

CLINICIAN COMMITTEE COMPOSITION (MEMBERSHIP) LIST

Project Title:

Development of Outpatient Outcome Measures for the Merit-based Incentive Payment System

Dates:

The Call for the Clinician Committee nomination period closed on October 19, 2018. Yale New Haven Health Services Corporation – Center for Outcomes Research and Evaluation (CORE) held three meetings with the Clinician Committee during the project (October 2018 to July 2019) on January 11, 2019 (teleconference); February 27, 2019 (in-person); and June 13, 2019 (teleconference).

Project Overview:

The Centers for Medicare & Medicaid Services (CMS) contracted with CORE to develop outpatient outcome measures that can be used to assess the quality of care provided by clinicians who are eligible to participate in the Merit-based Incentive Payment System (MIPS).

As part of this project, CORE developed a measure focused on care provided for patients with heart failure (hereinafter, MIPS heart failure measure). The measure assesses each clinician or group's acute, cardiovascular-related admission rate, respectively, to that of other MIPS clinicians or groups with similar patients and adjusts for patient complexity as well as social risk. The quality measure's scores are calculated using patient characteristics and outcomes documented on routinely submitted Medicare claims; therefore, the clinicians whose performance will be assessed by the quality measure will not need to submit any additional data directly to CMS.

As part of its measure development process, CORE convened groups of stakeholders and experts who contribute direction and thoughtful input during measure development and maintenance. In addition to convening a national Technical Expert Panel, CORE convened a Clinician Committee composed of relevant professional/specialty society representatives and front-line clinicians from rural and/or underserved communities who care for patients with heart failure. The Clinician Committee provided input to help shape the approach to the measure, such as which types of outcomes should be counted in the measure.

CORE selected the individuals in [Table 1](#), and they agreed to serve on the Clinician Committee for this measure.

The contract name is Measure & Instrument Development and Support (MIDS): Development, Reevaluation, and Implementation of Outpatient Outcome/Efficiency Measures. The contract number is HHSM-75FCMC18D0042.
