

## **CHAPTER 2 – OASIS C1/ICD-9: ALL ITEMS AND TIME POINT VERSIONS**

---

Chapter 2 contains the following sets of OASIS-C1/ICD-9 items:

- All Items: This is the entire set of OASIS Items that are collected at any point in time during a home health episode of care. At any one point in time, only a subset of OASIS items are collected.
- Patient Tracking Sheet: This information is collected at Start of Care and updated as needed at subsequent time points.
- Start of Care (SOC): This information is collected at Start of Care in addition to all OASIS items on the Patient Tracking Sheet.
- Resumption of Care (ROC): This information is collected at Resumption of Care in addition to M0032 Resumption of Care Date on the Patient Tracking Sheet.
- Follow-Up (FU): This information is collected at Recertification and Other Follow-up.
- Transfer (TRN): This information is collected at Transfer to Inpatient Facility, with or without Discharge from Home Health Agency.
- Discharge (DC): This information is collected at discharge from home health agency other than Death at Home or Transfer to Inpatient Facility. If the same form is used for both Discharge and Transfer assessments, it should include these items plus M2430 Reason for Hospitalization.
- Death at Home (Death): This information is collected when the patient dies while on service with the home health agency, other than in a hospital or hospital emergency department.

Please note that additional data items are required to be included in the electronic data submission record for each time point. For example the Patient Tracking Sheet items are required to be included in the data submission record for each time point, although they are collected at Start of Care and only updated as needed at subsequent time points. Refer to the OASIS Data Specifications on the CMS Web site at <http://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/OASIS/Downloads/OASIS-C1-Data-Sub-Specs.zip> for details.
