

## 2014 Physician Quality Reporting System Qualified Registries

CMS is pleased to announce the entities that self-nominated to participate as a 2014 qualified registries. The 2014 qualified registries will be able to report quality measure data to CMS, on behalf of individual eligible professionals (EPs) and Group Practice Reporting Organization (GPRO) group practices, for the 2014 Physician Quality Reporting System (PQRS) program year.

This list contains the names of the conditionally qualified registries. These entities have self-nominated and indicated that they meet the requirements as outlined by CMS in the 2014 Physician Fee Schedule final rule. CMS will post a finalized list of qualified registries in May 2014.

In the table below, each of the self-nominated 2014 Registry Vendors has provided detailed information regarding the services they offer their clients, as well as the cost incurred by their clients. If the vendors are supporting individual measures, they have attested that they can report on at least 9 measures covering 3 National Quality Strategy (NQS) domains for at least 50 percent of an EP's/GPRO's Medicare Part B FFS patients. If the vendors are supporting measures groups, they have attested that they can report at least 1 measures group on behalf of an EP for at least a 20-patient sample, a majority of which (at least 11 out of 20) must be Medicare Part B FFS patients.

EPs and GPRO group practices, wishing to participate in 2014 PQRS through a qualified registry, may contact the entities listed below for additional details.

*Disclaimer: Each vendor has reviewed their organization's information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available or that the vendor will be successful uploading their files during the submission period. CMS cannot guarantee an eligible professionals success in providing data for the program. Successful submission is contingent upon following the PQRS program requirements, the timeliness, quality, and accuracy of the eligible professionals data provided for reporting, and the timeliness, quality, and accuracy of the XML programming of the vendor.*

Prometheus exists to extend the value of these data beyond simple government submissions. We are a full-service data integration partner with free tools and expert staffing designed to facilitate reuse and repurposing of clinical data for advocacy, training, and performance purposes. Our flexible platform, RexRegistry, can be configured to support virtually any combination of data collection and quality reporting needs while our US-based data management specialists bring years of experience supporting forward-thinkers in healthcare, philanthropy, and biomedical research.  Start treating PQRS as an opportunity, not a burden. Our software and submission services are free to Prometheus clients.
