

## Numerator

**SAMPLE CALCULATIONS:**

## Reporting Rate=

$$\frac{\text{Performance Met (a=3 patients)} + \text{Performance Exclusion (b=2 patients)} + \text{Performance Not Met (c=2 patients)}}{\text{Eligible Population / Denominator (d=8 patients)}} = \frac{7 \text{ patients}}{8 \text{ patients}} = 87.50\%$$

## Performance Rate=

$$\frac{\text{Performance Met (a=3 patients)}}{\text{Reporting Numerator (7 patients) - Performance Exclusion (b=2 patients)}} = \frac{3 \text{ patients}}{5 \text{ patients}} = 60.00\%$$

\* See the posted Measure Specification for specific coding and instructions to report this measure.

## **2015 Claims/Registry Individual Measure Flow**

### **PQRS #112: Breast Cancer Screening**

Please refer to the specific section of the Measure Specification to identify the denominator and numerator information for use in reporting this Individual Measure.

1. Start with Denominator
2. Check Patient Age:
  - a. If the Female Patient Age on Date of Service is 54 thru 74 years of age and equals No during the measurement period, do not include in Eligible Patient Population. Stop Processing.
  - b. If the Female Patient Age on Date of Service is 54 thru 74 years of age and equals Yes during the measurement period, proceed to check Encounter Performed
3. Check Encounter Performed:
  - a. If Encounter as Listed in the Denominator equals No, do not include in Eligible Patient Population. Stop Processing.
  - b. If Encounter as Listed in the Denominator equals Yes, include in the Eligible population.
4. Denominator Population:
  - a. Denominator population is all Eligible Patients in the denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 8 patients in the sample calculation.
5. Start Numerator
6. Check Screening Mammography Results Documented and Reviewed:
  - a. If Screening Mammography Results Documented and Reviewed equals Yes, include in Reporting Met and Performance Met.
  - b. Reporting Met and Performance Met letter is represented in the Reporting Rate and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 3 patients in Sample Calculation.
  - c. If Screening Mammography Results Documented and Reviewed equals No, proceed to Documented Medical Reason Mammogram Not Performed.
7. Check Documented Medical Reason Mammogram Not Performed:
  - a. If Documented Medical Reason Mammogram Not Performed equals Yes, include in Reporting Met and Performance Exclusion.
  - b. Reporting Met and Performance Exclusion letter is represented in the Reporting Rate and Performance Rate in the Sample Calculation listed at the end of this document. Letter b equals 2 patients in the Sample Calculation.
  - c. If Documented Medical Reason Mammogram Not Performed equals No, proceed to Screening Mammography Results were Not Documented and Reviewed, Reason Not Otherwise Specified.

8. Check Screening Mammography Results were Not Documented and Reviewed, Reason Not Otherwise Specified:
  - a. If Screening Mammography Results were Not Documented and Reviewed, Reason Not Otherwise Specified equals Yes, include in the Reporting Met and Performance Not Met.
  - b. Reporting Met and Performance Not Met letter is represented in the Reporting Rate in the Sample Calculation listed at the end of this document. Letter c equals 2 patients in the Sample Calculation.
  - c. If Screening Mammography Results were Not Documented and Reviewed, Reason Not Otherwise Specified equals No, proceed to Reporting Not Met.
9. Check Reporting Not Met
  - a. If Reporting Not Met equals No, Quality Data Code or equivalent not reported. 1 patient has been subtracted from the reporting numerator in the sample calculation.

**SAMPLE CALCULATIONS:**

**Reporting Rate=**

$$\frac{\text{Performance Met (a=3 patients)} + \text{Performance Exclusion (b=2 patients)} + \text{Performance Not Met (c=2 patients)}}{\text{Eligible Population / Denominator (d=8 patients)}} = \frac{7 \text{ patients}}{8 \text{ patients}} = 87.50\%$$

**Performance Rate=**

$$\frac{\text{Performance Met (a=3 patients)}}{\text{Reporting Numerator (7 patients) - Performance Exclusion (b=2 patients)}} = \frac{3 \text{ patients}}{5 \text{ patients}} = 60.00\%$$
