This report is a product of the project: Measures, Indicators, and Improvement of Quality of Life in Nursing Homes (RFP: HCFA-98-002/PK), which was conducted from May 1, 1998 to July 31, 2003 under Master Contract # 500-96-0008 between the Health Care Financing Administration and the University of Minnesota. Robert L. Kane is the director of the Master Contract, and Rosalie A Kane, the project director. The views in the report are those of the researchers and not necessarily those of CMS or the project officers. M. Powell Lawton, PhD, Philadelphia Geriatric Center was instrumental in this work and was a co-author of early interim reports before his death in 2001. Comments can be sent to R.A. Kane at the Division of Health Services Research, 420 Delaware St., SE, MMC 197, D-527 Mayo Building, Minneapolis, MN 55455, phone 612-624-5171, fax 612-634-5434, email, kanex002@umn.edu.
This volume largely consists of questionnaires, interview protocols, and related materials used for Wave 1 or Wave 2 of the Quality of Life study or for the Transferability Study. They are assembled here as a companion to Volume 1 of this document, which presents research methods and findings. The instruments were used in either Wave 1 data collection, Wave 2 data collection, or a later Transferability Study. Details of the studies themselves are found in Volume 1.

Some of these instruments were originally developed using non-reproducible scanning software: therefore, their appearance here differs slightly from the way they appeared when used in the study. Other protocols, particularly the unit and facility environmental checklists and all the interview forms for facility personnel, were formatted with a great deal of additional space for comments. Such spaces were largely omitted from the versions shown here.

People with questions about the materials or an interest in more information about their use or in adapting them for other studies or purposes may contact Rosalie A. Kane, 612-624-5171 (email: kanex002@umn.edu). All forms and instruments are in the public domain.

Contents

Wave 1 Material
A. Survey of Facilities in Wave 1 Catchment Areas
B. Resident Interview, Wave 1
C. Staff Interview about Resident and Staff Contact Form
D. Family Questionnaire about Resident and Family Contact Form
E. Resident-Level Protocol for Observation of Resident Affect
F. Facility-Level Observation of Resident and Staff Interactions, Wave 1
G. Environmental Checklist: Room and Bath
H. Environmental Checklist: Nursing Unit
I. Environmental Checklist: Facility Level
J. Administrative Interview and Archival Information
K. Nursing Interview
L. Social Work Interview
M. Activities Interview
N. Summary Indicator Document
O. Overall Interviewer Rating

Wave 2 Materials
P. Resident Interview, Wave 2
Q. Observation of Staff and Resident Interactions, Wave 2
R. Administrative Questionnaire, Wave 2
S. QOL Scales Scoring Document

Transferability Materials
T. Resident Interview for the Transferability Study
U. Observation of Resident and Staff Interactions for the Transferability Study
V. Training Material for Transferability Observations
W. Focus Group Guide
