

2014 Individual Eligible Professional Measure Crosswalk

If you are an Individual Eligible Professional (EP) and reported any of the following 2014 PQRS measures via claims, your performance scores will be publicly reported on Physician Compare in late 2015. Quality measure data are displayed on Physician Compare in plain language. The performance rates are displayed as stars and percentages. The plain language measure titles, descriptions, and display are tested with consumers to ensure that they are accurately interpreted.

This document provides a crosswalk between the technical measure title and the plain language measure title that will appear on Physician Compare.

PQRS Number	Technical Measure Title	Physician Compare Measure Title
Preventive Care: General Health		
128	Body Mass Index (BMI) Screening and Follow-Up	Screening for an unhealthy body weight and developing a follow-up plan.
226	Tobacco Use: Screening and Cessation Intervention	Screening for tobacco use and providing help quitting when needed.
317	Screening for High Blood Pressure and Follow-Up Documented	Screening for high blood pressure and developing a follow-up plan.
134	Screening for Clinical Depression and Follow-Up Plan	Screening for depression and developing a follow-up plan.
Patient Safety		
46	Medication Reconciliation	Comparing new and old medications.
Heart Disease		
204	Use of Aspirin or Another Antithrombotic	Using aspirin or prescription medicines to reduce heart attacks and strokes.
