

## Technical Expert Panel Composition (Membership) List

**Project Title:** The development of functional process and outcome quality measure to meet the IMPACT Act of 2014 Cross-Setting Quality Measure Domain: Function Status, Cognitive Function, and Changes in Function and Cognitive Function

**Dates:** October 17 and 18, 2016

### **Project Overview:**

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) was signed into law on October 6, 2014 (1). This Act requires Post-Acute Care (PAC) providers to report standardized patient assessment data and quality measure data to the Secretary. The Centers for Medicare & Medicaid Services (CMS) has contracted with Abt Associates to develop cross-setting post-acute care measures for the quality measure domain - Function Status, Cognitive Function, and Changes in Function and Cognitive Function. The contract name is Outcome and Assessment Information Set (OASIS) Quality Measure Development and Maintenance Project (contract number HHSM -500-2013-13001I, Task Order HHSM-500T0002). As part of its measure development process, CMS asks contractors to convene groups of stakeholders and experts who contribute direction and thoughtful input to the measure contractors during measure development and maintenance.

The Centers for Medicare & Medicaid Services (CMS) is standardizing quality measures as mandated by the IMPACT Act. Current assessment instruments used for PAC settings are setting-specific and contain assessment items with varying concepts, definitions, and measurement scales. The move towards standardized assessment data elements facilitates cross-setting data collection, quality measurement, outcome comparison, and interoperable data exchange. This work aligns with the goals of the National Quality Strategy.
