### Meaningful Measures Framework Across CMS Drawn from Multiple National Priorities and Programs’ Feedback

| Meaningful Measures Areas | Elevator Speech—Magnitude and meaning to beneficiaries, families, and caregivers for both their health and well-being | Illustrative Quality Measures and Initiatives—Currently in Use | Illustrative Quality Measures and Initiatives—Planned for Future Use 

| Medicare Shared Savings Program (MSSP): |  |  |

- Falls: Screening for Future Fall Risk
- Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program:
  - Hours of Physical Restraint Use
  - Hours of Seclusion Use

Medicaid & CHIP:
- Home and Community Based Services CAHPS
- Early Elective Delivery
- Antenatal Steroids

- Critical gap area to be addressed as part of Meaningful Measures Initiative

### STRENGTHEN PERSON AND FAMILY ENGAGEMENT AS PARTNERS IN THEIR CARE

#### Care is Personalized and Aligned with Patient’s Goals

“An alternative approach to better care focuses on [patient goals]...researchers have been using goal-attainment scaling for decades to measure the effect of treatment for conditions such as dementia and for comprehensive geriatric assessments”. Ensure the care delivered is in concert with individuals’ goals, aligned with the care plan co-created with their doctor and evidenced by people making informed decisions about their care.

**Quality Payment Program (QPP):**
- Care Plan

**Hospice Quality Reporting Program (HQR):**
- Measurement of goal attainment is naturally linked to determining patient/family preferences. Quality care in hospice should address

#### End of Life Care according to Preferences

Fewer than 50% of even severely or terminally ill patients have an advance directive in their medical record.” Ensure that care delivered

**Hospice Quality Reporting Program (HQR):**
- Measurement of goal attainment is naturally linked to determining patient/family preferences. Quality care in hospice should address

---

1 The word “patient” is often used as shorthand to comprise patients, families, caregivers, and consumers more broadly. This term is also used to include persons receiving support services, such as those with disabilities. This description is cited from the NQF Patient Reported Outcomes in Performance Measurement Report available at: https://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=72537
### Meaningful Measures Framework Across CMS Drawn from Multiple National Priorities and Programs’ Feedback

#### Meaningful Measures Areas

| Elevator Speech—Magnitude and meaning to beneficiaries, families, and caregivers for both their health and well-being | Illustrative Quality Measures and Initiatives—Currently in Use | Illustrative Quality Measures and Initiatives—Planned for Future Use

- at the end of life is in concert with patient/family preferences, which includes knowing those desires and providing aligned care and services.
  - Hospice Visits while Death is Imminent
  - Beliefs/Values Address (if desired by the patient)
  - Treatment Preferences

#### Patient’s Experience of Care

| Recent average positive reports of healthcare experiences showed variation across a range of factors, for example, from 52% for ‘Care transitions’ to 87% for ‘Discharge information’. Actively engage patients in reporting their experiences including satisfaction with care and staff, and community inclusion. | End-Stage Renal Disease Quality Incentive Program (ESRD QIP):  
  - CAHPS In-Center Hemodialysis Survey  
  - Medicare Shared Savings Program (MSSP):  
    - CAHPS for ACOs Survey  
  - Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program:  
    - Assessment of Patient Experience of Care  
    - Medicaid & CHIP:  
      - Home and Community Based Services CAHPS  
      - Health Plan CAHPS | Ambulatory Surgical Center  
  - Outpatient and Ambulator Surgery Patient Experience of Care Survey (O/ASPECS) Before Procedure

#### Patient Reported Functional Outcomes

| With total knee replacement among the top five most frequent inpatient procedures, more than 50% of inpatients are being discharged home. Improve or maintain patients’ quality of life by addressing physical functioning that affects their ability to undertake daily activities most important to them. | Quality Payment Program (QPP):  
  - Functional Status Assessment for Total Hip Replacement  
  - Functional Status Assessment for Total Knee Replacement  
  - PAC specific functional QMs (Examples listed: HH QRP, LTCH QRP):  
    - Functional Outcome Measure: Change in Mobility Among Long-Term Care Hospital Patients Requiring Ventilator Support (LTCH QRP)  
    - Improvement in Ambulation (HH QRP)  
    - Improvement in Bed Transfer (HH QRP)  
    - Improvement in Bathing (HH QRP) | Quality Payment Program (QPP):  
  - Focus on patient reported outcome measures (PROMs). Person or family-reported experiences of being engaged as active members of the health care team and in collaborative partnerships with providers and provider organizations.  
  - End-Stage Renal Disease Quality Incentive Program (ESRD QIP):  
    - Measures addressing issues such as physical function, independence, and cognition. Quality of Life measures should also consider the life goals of the patient where feasible, to the point of including Patient-Reported Outcomes.  
  - Post-Acute Care Quality Reporting Programs (IRF, LTCH, SNF, HH):  
    - The IMPACT Act delineates the implementation of quality measures that assess functional status, cognitive function, and changes in function and cognitive function.
