MAY 03 2012

William J. Streur, Commissioner
Department of Health and Social Services
Post Office Box 110601
Anchorage, Alaska 99811-0601

RE: Alaska State Plan Amendment (SPA) Transmittal Number 12-002

Dear Mr. Streur:

The Centers for Medicare & Medicaid Services (CMS) has completed its review of Alaska State Plan Amendment (SPA) Transmittal Number 12-002. This amendment implements the consultation of tribal health programs prior to the submission of any plan amendment in compliance with Section 1902(a)(73) of the Social Security Act as required at 5006(e)(2) of the American Recovery and Reinvestment Act.

This SPA is approved effective January 1, 2012. CMS will utilize the process as articulated in reviewing Alaska SPAs, waivers, and demonstration projects going forward.

If you have any additional questions or require any further assistance regarding this amendment, please contact me, or have your staff contact Maria Garza at (206) 615-2542 or via email at maria.garza@cms.hhs.gov.

Sincerely,

Carol J.C. Peverly
Associate Regional Administrator
Division of Medicaid and Children’s Health Operations

cc: Kimberli Poppe-Smart, Deputy Commissioner

23. REMARKS:
    P&I changes authorized by the State on 03/13/2012.
Tribal Consultation Requirements
Section 1902(a)(73) of the Social Security Act (the Act) requires a State in which one or more Indian Health Programs or Urban Indian Organizations furnish health care services to establish a process for the State Medicaid agency to seek advice on a regular, ongoing basis from designees of Indian health programs, whether operated by the Indian Health Service (IHS), Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act (ISDEAA), or Urban Indian Organizations under the Indian Health Care Improvement Act (IHCIA). Section 2107(e)(1) of the Act was also amended to apply these requirements to the Children’s Health Insurance Program (CHIP). Consultation is required concerning Medicaid and CHIP matters having a direct impact on Indian health programs and Urban Indian organizations.

1. Tribal Consultation Policy
In order to comply with Section 1902(a)(73) and Section 2107(e)(1) of the Social Security Act, the State of Alaska Department of Health & Social Services (Department) establishes this formal policy on tribal consultation for Medicaid and the Children’s Health Insurance Program (CHIP). This relationship enhances and improves existing communication between parties and facilitates the exchange of ideas regarding state plan amendments, waivers, and demonstrations related to Medicaid and Denali Kid Care (the Federal Children’s Health Insurance Program).

It is the intent and commitment of the Department to solicit advice, review, seek clarification, and utilize the aforementioned as appropriate from the federally recognized tribal health programs and the Indian Health Service (IHS) to ensure that they are included in the decision making prior to changes in programs that are likely to have a direct effect on American Indians or Alaska Natives (AI/ANs), tribal health programs or IHS, while preserving the right of the Department to make appropriate decisions. Amendments to the State Plan, waivers, or demonstrations are considered to have direct affects on American Indians or Alaska Natives (AI/ANs), tribal health programs or IHS if the changes impact eligibility determinations, reduce payment rates, change payment methodologies, reduce covered services, or change provider qualifications/requirement. Proposals for new demonstrations or waivers will also be included in consultation.
The following Tribal Consultation policy statement includes an overview of the notification process the Department utilizes to inform identified/required parties with the timeline that allows for reasonable response time for tribal health programs and IHS to review and comment and for the Department to review and integrate input as deemed appropriate. It will detail the identification of the proposed changes, anticipated impacts on AI/ANs and/or tribal health programs and IHS describe how to provide comment and offer an opportunity to request more direct interaction with the Department regarding proposed changes. The Department will summarize comments received and which, if any, influenced the Department's submission and or changes

2. Communication Methods
The Department will use the following methods to provide notice and request input from tribal health programs and IHS on all issues likely to have an effect on AI/AN beneficiaries.

2.1 Written Correspondence (Dear Tribal Leader Letter)
The Department will deliver written notices of state plan amendments, waivers, and demonstrations related to Medicaid and Denali Kid Care (the Federal Children's Health Insurance Program) to designated entities. Designated entities include but are not limited to:
   a. Tribal health programs
      i. Health Director
      ii. Board Chair
   b. Alaska Native Health Board
   c. Director, Alaska Area Native Health Service
   d. State/Tribal Medicaid Task Force
The written notice (Dear Tribal Leader Letter) will include, but is not limited to:
   a. Purpose of the proposal/change and proposed implementation plan; and
   b. Anticipated impact on AI/ANs and tribal health programs and IHS as determined by the Department;
   c. Method for providing comments/questions; and
   d. Timeframe for responses

The Department may consolidate notice of multiple changes into a single letter. At the option of the tribal health program, the Department may substitute notification by email or other electronic means for delivery by mail.

2.2 Meetings
Quarterly joint meetings with tribal health programs and IHS and/or their designees, the Department, and the Alaska Native Health Board or other
designated groups. The Department must be notified in writing if the
designees change. This will suffice as documentation that the Department
informed the appropriately designated entities.

2.3 Committees/Work Groups
Round tables and work groups should be used for discussions, problem
resolution and preparation for communication and consultation. These
will provide the opportunity for technical assistance teams from the
Department and tribal health programs and IHS to address challenges or
barriers and work collaboratively on development of solutions.

The Department and/or tribal health programs and IHS will designate
technical representation on special workgroups as needed or
recommended.

3. Consultation Timeframes
The Department will request consultation at the earliest opportunity, no
later than 60 days in advance of submission to the Centers for Medicare
and Medicaid (CMS) to give appropriate tribal contact(s) adequate time
to consider and respond to the impact of the communication. The tribal
health programs and IHS should submit written comment within 30 days
so the Department has time to review and incorporate changes as deemed
appropriate. If there is a request for a face to face meeting, the
Department needs to receive written request within 15 days of the initial
notice in order to facilitate a meeting and make changes as deemed
appropriate.

4. Implementation Process and Responsibilities
As a component of continued systems accountability, this process will be
reviewed and evaluated for effectiveness every four years, or as
necessary. A report will be issued 90 days after the Alaska Medicaid and
Denali KidCare Tribal Consultation Policy and Procedure review that
summarizes the evaluation and details any new strategies and/or specific
agreements.

4.1 Department of Health and Social Services
- Solicit advice with tribal health programs and IHS as outlined in
  the State Plan by Tribal Consultation amendment.
- Maintain electronic information for posting of the Department’s
  Medicaid information for tribal health programs and IHS.
- Provide electronic and or written information through all the
  methods above.
- Consider input and document action taken with the tribal health
  programs and IHS prior to final submission of all SPAs, waiver
  requests, and proposals for demonstration projects to CMS.

Supersedes TN No NA

MAY 03 2012
• Provide written documentation of responses to Tribal health programs and IHS comments.

4.2 Tribal Health Programs and IHS
• In order to ensure the success of the Department’s commitment to solicit and utilize input from tribal health programs and IHS, the following are strongly encouraged.
  • Provide effective representatives to the appropriately designated Quarterly Meetings.
  • Representatives share information from committee meetings to others, as appropriate (representatives are responsible to disseminate information from the committee meeting to the appropriate tribal health organizations).
  • Identify and facilitate effective participation on issue specific subject matter from representatives on special work groups as requested.
  • Keep electronic site updated with current contact information.
  • Provide comments/input/advice to help inform the process and ensure that Alaska Medicaid and Denali KidCare meet the needs of AI/ANs and tribal health programs and IHS.
  • When specially requested to provide input on a proposed change, please document a response even if there are no comments.

5. Procedures
The Department will notify tribal health programs and IHS, at the earliest opportunity, no later than 60 days in advance of submission to the Centers for Medicare and Medicaid (CMS) of state plan amendments, waiver requests, and proposals for demonstration projects and on a quarterly basis when state plan amendments are submitted and require consultation under this Policy with tribal health programs and IHS.

Tribal health programs and IHS may identify a critical event or issue of concern and make a formal request for consultation with the Department, through the Commissioner’s office.

The Department and tribal health programs and IHS will determine the level of consultation needed (written, face to face meeting, or both) to address items #1 and #2, and request consultation as needed.

The parties will determine if work groups should be tasked to work on technical questions in preparation for consultation and the timeline for process completion.
The Department shall review the results of the consultation policy with tribal health programs and IHS and consider recommended changes.

The Department shall post within 60 days from the close of the consultation period, or as soon as feasible, a summary of the outcome of consultation with tribal health programs and IHS, which may be in the form of a submitted State Plan amendment.
