SNF Quality Reporting Program (IMPACT Act 2014)

Welcome to the New Skilled Nursing Facility Quality Reporting Website Pages

Quality Reporting

On September 18, 2014, Congress passed the *Improving Medicare Post-Acute Care Transformation Act of 2014* (the IMPACT Act). The Act requires the submission of standardized data by Long-Term Care Hospitals (LTCHs), Skilled Nursing Facilities (SNFs), Home Health Agencies (HHAs) and Inpatient Rehabilitation Facilities (IRFs). The IMPACT Act establishes a quality reporting program (QRP) for SNFs.

The IMPACT Act of 2014 requires the Secretary to implement specified clinical assessment domains using standardized (uniform) data elements to be nested within the assessment instruments currently required for submission by LTCH, IRF, SNF, and HHA providers. The Act further requires that CMS develop and implement quality measures from five quality measure domains using standardized assessment data. In addition, the Act requires the development and reporting of measures pertaining to resource use, hospitalization, and discharge to the community. Through the use of standardized quality measures and standardized data, the intent of the Act, among other obligations, is to enable interoperability and access to longitudinal information for such providers to facilitate coordinated care, improved outcomes, and overall quality comparisons.

Penalties for Failure to Report

Beginning fiscal year (FY) 2018 and each subsequent rate year, the Secretary shall reduce payment rates during such FY by 2 percentage points for any SNF that does not comply with data submission requirements for such a FY.
