other modifiers, for use in Medicare billing, to be appended, where appropriate, to all claim lines related to a surgical error.

CAUTION – What You Need to Know

Some providers or their billing services may be incorrectly using the HCPCS modifier PC to indicate the Professional Component for certain services not related to surgical error when the modifier 26 should have been used. You need to be aware that the use of the PC modifier on Medicare claims will result in the claim being denied.

GO – What You Need to Do

Please be sure that you and your billing personnel/services prepare claims submitted to Medicare with the correct codes in order for the claims to process correctly.

Background

This special edition article clarifies the correct use of certain HCPCS modifiers. To briefly clarify, please note that:

- Modifier PC is used to identify Wrong Surgery on Patient. The modifier PC is to be appended, where appropriate, to all claim lines related to a surgical error.
- Modifier 26 is used to identify the professional component of a service or a procedure.

As appropriate, please review MM6405: Wrong Surgical or Other Invasive Procedures Performed on a Patient, Surgical or Other Invasive Procedures Performed on the Wrong Body Part, and Surgical or Other Invasive Procedures Performed on the Wrong Patient, which explains the wrong surgery HCPCS modifiers. This article is available at <http://www.cms.gov/outreach-and-education/medicare-learning-network-mln/mlnmattersarticles/downloads/MM6405.pdf> on the CMS website.

Additional Information

If you have questions, please contact your Medicare contractor at their toll-free number which is available: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Monitoring-Programs/provider-compliance-interactive-map/index.html> on the CMS website.
