D0300 must equal the sum of the values of the following nine items: D0200A2, D0200B2, D0200C2, D0200D2, D0200E2, D0200F2, D0200G2, D0200H2, D0200I2. These are referred to as the "items in Column 2", below.
The following rules describe the computation of the sum that is placed in D0300. Note that these rules apply only if D0100=[1]. If D0100=[0,-,^], then Edit -3703 applies instead. These rules consider the "number of missing items in Column 2" which is the number of items in Column 2 that are equal to [-] or that are skipped and are therefore equal to [^].
a) If all of the items in Column 2 have valid values [0,1,2,3], then D0300 must equal the simple sum of those values.
b) If any of the items in Column 2 are equal to [-,^], then count their values as zero in computing the sum.
c) If the number of missing items in Column 2 (as defined above) is equal to one, then compute the simple sum of the eight items in Column 2 that have valid values, multiply the sum by 9/8 (1.125), and place the result rounded to the nearest integer in D0300 (see edit -9013 for rounding rules).
d) If the number of missing items in Column 2 (as defined above) is equal to two, then compute the simple sum of the seven items in Column 2 that have valid values, multiply the sum by 9/7 (1.286), and place the result rounded to the nearest integer in D0300 (see edit -9013 for rounding rules).
e) If the number of missing items in Column 2 (as defined above) is equal to three or more and at least one of the items in Column 2 is not equal to [-], then D0300 must equal [99].
f) If all of the items in Column 2 are equal to [-], then D0300 must equal [-].
The MDS Submission System will recalculate the value in D0300. If the recalculated value differs from the submitted value, a fatal error message will be issued and the record will be rejected.

D0600 must equal the sum of the values of the following ten items: D0500A2, D0500B2, D0500C2, D0500D2, D0500E2, D0500F2, D0500G2, D0500H2, D0500I2, D0500J2. These are referred to as the "items in Column 2", below.
The following rules describe the computation of the sum that is placed in D0600. These rules consider the "number of missing items in Column 2" which is the number of items in Column 2 that are equal to [-].
a) If all of the items in Column 2 have valid values [0,1,2,3], then D0600 must equal the simple sum of those values.
b) If any of the items in Column 2 are equal to [-], then count their values as zero in computing the sum.
c) If the number of missing items in Column 2 (as defined above) is equal to one, then compute the simple sum of the nine items in Column 2 that have valid values, multiply the sum by 10/9 (1.111), and place the result rounded to the nearest integer in D0600 (see edit -9013 for rounding rules).
d) If the number of missing items in Column 2 (as defined above) is equal to two, then compute the simple sum of the eight items in Column 2 that have valid values, multiply the sum by 10/8 (1.250), and place the result rounded to the nearest integer in D0600 (see edit -9013 for rounding rules).
e) If the number of missing items in Column 2 (as defined above) is equal to three or more, then D0600 must equal [-].
The MDS Submission System will recalculate the value in D0600. If the recalculated value differs from the submitted value, a fatal error message will be issued and the record will be rejected.

Coding of A0410 depends upon the resident's status on the target date for the assessment. The target date is defined as follows:
a) If A0310F is equal to [01], then the target date is equal to A1600 (entry date).
b) If A0310F is equal to [10,11,12], then the target date is equal to A2000 (discharge date).
c) If A0310F is equal to [99], then the target date is equal to A2300 (assessment reference date).
Given the target date, the following rules apply:
a) If the resident is on a Medicare/Medicaid certified unit on the target date for the assessment, then A0410 must be equal to [3] (federal required submission).
b) If the resident is on a unit that is not Medicare/Medicaid certified on the target date and if the State requires MDS submission for individuals on the resident's unit, then A0410 must be equal to [2] (state but not federal required submission).
c) If the facility is completing the assessment for another purpose (other than to satisfy Federal or State requirements), then A0410 must be equal to [1] (neither federal nor state required submission).
If A0410 is equal to [2,3], then the assessment MUST be submitted to the MDS Submission System. If A0410 is equal to [1], then the assessment MUST NOT be submitted to the MDS Submission System.
NOTE: It is a violation of a resident's right to privacy to submit data to CMS's data systems when the data are not required.

***NOTE: THIS EDIT HAS BEEN SUSPENDED AND WILL NOT BE APPLIED TO SUBMITTED RECORDS UNTIL FURTHER NOTICE.
If O0250B is active and contains a valid date (is not equal to [-,^]), then it should contain a date that is in the appropriate date range, as defined below. Determination of the appropriate date range depends upon the target date for the assessment. The target date is defined as follows:

a) If A0310F is equal to [01], then the target date is equal to A1600 (entry date).
b) If A0310F is equal to [10,11,12], then the target date is equal to A2000 (discharge date).
c) If A0310F is equal to [99], then the target date is equal to A2300 (assessment reference date).

Given the target date, the following rules apply:
a) If the target date falls within an ongoing influenza season, then the value of O0250B should be greater than or equal to the starting date of the current influenza season and less than or equal to the target date.
b) If the target date falls outside of an ongoing influenza season, then the edit described above in (a) will be suspended and no warning will be issued based upon the value of O0250B.
Note that the dates that define the "current influenza season" will be defined each year by CMS and will be published in updates to the MDS user's manual. Note also that violation of the consistency rule described in this edit will result in a warning.

Completion of A1550A through A1550Z, when active.
a) If A0310A is equal to [02,06,99], then A1550A through A1550Z must equal [^].
b) If the resident's age is 22 years of age or older and A0310A is equal to [01], then A1550A through A1550Z must not equal [^].

d) If the resident's age is 21 years of age or younger and A0310A is equal to [01,03,04,05], then A1550A through A1550Z must not equal [^].
For the rules above, age should be computed in the following way using A0900 (birth date) and A2300 (assessment reference date):
a) If only the year is submitted in A0900, then replace the month and day with "0702" (July 2, the midpoint of the year) for the purpose of calculating age.
b) If only the year and month are submitted in A0900, replace the day with "15", (the midpoint of the month) for the purpose of calculating age.
c) Provisionally compute age (in years) by subtracting the year in A0900 (as modified above, if necessary) from the year in A2300.
d) If the month in A2300 is less than the month in A0900, then subtract 1 from the provisional age computed in (c) above.
e) If the month in A2300 is equal to the month in A0900 and if the day in A2300 is less than the day in A0900, then subtract 1 from the provisional age computed in (c) above.

The first record that is submitted to correct or inactivate an existing record must have a value of "01" in X0800 (correction number). If that correction/inactivation is accepted and if a subsequent correction/inactivation is required, it must have a value of "02", and so on.
In other words, the correction number in X0800 on the first correction/inactivation must be "01", and the value on each subsequent correction/inactivation must be incremented by 1. If the value submitted in X0800 is incorrect, a fatal error will result and the submitted record will be rejected.

If A0050 (formerly X0100)=[3] (the record is an inactivation), then the recalculated ISC value will be [XX]. The following rules specify the maximum number of days which should elapse between each date listed and the submission date. There are different rules for new records (where A0050 (formerly X0100)=[1]) and for modifications and inactivations (where A0050 (formerly X0100)=[2,3]).
RULES FOR NEW RECORDS (WHERE A0050=[1]):
The following rules apply to new records, where A0050=[1].
a) If A0310F is equal to [01] (entry record), then submission date - A1600 (entry date) should be less than or equal to 14 days.
b) If A0310F is equal to [12] (death in facility record), then submission date - A2000 (discharge date) should be less than or equal to 14 days.
c) If A0310F is equal to [10,11,99] and A0310A is equal to [01,03,04,05] (comprehensive assessment), then submission date - V0200C2 (care plan completion date) should be less than or equal to 14 days.
d) If A0310F is equal to [10,11,99] and A0310A is equal to [02,06,99] (all other types of assessment), then submission date - Z0500B (assessment completion date) should be less than or equal to 14 days.
RULES FOR MODIFICATIONS/INACTIVATIONS (WHERE A0050=[2,3]):
e) If A0050 is equal to [2,3] (modification or inactivation record), then submission date - X1100E (attestation date) should be less than or equal to 14 days.

Date Item Consistency Rules
Date items fall into four groups, designated Group A, B, C, and D below. Each group has its own consistency rules.

GROUP A RULES (Edit –3886a)
Group A items are listed below. Each active item in this list that contains a valid date (not blank or dashes) must be in the specified order:
A0900 (birthdate) <=
A1900 (admission date) <=
A1600 (entry date) <=
A2300 (assessment reference date) = A2000 (discharge date) <=
Z0500B (date RN signed assessment as complete) <=
V0200B2 (CAT assessment process signature date) <=
V0200C2 (CAT care planning signature date) <=
X1100E (correction: attestation date) <=
current date

GROUP B (Edit –3886b)
Group B items are listed below. Each active item in this list that contains a valid date (not blank or dashes) must obey all of the following rules:
1. Each Group B date must be greater than or equal to A0900 (birthdate).
2. Each Group B date must be less than or equal to A2300 (assessment reference date) if A2300 is active.
3. If A0310F is equal to [10,11,12] (if A2000 discharge date is completed), then each Group B date must be less than or equal to A2000.
4. For start/end date pairs shown below, the start date must be less than or equal to the end date.
5. Otherwise, the Group B dates may be in any order.
The following is a list of Group B dates:
A2400B <= A2400C (Medicare stay start/end)
O0250B (date influenza vaccine received)
O0400A5 <= O0400A6 (speech-language audiology therapy start/end)
O0400B5 <= O0400B6 (occupational therapy start/end)
O0400C5 <= O0400C6 (physical therapy start/end)
V0100C (prior assessment reference date)

GROUP C RULES
The Group C rules only apply to records where A0310A = [05, 06] (significant correction to prior comprehensive or quarterly).
RULE C1 (Edit –3886c1)
If A0310A = [05, 06] and A1700=[1] (admission), then Rule C1 applies:
A1600 (entry date) <=
A2200 (previous ARD for significant correction)<=
A2300 (assessment reference date)

The Item Subset Code (ISC) is a two- or three-character code that indicates the type of record that is being submitted. The set of active items is controlled by the ISC. With the exceptions of the IPA and OSA ISCs, the characters of the ISC are defined as follows:
Character 1 indicates the type of provider and is based upon the value of A0200, as follows:
a) If A0200 is equal to [1] (nursing home record), then character 1 of the ISC is equal to [N].
b) If A0200 is equal to [2] (swing bed record), then character 1 of the ISC is equal to [S].
Characters 2 and 3 indicate the type of record and are based upon the values of the Reason For Assessment (RFA) items A0310A, A0310B, A0310F, and A0310H. The "Item Subset Code (ISC) Report" that accompanies the data specs lists all possible combinations of the RFA items and their associated ISCs. If the ISC that is listed in the report is equal to dashes, then the combination of RFA items is not allowed. If a record is submitted with one of these invalid RFA combinations, a fatal error will occur and it will be rejected.
The ISC_VAL table that is contained in the data specifications Access database is used to generate the ISC report and can be used by programmers as a lookup table. In addition, an appendix of the overview document that accompanies these data specifications contains source code for a Visual Basic function (GetISC_10012019()) that can be used to determine the ISC that is associated with any combination of the RFA items.
For a more complete explanation of the meaning and use of the ISC codes, please refer to the documentation that accompanies these data specifications.

For items Z0200A, Z0200B, Z0250A, and Z0250B, the submission system will recalculate the submitted RUGs group and RUG version code if the State is using a CMS supported RUG model.

Compute the sum of minutes in O0425A1, O0425A2, and O0425A3. When computing this sum, if any of these items is coded with [-], count the number of minutes for that item as zero. The following rules apply based upon the computed sum:
a) If the sum is equal to zero and at least one of the items O0425A1, O0425A2, and O0425A3 is not equal to [-], then O0425A4 must equal [^].

V0100A through V0100F should be completed only if there is a prior assessment (if A0310E=[0]) and if the following is true for the most recent prior assessment: A0310A is equal to [01,02,03,04,05,06] OR A0310B is equal to [01].
The purpose of V0100D through V0100F is to supply previous score values that are used for calculating some of the CATs. The purpose of V0100A through V0100C is to document the prior assessment that contained those values.
