To the Parents/Guardian of

This letter is in regards to your child's / children's visit to Northeastern Tribal Health Center on _____ . Our records indicate that there is no insurance information on file for your child / children.

As the Pediatric Benefits Coordinator part of my job is to screen all patients aged 18 and under to see if they have insurance. This is done to ensure that we have correct information in our system. If patients do not have private insurance there are programs through the state that you may be able to qualify for. Qualifying for these programs ensures that your child has health insurance coverage.

I would like to discuss with you the options for insurance coverage that may be available to you and your family. Please contact me at 918-675-2045 to discuss programs that you may qualify for.

Sincerely,

LaDonna Proctor
Pediatric Benefits Coordinator
