

Potential Gastroenterology Preferred Specialty Measure Set

PQRS# CMS# GPRO#	NQF#	Reporting Method	National Quality Strategy Domain	Measure Title: Description
113 CMS130v2	0034	Registry, EHR, GPRO Web Interface, Measures Group (Prev Care)	Effective Clinical Care	Colorectal Cancer Screening: Percentage of patients 50 through 75 years of age who had appropriate screening for colorectal cancer
185	0659	Registry	Communication and Care Coordination	Endoscopy/Polyp Surveillance: Colonoscopy Interval for Patients with a History of Adenomatous Polyps – Avoidance of Inappropriate Use: Percentage of patients aged 18 years and older receiving a surveillance colonoscopy, with a history of a prior adenomatous polyp(s) in previous colonoscopy findings, who had an interval of 3 or more years since their last colonoscopy
320	0658	Registry	Communication and Care Coordination	Endoscopy/Polyp Surveillance: Appropriate Follow-Up Interval for Normal Colonoscopy in Average Risk Patients: Percentage of patients aged 50 years and older receiving a screening colonoscopy without biopsy or polypectomy who had a recommended follow-up interval of at least 10 years for repeat colonoscopy documented in their colonoscopy report
343	N/A	Registry	Effective Clinical Care	Screening Colonoscopy Adenoma Detection Rate: The percentage of patients age 50 years or older with at least one adenoma or other colorectal cancer precursor or colorectal cancer detected during screening colonoscopy
2015 PQRS Proposed New Measure	N/A	Registry	Effective Clinical Care	Screening for Hepatocellular Carcinoma (HCC) in patients with Hepatitis C Cirrhosis: Percentage of patients aged 18 years and older with a diagnosis of chronic hepatitis C cirrhosis who were screened with either ultrasound, triple-contrast CT or triple-contrast MRI for hepatocellular carcinoma (HCC) at least once within the 12 month reporting period

Potential Gastroenterology Preferred Specialty Measure Set

PQRS# CMS# GPRO#	NQF#	Reporting Method	National Quality Strategy Domain	Measure Title: Description
2015 PQRS New Proposed Measure	N/A	Registry	Patient Safety	Discontinuation of Antiviral Therapy for Inadequate Viral Response: Percentage of patients aged 18 years and older with a diagnosis of hepatitis C genotype 1 who have an inadequate response to antiviral treatment for whom antiviral treatment was discontinued
2015 PQRS New Proposed Measure	N/A	Registry	Person and Caregiver- Centered Experience and Outcomes	Discussion and Shared Decision Making Surrounding Treatment Options: Percentage of patients aged 18 years and older with a diagnosis of hepatitis C with whom a physician or other clinician reviewed the range of treatment options appropriate to their genotype and demonstrated a shared decision making approach with the patient. To meet the measure, there must be documentation in the patient record of a discussion between the physician/clinician and the patient that includes all of the following: <ul style="list-style-type: none"> •Treatment choices appropriate to genotype •Risks and benefits •Evidence of effectiveness •Patient preferences toward the outcome of the treatment

This table is a resource of potential measures that may be applicable to eligible professionals providing clinical services for Gastroenterology. Potential Measures Groups that may be applicable are Hepatitis Measures Groups and Inflammatory Bowel Disease Measures Group.
