Allowing Physician Assistants to Perform Skilled Nursing Facility (SNF) Level of Care Certifications and Recertifications

Note: This article was revised on November 7, 2014, to add a reference to MLN Matters® article SE1428 available at <http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/downloads/SE1428.pdf>, for detailed information on acceptable certification and recertification documentation. All other information is the same.

Provider Types Affected

SNFs and swing-bed hospitals that bill Medicare contractors (Fiscal Intermediaries (FIs) or A/B Medicare Administrative Contractors (A/B MACs)) for providing Part A SNF services to Medicare beneficiaries are affected.

What Providers Need to Know

This article is based on Change Request (CR) 7701, which implements Section 3108 of the Affordable Care Act. This section adds physician assistants to the list of practitioners who can perform SNF level of care certifications and recertifications. Performing this function is a requirement for Medicare coverage of SNF services under Part A.

CR7701 directs Medicare contractors to recognize that, **effective with services furnished on or after January 1, 2011**, physician assistants can perform the required initial certification and periodic recertifications of a beneficiary's need for a SNF level of care.

Note: Contractors will reopen and reprocess any claims brought to their attention for Part A SNF services that were mistakenly denied (prior to this update) based on having a physician assistant complete the required SNF level of care certification or recertification. However, contractors will not search claims history to identify these claims.
