Open Payments System Quick Reference Guide
Final Submission and Attestation

January 2019

Introduction
All data submitted by applicable manufacturers (AMs) and applicable group purchasing organizations (GPOs), hereafter collectively referred to as “reporting entities,” must go through a final submission and attestation process in the Open Payments system. This quick reference guide provides a high-level overview of how to complete the final submission and attestation process.

Prerequisites

• User is registered in CMS Enterprise Identity Management system (EIDM) and has obtained access to the Open Payments system.

• Reporting entity is registered in the Open Payments system.

• Reporting entity has recertified in the Open Payments system, if necessary.

• User who submits data holds the submitter user role; user who attests to data holds the role of attester for the reporting entity.

Actions

Final Data Submission
Only users who hold the role of submitter in the Open Payments system can perform final data submission. Before final submission can occur, one or more records within the selected payment type and program year must be in “Ready for Submission” status, and no records should be in “System Processing” status. Final submission can be performed as frequently as required throughout the submission process.

To perform final submission, follow the steps below.

1. Log into the Open Payments system via the CMS Enterprise Portal at https://portal.cms.gov/ and select the “Submissions” tab.

2. From the “Submissions” tab, use the drop-down lists to select the reporting entity and program year for which you want to perform final submission and select the “Review Records” button.
3. On the “Review Records” page, select the “View All” button for one of the three payment types (General, Research, and Ownership or Investment Interest) that has record(s) in “Ready for Submission” status and no record(s) in “System Processing” status.

   **Note:** You will need to repeat the final data submission steps for each of the three payment types.

4. Select the “Final Submission” button on the “Payment Category” page for the selected payment type.

   - If this button is not available, review the following record statuses.
     - **System Processing** – Record(s) in this status are still undergoing processing and validation. If any record(s) are in “System Processing” status, users cannot perform final submission for that payment type.
     - **Ready for Submission** – Record(s) in this status are ready for final submission. Users can only perform final submission for that payment type when there are record(s) in “Ready for Submission” status.

5. On the “Confirm Final Submission” page, review the summary details related to your submission. Select the “Submit as Final Submission” button if this information is correct. If the details are incorrect, select the “Cancel” button to go back and make any necessary corrections to the records.

   - When you select the “Submit as Final Submission” button, an email notification will automatically be sent to the reporting entity’s submitters, informing them that the final submission was successful.

Records that have successfully completed final submission will be shown as “Ready for Attestation”. When all records from all payment categories for the program year are in “Ready for Attestation” and/or “Attested” status, the “Notify Attester” button will be available on the program year’s Review Records page for users holding submitter role. Select the button to trigger an email notification to the attester(s), informing them that there are records available for attestation.

   **Note:** Notification that records are available to attest will not be sent to the attesters until the submitter selects the “Notify Attester” button.

**Completion of the final submission process can take up to several hours depending on the amount of records and system activity levels. Submitters should take this processing time into consideration when performing submission activities.**

January 2019
Attestation

After the data has undergone final submission, the attester for the reporting entity will be able to attest that the information they are submitting to the Open Payments system is accurate and complete. Only individuals in the attester role may complete the attestation process.

Note: Records previously attested to that were marked for deletion must be re-attested for those records to be removed from the Open Payments system. A summary of records that are marked for deletion is provided during the attestation process.

To complete attestation, follow the steps below.

1. Log in to the Open Payments system via the CMS Enterprise Portal at https://portal.cms.gov/ and select the “Submissions” tab.

2. From the “Submissions” tab, use the drop-down list to select the reporting entity and program year for which you want to perform attestation and then select the “Review Records” button.
   - To review the marked for deletion records that will be deleted by the attestation, select the “View All” button next to the payment category. On the “Payment Category” page, check the box for “Yes” under the heading “Marked for Deletion,” then select “Search.” This will filter the search results to show only records marked for deletion. Once you have reviewed them and are ready to attest, return to the “Review Records” page.

3. On the “Review Records” page, select the “Begin Attestation of All Records” button.
   
   **Note: Attestation is conducted for all records for that program year, across all three payment types.**
   
   - If the “Begin Attestation of All Records” button is not available, check if records for the program year are in “Ready for Attestation” and/or “Attested” status. If any record is in another status, contact a submitter for the reporting entity and alert him or her that all records need to be advanced to “Ready for Attestation” status (i.e., undergo final submission) before attestation can begin.
   
   - The attesters will be able to attest all “Ready for Attestation” and/or “Attested” records.

4. On the “Confirm Payments” page, review the detailed summary of records being attested to for the program year displayed per payment category and select the “Next” button to proceed.
5. On the “Add Assumptions” page, you may provide any assumptions made when preparing and submitting the data.

- **To include an assumptions statement:** Select “Yes, include an assumptions statement.” Assumptions are entered in a free-form text box with a 8,000-character limit. The assumptions statement can be edited at a later time. After the assumptions have been entered, select the “Next” button.

- **To proceed without adding assumptions:** Select “No, do not include an assumptions statement” and then select the “Next” button. If you choose this option, you can only go back and add assumptions if you make changes to your submission that require re-attestation of that submission.

6. On the “Agree to Attestations” page, review the attestation totals displayed and the statements and select the checkbox next to all of the attestation statements which apply to the submission. Note that checking the first two statements is required to proceed. If you are attesting to the deletion of previously attested records, checking the sixth statement is strongly encouraged. A summary of all records being attested to and deleted (if applicable) is displayed on this page. When finished, select the “Continue” button.

7. On the “Review and Attest” page, review the information displayed, including the attestation totals, and select the “Attest” button to complete attestation.

**Next Steps**
- Review and resolve disputes as needed

**Additional Resources**
All data submission resources can be found on the Resources page of the CMS Open Payments website at [https://www.cms.gov/OpenPayments/About/Resources.html](https://www.cms.gov/OpenPayments/About/Resources.html).

Quick reference guides relevant to final submission and attestation include:

- Identifying Validation and Matching Errors
- Correcting Validation and Matching Errors
- Record Deletion
- Consolidated Reporting
