

Provider Specialty Report 1st Quarter 2011 Physician Quality Reporting System

Report Date: 06/23/2011

This summary is provided to assist eligible professionals and their staff in interpreting the Provider Specialty Report. Please note that this report is based on the number of valid quality-data codes (QDCs) submitted by specialty and reasons why a submission is considered invalid. This report also includes lists of specialties reporting at least one valid QDC for each measure. This report does not include the number of claims for which an expected QDC was not submitted on an eligible claim.

Column Definitions for QDC Submission Error Report by Specialty:

QDC Submission Attempts:

- Total QDCs Reported - The number of instances where a TIN/NPI submitted a QDC for that measure.
- Total Valid QDCs Reported on Eligible Cases - The number of instances where a TIN/NPI submitted a valid QDC for that measure.
- % Valid – Percentage of Total Valid QDCs Reported divided by Total QDCs Reported on Eligible Cases.
- Total QDCs Reported on Eligible Cases – Number of valid or invalid QDCs reported on eligible cases meeting the measure's denominator requirements.

Denominator Mismatch:

- Measure Reported with Incorrect Age and/or Gender - The number of occurrences of QDC reporting where the QDC does not match the demographic requirements for the measure.
- Incorrect Diagnosis and/or HCPCS - The number of occurrences of QDC reporting where the QDC does not match the denominator requirements for the measure.
- Measure Reported on an Instance with a Missing CPT Code - The number of occurrences of QDC reporting when there are no CPT codes for billable services on the claim associated with the denominator requirements for the measure.

How to Read the Quality-Data Code Submission Error Report by Specialty:

Using the Specialty of Allergy/Immunologists as an example, we find the following information as we read across each column: 15,450 QDC submissions were received for measures reported by this specialty, 13,407 of which were considered valid. Therefore, the Valid Submission Rate is 86.78%. There were a total of 13,429 QDCs reported on eligible cases. The rest of the columns explain reasons for invalid submissions for measures reported by this specialty. We see that 981 (6.35%) submissions did not match the measure's age and/or gender parameters; 1,673 (10.83%) submissions were for patient encounters and/or diagnoses that are not listed in the denominator of the measures; 286 (1.85%) submissions showed only the numerator component (QDCs) on the claim and the denominator component (HCPCS) were not on the claim nor on any other related claim for the same beneficiary, date-of-service, TIN/NPI.

Analysis Findings Include:**Quality Data Code Submission Error Report by Specialty**

1. The specialties with the highest percentages of Valid QDCs Reported were:

Oncology/Hematology (95.89%)

Chiropractor (95.64%)

Audiologist (95.22%)

Cardiology (94.50%)

Radiologist (93.94%)

Specialties that Correctly Reported a Measure

1. The specialties submitting valid QDCs on each measure are displayed. Two measures were reported by only one specialty. Measure #182 Functional Outcome Assessment in Chiropractic Care was reported on only by Chiropractors. Measure #189 Referral for Otologic Evaluation for Patients with History of Active Drainage From the Ear Within the Previous 90 Days was reported on only by Audiologists.

Explanatory Note: The National Plan and Provider Enumeration System (NPPES) and the Health Care Provider Taxonomy codes were utilized as a reference for the specialties indicated in this report. The Health Care Provider Taxonomy captures specialty information in categories detailed enough to support credentialing information but also broad enough to support directory level specialization information. These codes are self-selected by the provider when input into NPPES and therefore this report is dependent on the codes the providers have used to identify themselves. There may be cases where multiple specialties applied to a provider but for purposes of this report only the first listed code from the NPPES database was utilized.
