## Billing Clarification for J2505 Pegfilgrastim

**Note:** This article was updated on November 1, 2012, to reflect current Web addresses. All other information remains unchanged.

### Provider Types Affected

Providers who bill Medicare fiscal intermediaries (FIs) for Pegfilgrastim

### Important Points to Remember

- CR4380 announces to providers that Medicare FIs will make payment for one unit for every 6 MG (or .06 ML) of Pegfilgrastim administered to the beneficiary.
- Make certain when billing for Pegfilgrastim that you show the correct number of multiples of 6 MG, **not** the number of MGs.
- Be aware that FIs will return to provider (RTP) any claim received for 6 units of Healthcare Common Procedure Coding System (HCPCS) code J2505.

### Background

The Centers for Medicare & Medicaid Services (CMS) learned that providers are billing incorrectly for Pegfilgrastim. An analysis of claims revealed a number of providers billing multiple units of J2505 per date of service. CMS also noted that many providers billing multiple units of J2505 were consistently billing 6 units per date of service, indicating that 36mg of Pefilgrastim were given.

HCPCS code J2505 is usually administered via a pre-filled syringe of 0.6 ML, which is equivalent to 6 MG of Pefilgrastim.

Providers should ensure they are billing for the number of **multiples of 6 MG** administered rather than the **number of MGs** administered.
