Nat'l Obs - National Observed Rate is the average (mean) performance of all home health agencies that have a quality episode of care for the selected period for the quality measure. Asterisks - Represents significant difference between the current (HHA Obs) and national observed (Nat'l Obs) values.

* The probability is 10% or less that this difference is due to chance, and 90% or more that the difference is real.

** The probability is 5% or less that this difference is due to chance, and 95% or more that the difference is real.

NOTE: When a measure value is calculated using less than 10 Episodes of Care, the statistical significance level will not be displayed on the report.
