

Evaluating Electronic Health Record (EHR) Data Elements for use in Hospital Quality Measures

Technical Expert Panel Members

This TEP will convene via webinar on July 2, 2013. TEP members will be asked to independently fill out an online survey to rate the feasibility of extracting EHR data for use in hospital quality measures. The individual members' ratings will be analyzed and reported back to the TEP during the second call on July 19, 2013. During the second call we will discuss and resolve discrepancies in ratings assigned to categories of EHR data so that a consensus can be reached by the TEP. TEP members may be asked for follow-up to clarify their expert input and provide additional feedback for the final summary report of this work. The following individuals have been selected to participate in these TEP meetings:
