

**Nursing Home Public Reporting Initiative 6 State Pilot
Facility Specific Quality Measure Report (data from Jul-Sep 2001)**

Facility Name: ABC Nursing Home

Facility Address: Anywhere, Any State

	Numerator	Denominator	Adjusted Rate	State Average	6 State Average
CHRONIC MEASURES					
Late loss ADL Decline	7	77	9.21%	14.58%	14.50%
Infections Prevalence	12	89	11.82%	18.18%	18.18%
Weight Loss Prevalence	11	89	13.84%	10.00%	9.40%
Inadequate Pain Management	37	89	20.02%	13.85%	14.00%
Pressure Ulcer Prevalence	7	89	9.17%	10.74%	9.65%
Prevalence of Physical Restraints	0	121	0.00%	8.02%	7.50%
Inappropriate use of Anti-Psychotics	8	77	14.04%	13.76%	17.93%
POST-ACUTE MEASURES					
Delirium	0	34	0.00%	4.33%	4.31%
Inadequate Pain Management	15	35	31.95%	29.18%	30.27%
Improvement in Walking	12	28	42.70%	38.53%	33.69%

**** Due to small denominator, data will not be reported
(denominator less than 30 for chronic measures & less than 20 for post-acute measures)

NOTE: Beginning in November 2002, CMS only accepts MDS assessments units which have at least one Medicare or Medicaid bed as such, the denominators presented here may be slightly larger than those that will be available for public reporting in April

Index of Terms:

Numerator = Total number of residents with measured condition

Denominator = Total number of residents at risk for measured condition

Adjusted Rate = risk-adjusted quality measure rate (see attached paper for description of risk-adjustment)

State Average = average rate of all nursing homes in your state

6 State Average = average rate of all nursing homes in the 6 pilot states (MD, CO, RI, WA, OH, FL)
