

## Session 3 – CMS Informational Series – Measure Development Overview and Information Gathering Part 2

**Activity Number:** WE-E10272011

**CE Activity Title:** Measure Development Information Series: Measure Development Overview and Information Gathering Part 2

**Date of Original Release:** October 27, 2011

**Format:** Enduring Internet Content with recorded audio and PowerPoint slides

**Designated Credit Hours:** 0.75 AMA PRA Category 1 Credit(s)<sup>™</sup>

**Estimated Time to Complete:** 1.0 Hours

**Activity Start/End Date:** Live Presentation October 27, 2011

**Enduring Internet Content:** October 27, 2011 – October 27, 2014

### **Activity Description:**

The purpose of this activity is to improve the understanding of the basic concepts of quality measures and key elements needed to begin the measure development process. The presentation will review the types of data commonly used in quality measures, the types of quality measures, and the associated strengths and limitations of each. Other ways to classify measures will also be discussed including the National Quality Strategy aims and priorities, Institute of Medicine (IOM) domains of care, scoring methods, care settings and types of composite measures.

**Learning Objectives:** By the end of the presentation, you should be able to:

- A. Identify at least three key aspects of conducting a literature review that will help determine the quality issues associated with the topic or setting of interest.
- B. Be able to demonstrate how to evaluate the strength of the evidence behind the measure.
- C. Understand and be able to apply the criteria for selection of the measure focus for process and outcome measures.
- D. Identify the differences between business case, economic case, and social case for a measure.

### **Activity Goal:**

The overall goal of this activity is to inform CMS staff, contractors and others who are involved in quality measure development regarding the processes adopted by CMS for the development and maintenance of quality measures to be used in CMS programs. Quality measures that are used by CMS must be of high caliber and ideally should be able to receive endorsement by the National Quality Forum. This informational series will instruct the audience regarding the use of a set of standardized processes adopted by CMS and aligned with the criteria used by the National Quality Forum. The information described in this series will provide the foundation for the participant to develop quality measures meeting the needs of CMS.

### **Instructions for Participation and Credit:**

In order to receive continuing education credit, participants must:

1. Attend the live presentation (in person , via VTC or Meeting Place) or view the online presentation
2. Submit the post activity evaluation, which is automatically generated after closing the completed WebEx session

3. Successfully complete the course by passing the post activity assessment, which is located at the end of the post activity evaluation

Note: Links to the post activity evaluation and post activity assessment will be forwarded to live activity participants via e-mail and are located at the end of this document. Participants will be notified whether or not they successfully completed the session within 30 days of registering. Certificates will be issued electronically after successful completion of the course. Those participants that did not successfully complete the post activity evaluation and post activity assessment can register for the session again and attempt to earn continuing education credit by taking the assessment again.
