

2015 Individual Clinician Measures Available on the Physician Compare Downloadable Database in late 2016

The Centers for Medicare & Medicaid Services (CMS) provides [official datasets](#) for the Medicare.gov [Physician Compare website](#) to give you useful information about group practices, physicians, and other clinicians currently enrolled in Medicare and what they're doing to improve the care they provide. Below is a list of the 2015 Physician Quality Reporting System (PQRS) measures for Individual Eligible Clinicians targeted for public reporting on the [Physician Compare Downloadable Database](#) in late 2016.

Measures with a checkmark are targeted for public reporting on a clinician's Physician Compare profile page in late 2016. If a measure meets all of the public reporting standards, except for the requirement that it resonates with consumers, these performance scores may be added to the Physician Compare Downloadable Database, but not be included on the public-facing profile pages.

Starting on October 12, 2016, clinicians will be able to preview their performance scores as they will appear on Physician Compare for 30 days. The secured measure preview will be facilitated through the PQRS portal—Provider Quality Information Portal (PQIP). For more information on previewing your performance scores, visit the [Physician Compare Initiative page](#).
