

2015 Registry Individual Measure Flow
PQRS #323 NQF #0671: Cardiac Stress Imaging Not Meeting Appropriate Use Criteria:
Routine Testing After Percutaneous Coronary Intervention (PCI)

SAMPLE CALCULATIONS:

Reporting Rate=

$$\frac{\text{Performance Met (a=4 patients) + Performance Not Met (c=3 patients)}}{\text{Eligible Population / Denominator (d=8 patients)}} = \frac{7 \text{ patients}}{8 \text{ patients}} = 87.50\%$$

Performance Rate=

$$\frac{\text{Performance Met (a=4 patients)}}{\text{Reporting Numerator (7 patients)}} = \frac{4 \text{ patients}}{7 \text{ patients}} = 57.14\%$$

* See the posted Measure Specification for specific coding and instructions to report this measure.

**A low calculate performance rate for this measure indicates better clinical control and care

NOTE: Report Frequency- Procedure

v1

2015 Registry Individual Measure Flow
PQRS #323 NQF #0671: Cardiac Stress Imaging Not Meeting Appropriate Use
Criteria: Routine Testing After Percutaneous Coronary Intervention (PCI)

Please refer to the specific section of the Measure Specification to identify the denominator and numerator information for use in reporting this Individual Measure.

NOTE: A lower calculated performance rate for this measure indicates better clinical care or control.

1. Start with Denominator
2. Check Patient Age:
 - a. If the Age is greater than or equal to 18 years of age at Date of Service and equals No during the measurement period, do not include in Eligible Patient Population. Stop Processing.
 - b. If the Age is greater than or equal to 18 years of age at Date of Service and equals Yes during the measurement period, proceed to check Cardiac Stress Imaging Performed as Listed in Denominator.
3. Check Cardiac Stress Imaging Performed:
 - a. If Cardiac Stress Imaging Performed as Listed in the Denominator equals No, do not include in Eligible Patient Population. Stop Processing.
 - b. If Cardiac Stress Imaging Performed as Listed in the Denominator equals Yes, include in Eligible Population.
4. Denominator Population:
 - a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 8 patients in the sample calculation.
5. Start Numerator
6. Check Cardiac Stress Imaging Performed Primarily for Monitoring of Asymptomatic Patient who had PCI Within 2 Years:
 - a. If Cardiac Stress Imaging Performed Primarily for Monitoring of Asymptomatic Patient who had PCI Within 2 Years equals Yes, include in Reporting Met and Performance Met.
 - b. Reporting Met and Performance Met letter is represented in the Reporting Rate and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 4 patients in the Sample Calculation.
 - c. If Cardiac Stress Imaging Performed Primarily for Monitoring of Asymptomatic Patient who had PCI Within 2 Years equals NO, proceed to Cardiac Stress Imaging Test Performed Primarily for any Other Reason than Monitoring of Asymptomatic Patient who had PCI Within 2 years.

7. Check Cardiac Stress Imaging Test Performed Primarily for any Other Reason than Monitoring of Asymptomatic Patient who had PCI Within 2 years:
 - a. If Cardiac Stress Imaging Test Performed Primarily for any Other Reason than Monitoring of Asymptomatic Patient who had PCI Within 2 years equals Yes, include in Reporting Met and Performance Not Met.
 - b. Reporting Met and Performance Not Met is represented in the Reporting Rate and Performance Rate in the Sample Calculation listed at the end of this document. Letter c equals 3 patient in the Sample Calculation.
 - c. If Cardiac Stress Imaging Test Performed Primarily for any Other Reason than Monitoring of Asymptomatic Patient who had PCI Within 2 years equals No, proceed to Reporting Not Met.
8. Check Reporting Not Met:
 - a. If Reporting Not Met equals No, Quality Data Code or equivalent not reported. 1 patient has been subtracted from the reporting numerator in the sample calculation.

SAMPLE CALCULATIONS:

Reporting Rate=

<u>Performance Met (a=4 patients) + Performance Not Met (c=3 patients)</u>	= 7 patients = 87.50%
Eligible Population / Denominator (d=8 patients)	= 8 patients

Performance Rate=

<u>Performance Met (a=4 patients)</u>	= 4 patients = 57.14%
Reporting Numerator (7 patients)	= 7 patients
