

## **Provider Specialty Report 3rd Quarter 2011 Physician Quality Reporting System**

**Report Date: 02/13/2012**

This summary is provided to assist eligible professionals and their staff in interpreting the Provider Specialty Report. Please note that this report is based on the number of valid quality-data codes (QDCs) submitted by specialty and reasons why a submission is considered invalid. This report also includes lists of specialties reporting at least one valid QDC for each measure. This report does not include the number of claims for which an expected QDC was not submitted on an eligible claim.

### **Column Definitions for Quality-Data Code (QDC) Submission Error Report by Specialty:**

#### **QDC Submission Attempts:**

- Total QDCs Reported - The number of instances where a TIN/NPI submitted a QDC for that measure.
- Total Valid QDCs Reported on Eligible Cases - The number of instances where a TIN/NPI submitted a valid QDC for that measure.
- % Valid – Percentage of Total Valid QDCs Reported divided by Total QDCs Reported on Eligible Cases.
- Total QDCs Reported on Eligible Cases – Number of valid or invalid QDCs reported on eligible cases meeting the measure's denominator requirements.

#### **Denominator Mismatch:**

- Measure Reported with Incorrect Age and/or Gender - The number of occurrences of QDC reporting where the QDC does not match the demographic requirements for the measure.
- Incorrect Diagnosis and/or HCPCS - The number of occurrences of QDC reporting where the QDC does not match the denominator requirements for the measure.
- Measure Reported on an Instance with a Missing CPT Code - The number of occurrences of QDC reporting where the QDC does not match the denominator requirements for the measure.

### **How to Read the Quality-Data Code Submission Error Report by Specialty:**

Using the Specialty of Allergy/Immunologists as an example, we find the following information as we read across each column:

54,856 QDC submissions were received for measures reported by this specialty, 49,334 of which were considered valid. Therefore, the Valid Submission Rate is 89.93%. There were a total of 49,521 QDCs reported on eligible cases. The rest of the columns explain reasons for invalid submissions for measures reported by this specialty. We see that 2,842 (5.18%) submissions did not match the measure's age and/or gender parameters; 4,997 (9.11%) submissions were for patient encounters and/or diagnoses that are not listed in the denominator of the measures; 131 (0.24%) submissions were for patient encounters that are not listed in the denominator of the measures.

**Analysis Findings Include:****Quality-Data Code Submission Error Report by Specialty**

1. The top 5 specialties with the highest percentages of valid QDC's reported were:

- Oncology/Hematology (96.65%),
- Cardiology (96.15%),
- Chiropractor (95.98%),
- Nuclear Medicine (93.83%), and
- Audiologist (93.80%).

**Specialties that Correctly Reported a Measure**

1. The specialties submitting valid QDC's on each measure are displayed. Three measures were reported by only one specialty: Measure #66 Appropriate Testing for Children with Pharyngitis was reported on only by Emergency Medicine, Measure # 94 Otitis Media with Effusion(OME): Diagnostic Evaluation - Assessment of Tympanic Membrane Mobility was reported on only by Otolaryngology, and Measure # 188 Referral for Otologic Evaluation for Patients with Congenital or Traumatic Deformity of the Ear was reported on only by Family Practice.
