

CMS Management Report
1st Quarter 2010 Physician Quality Reporting Initiative
Claims-based Individual Measures Reporting, Performance, and Validation Report

Report Date: 07/27/2010

This summary is provided to assist eligible professionals and their staff in interpreting the Provider Specialty Report. Please note that this report is based on the number of valid quality-data codes (QDCs) submitted by specialty and reasons why a submission is considered invalid. This report also includes lists of specialties reporting at least one valid QDC for each measure. This report does not include the number of claims for which an expected QDC was not submitted on an eligible claim.

Column Definitions for Quality-Data Code (QDC) Submission Error Report by Specialty:

- Total QDCs Reported - Number of QDC submissions for a measure whether or not the QDC submission was valid and appropriate for a measure.
- Total Valid QDCs Reported - Number of valid and appropriate QDC submissions for a measure.
- % Valid – Percentage of Total Valid QDCs Reported divided by Total QDCs Reported.
- Total QDCs Reported on Eligible Cases – Number of valid or invalid QDCs reported on eligible cases meeting the measure's denominator criteria.
- Patient Age Mismatch - Patient did not meet age requirements for the measure.
- Patient Gender Mismatch - Patient did not meet gender requirement for the measure.
- Incorrect HCPCS - Incorrect HCPCS code for the measure - Patient claim did not meet denominator eligibility per measure specifications.
- Incorrect Diagnosis - Incorrect diagnosis code on claim - Patient claim did not meet denominator eligibility per measure specifications.
- Incorrect Diagnosis and HCPCS - Combination of incorrect HCPCS code and incorrect diagnosis code on claim - Patient claim did not meet denominator eligibility per measure specifications.
- Only QDC on Claim - Patient claim missing a qualifying denominator code (all line items contained only QDCs).
- Only QDC and Incorrect Diagnosis - Combination of missing qualifying denominator code and qualifying diagnosis code on the claim.
- Resubmitted QDCs - Submissions invalid due to resubmission of claims simply for the purpose of adding QDCs.

QDC Submission Error Report by Specialty

1. The specialties with the highest percentages of Valid QDCs Reported were:

Radiology (97.20%),
Nuclear Medicine (96.29%),
Audiologists (95.42%),
Oncology/Hematology (94.92%) and
Chiropractors (94.97%).

2. Physicians had a higher rate of Valid QDC submissions (82.78%) than Non-physician providers (75.64%).

3. The highest rates of QDCs Only on a claim were among:
Hand Surgery (3.52%),
OB/Gynecology (3.50%),
Psychiatry (2.98%),
Dietitian/Nutritionist (2.64%) and
Radiation Oncology (2.07%)

Specialties Submitting Valid QDCs by Measure

1. The specialties submitting valid QDCs on each measure are displayed. Several measures were reported by only one specialty: #182: Functional Outcome Assessment in Chiropractic Care (Chiropractor), #188: Wound Care: Use of Compression System in Patients with Venous Ulcers (Otolaryngology) and #189: Referral for Otologic Evaluation for Patients with History of Active Drainage From the Ear Within the Previous 90 Days (Audiologist).

Explanatory Note: The National Plan and Provider Enumeration System (NPPES) and the Health Care Provider Taxonomy codes were utilized as a reference for the specialties indicated in this report. The Health Care Provider Taxonomy captures specialty information in categories detailed enough to support credentialing information but also broad enough to support directory level specialization information. These codes are self-selected by the provider when input into NPPES and therefore this report is dependent on the codes the providers have used to identify themselves. There may be cases where multiple specialties applied to a provider but for purposes of this report only the first listed code from the NPPES database was utilized.

^a For each measure, the total # of instances where an TIN/NPI combination submitted a QDC for that measure.

^b For each measure, the # of instances where an TIN/NPI combination submitted a valid QDC for that measure.

^c The # of occurrences of QDC reporting where the QDC does not match the denominator requirements for the measure.

^d The # of occurrences of a QDC reporting where the QDC does not match the age requirements for the measure.

^e The # of occurrences of a QDC reporting where the QDC does not match the gender requirements for the measure.

^f The # of occurrences of a QDC reporting where the QDC was received on a claim that was resubmitted for the purpose of adding QDCs.
