint dislocations
  − Closed head injuries with altered consciousness
  − Subdural hematoma
J1900 Practice Coding Scenario 4

• Review of the clinical record and incident reports and patient and caregiver report identify that a single fall occurred since the most recent SOC/ROC

• The fall is documented on a clinical note from an RN home visit that describes the patient Mr. R’s report of a fall that occurred between visits, in which he tripped on the dog, fell against the wall, and banged his elbow, sustaining a skin tear that he treated himself

• Documentation of the RN assessment during the home visit details the healing skin tear and no other injury or symptom identified related to the fall
How would you code J1800. Any Falls Since SOC/ROC?

A. Code 0, No
B. Code 1, Yes
J1900. Number of Falls Since SOC/ROC, whichever is more recent

<table>
<thead>
<tr>
<th>CODING:</th>

</table>
Summarizing J1800 and 1900
Knowledge Check 1: J1800 and J1900 are **not** completed at which of the following time points?

A. Transfer  
B. Discharge – not to an Inpatient Facility  
C. SOC/ROC  
D. Death at Home
Knowledge Check 2: Which example below does not meet the definition of a fall?

A. Ms. T reports losing her balance while going down the stairs but catching herself on the railing to remain standing

B. Mrs. B’s daughter reports her mother falling while walking to her mailbox

C. Mr. W reports falling after being pushed by his roommate

D. All of the above meet the fall definition
J1800. Any Falls Since SOC/ROC, and J1900. Number of Falls Since SOC/ROC, are completed at:
- Transfer
- Discharge – not to an Inpatient Facility
- Death at Home

An intercepted fall is considered a fall.

CMS does not consider anticipated losses of balance that occur during supervised therapeutic interventions as intercepted falls.

There are three levels of fall-related injury:
- No Injury
- Injury (Except Major)
- Major Injury
Revised OASIS-D Assessment Items
Overview: Revised Items

• Identify assessment items that have been revised in OASIS-D

• Summarize the changes to each revised assessment item
Overview of OASIS-D Revisions

Revisions to OASIS-D involve either:

- Changes to assessment items and related guidance
- Revisions to the Guidance Manual only
### OASIS-D: Seven Revised Assessment Items

OASIS-D: Guidance Manual Changes

Guidance Manual Changes for 33 Items

For these 33 items, the Guidance Manual has been updated in one or more of the following sections:

- Item intent
- Time points collected
- Response-specific instructions
- Examples
- Data sources and resources
OASIS-D: Description of Guidance Manual Changes

- Response-specific instructions revised to reflect one clinician expansion (collaboration allowed)
- Content associated with deleted items removed
- Skip language revised
- Alignment with new Conditions of Participation
- Alignment of language across PAC settings
OASIS-D: Description of Guidance Manual Changes (cont.)

- References to specific Centers for Disease Control and Prevention (CDC) content replaced with a general statement to refer to CDC
- Definitions added
- Removed references to process quality measures no longer reported
- Minor editorial changes
Knowledge Check 3: Revisions to OASIS-D involve which of the following?

A. Changes to assessment items and related guidance
B. Revisions to the Guidance Manual only
C. Both A and B
Item Specific Changes

</table>
Changes to M1028. Active Diagnoses

• Standardized assessment item (present on OASIS-C2)
• Response options revised to align with other PAC instruments:
  − Option 3: “None of the above” was added
(M1028) Active Diagnoses – Comorbidities and Co-existing Conditions – Check all that apply
See OASIS Guidance Manual for a complete list of relevant ICD-10 codes.

- [ ] 1 - Peripheral Vascular Disease (PVD) or Peripheral Arterial Disease (PAD)
- [ ] 2 - Diabetes Mellitus (DM)
- [x] 3 - None of the above
Changes to M1306. Unhealed Pressure Ulcer/Injury at Stage 2 or Higher

- Incorporated National Pressure Ulcer Advisory Panel (NPUAP) terminology updates to align with other PAC instruments
- Item text revised:
  - Replaced “excludes … healed Stage 2 pressure ulcers” with “excludes … all healed pressure ulcers”
  - Added the words “injury/injuries”
OASIS-D: M1306. Unhealed Pressure Ulcer/Injury at Stage 2 or Higher

Complete at SOC/ROC, Follow-Up, and Discharge

<table>
<thead>
<tr>
<th>(M1306)</th>
<th>Does this patient have at least one <strong>Unhealed Pressure Ulcer/Injury at Stage 2 or Higher</strong> or designated as Unstageable? (Excludes Stage 1 pressure injuries and all healed pressure ulcers/injuries)</th>
</tr>
</thead>
</table>
| Enter Code | 0  No [Go to M1322 at SOC/ROC/FU; Go to M1324 at DC]  
1  Yes |
Changes to M1311. Current Number of Unhealed Pressure Ulcers/Injuries at Each Stage

- Item retained but different versions created for SOC/ROC, Follow-Up, and Discharge
- SOC/ROC and Discharge information used to calculate revised pressure ulcer measure
- Alignment with other PAC instruments
  - Incorporated NPUAP terminology updates
  - Skip pattern language and directions modified
Changes to M1311. Current Number of Unhealed Pressure Ulcer/Injuries at Each Stage (cont. 1)

- Dash “-” is a valid response for the Discharge time point only.
- CMS expects dash use to be a rare occurrence.
- Used to standardize the IMPACT measure.
Changes to M1311. Current Number of Unhealed Pressure Ulcer/Injuries at Each Stage (cont. 2)

Item text revised

- Added ulcers/injuries where applicable
- Added the word “device” to the item title in D1. Unstageable: non-removable dressing/device
- Removed “suspected …in evolution” from F1. Unstageable: Deep tissue injury

Knowledge Check 4: Which statement regarding M1028. Active Diagnoses is true?

A. New time point versions have been created

B. Response options have been revised to include “None of the above”

C. Dash is **not** a valid response
Knowledge Check 5: The same assessment version of M1311 is used for SOC/ROC, Follow-Up, and Discharge

M1311. Current Number of Unhealed Pressure Ulcers/Injuries at Each Stage

A. True
B. False
Knowledge Check 6: Select the best response regarding M2102. Types and Sources of Assistance

A. Response options have been removed to reduce burden
B. New time point versions created for SOC/ROC and Discharge
C. Retained lettering sequence for response option(s)
D. All of the above
Additional Guidance
Clarifications
Expansion of the One Clinician Convention

- Guidance related to the one clinician convention was modified as of January 1, 2018
  - While only the assessing clinician is responsible for accurately completing and signing a comprehensive assessment, s/he may collaborate to collect data for all OASIS items, if agency policy allows
Expansion of the One Clinician Convention (cont. 1)

• Modifications in home care guidance related to the one clinician convention were made:
  − Based on feedback from home health stakeholders
  − To better align with assessment practices in other PAC settings

• Any exception to this general convention concerning collaboration is identified in item-specific guidance
Expansion of the One Clinician Convention (cont. 2)

• Additional information:
  – OASIS-D Guidance Manual, Chapter 1
Drug Regimen Review

• There are no DRR item changes in 2019
• The DRR items were first introduced to home health in 2010 and revised January 1, 2017
  – These items are being implemented in IRF, LTCH, and SNF during 2018
• Changes to the DRR items for home health in 2019 are limited to guidance refinement to promote cross-setting alignment
Knowledge Check 7: Select the best response regarding the One Clinician Convention

A. The Comprehensive Assessment, which includes OASIS, remains the responsibility of one clinician

B. The assessing clinician may elicit feedback from other agency staff in order to complete the OASIS

C. Both A and B
OASIS-D Revised Assessment Items: Highlights

- Revisions to OASIS-D involve either:
  - Changes to the assessment item and related guidance
  - Revisions to the Guidance Manual only
- Some response options have been removed to reduce provider burden
- Different time point versions created for some items
OASIS-D Revised Assessment Items: Highlights (cont.)

- Incorporated NPUAP terminology updates
- Revised language to align with other PAC settings
- Consult the OASIS-D Guidance Manual for specific direction
Summary and Resources
Overview: Summary and Resources

- Identify resources available to guide utilization of OASIS-D
OASIS Educational Coordinators

• Each State has a designated OASIS Educational Coordinator with the responsibility to ensure that all home care providers have access to:

  Training in the OASIS data set administration for assessing patients
  Training and technical support in integrating the OASIS items in the agency’s record-keeping system
  Technical support in answering questions on the clinical aspects of OASIS
