Resources	18

This booklet outlines items and services Medicare never or only sometimes covers. This isn't an all-inclusive list.

For Medicare Advantage (MA) plan patients, check with the MA plan for information on eligibility, coverage, and payment. Each plan can have different patient out-of-pocket costs and specific rules for getting and billing for services. Follow the plan's terms and conditions for payment.

Note: We don't cover any item or service provided directly or indirectly by an individual or entity the Office of Inspector General excludes from all federal health care programs.

We don't cover these items and services categories:

- Medically unreasonable and unnecessary services and supplies
- Noncovered items and services
- Services and supplies denied as bundled or included in another service's basic allowance
- Items and services paid by other organizations or provided without charge

Medicare Benefit Policy Manual, Chapter 16 lists general Medicare coverage exclusions, and Medicare Benefit Policy Manual, Chapter 15 has more information on covered and noncovered medical and other health services.

Medically Unreasonable & Unnecessary Services & Supplies

We don't pay for medically unreasonable and unnecessary services and supplies to diagnose and treat a Medicare patient's condition. These include:

- Hospital-provided services that, based on the patient's condition, could have been provided in a lower-cost setting, like the patient's home or nursing home
- Hospital services exceeding Medicare length of stay limits
- Evaluation and management services exceeding those considered medically reasonable and necessary
- Excessive therapy or diagnostic procedures
- Unrelated screening tests, exams, and therapies where the patient has no symptoms or diagnoses, except certain screening tests, exams, and therapies
- Unnecessary services, like transcendental meditation, based on the patient's diagnosis
- Items and services administered to the patient to cause or assist in death (assisted suicide)

Services must meet specific medical necessity requirements in the statute, regulations, manuals, and any medical necessity criteria defined by National Coverage Determinations, and Local Coverage Determinations, if any apply. For each service you bill, indicate the specific sign, symptom, or patient complaint that makes the service reasonable and necessary.

We may cover these items and services:

- Medicare Preventive Services
- Transitional Care Management Services
- Chronic Care Management Services
- Advance Care Planning

We may also cover items and services that ease pain or discomfort, even if their use may increase risk of death, if they're not provided for the specific purpose of causing death.

The <u>Physician Fee Schedule Relative Value Files</u> shows coding and payment for items and services we may cover.

Noncovered Items & Services

Custodial Care

Medicare Fee-for-Service doesn't cover <u>custodial care</u>, like long-term care services and supports in the patient's home or an institution.

Custodial care is personal care that:

- Doesn't require the continued attention of trained medical or paramedical personnel
- Helps an individual with activities of daily living, like:
 - Walking
 - Getting in and out of bed
 - Bathing
 - Dressing
 - Feeding
 - Using the toilet
 - Preparing a special diet
 - Supervising normally self-administered medication

Who Covers Custodial Care?

Long-term care includes non-medical care for people who have a chronic illness or disability.

Medicare and most health insurance plans don't cover long-term care.

Supplemental insurance (Medigap) policies don't pay for custodial care.

Some patients may be eligible for custodial care through Medicaid.

MA plans may cover custodial care as part of supplemental home and community-based services.

Visit LongTermCare.gov and Eldercare Locator for more information or to find community services for older adults and their families.

- If Medicare Part A denies coverage for a hospital or skilled nursing facility (SNF) stay because it's
 considered custodial care, we may cover individual Medicare Part B services that are reasonable
 and necessary to treat the patient's illness or injury, like periodic patient visits by a physician
- Custodial care doesn't exclude payment for Part B claims for medically necessary ancillary services
- For patients who choose hospice care, the care is custodial only if it's not reasonable and necessary for managing the terminal illness or related conditions
- Some MA plans may cover some non-skilled supplemental benefits that:
 - · Compensate for physical impairments
 - Reduce the effect of injuries or health conditions
 - Reduce avoidable emergency department use

Get more information about Medicare and hospice care, including covered and noncovered hospice services.

Items & Services Provided Outside the U.S.

We don't cover most items and services provided outside the U.S., including if a patient purchases an item in the U.S. or from an American firm. We also won't pay for medical services sub-contracted to another provider or supplier outside the U.S.

We don't pay for provider professional services outside the U.S., except certain limited services. We recognize these as U.S. jurisdictions for Part A and Part B services:

- All 50 states
- District of Columbia
- Commonwealth of Puerto Rico
- U.S. Virgin Islands
- Guam
- Commonwealth of Northern Mariana Islands
- American Samoa
- Territorial waters touching U.S. land (for services onboard a ship)

We consider a hospital outside the U.S. if it's not physically located in 1 of the jurisdictions above, even if it's owned or operated by the U.S. government.

We may cover these services:

- Emergency inpatient hospital services at a foreign hospital closer to, or more accessible from, the emergency site than the nearest U.S. hospital if 1 of these conditions also exists:
 - The patient was physically present in the U.S. at the time of the emergency
 - The patient was physically present in Canada when the emergency happened and was traveling (by the most direct route without unreasonable delay) between Alaska and another state
- Emergency or non-emergency inpatient services provided by a hospital outside the U.S. if the hospital is closer to, or substantially more accessible from, the patient's U.S. home than the nearest participating U.S. hospital that can treat the patient's medical condition
- Physician and ambulance services provided in connection with a patient's covered foreign inpatient hospital stay when:
 - The physician is legally authorized to practice in the country where they provide the services
 - The ambulance supplier meets Medicare's definition of ambulance services
- Services provided onboard a ship in a U.S. port or within 6 hours of when the ship arrived or departed, and if services don't meet this requirement, we consider them provided outside U.S. territorial waters, even if the ship is of U.S. registry

The Railroad Retirement Board (RRB) pays Qualified Railroad Retirement Beneficiaries (QRRBs) for covered hospital services provided in Canadian and U.S. hospitals. If the QRRB files a payment claim for Part B services connected to a hospitalization in Canada, the RRB processes the Part B claim and decides whether:

- The inpatient services met all requirements
- The physician or ambulance services were provided in connection with the other required services

Items & Services Required Because of War

We don't cover items and services required because of war or an act of war that happens after the patient's current Medicare effective date.

Personal Comfort Items & Services

We don't cover <u>personal comfort items</u> because these items don't meaningfully contribute to treating a patient's illness, injury, or the functioning of a malformed body member. Some examples of personal comfort items include:

- Radios
- TVs
- Phones

- Air conditioners
- Beauty and barber services (with certain exceptions)

If a patient asks for a personal comfort item, tell them there's a specific charge for the item. You can't charge more than the customary amount for any current or future charges. You also can't require the patient to ask for noncovered items or services as a condition of admission or continued stay.

Exceptions

We may cover certain basic personal resident services under Part A in a SNF or general psychiatric hospital when the patient can't perform them for themselves, like shaves, haircuts, or shampoos. We don't cover more elaborate services, like professional manicures or hair styling.

We may consider these ordinary resident care and covered costs payable under Part A when they're:

- Provided by a long-stay institution
- Included in the flat rate charge
- Routinely provided without patient charge

Routine Services & Supplies

We don't cover these routine items and services:

- Routine or annual physical checkups (visit <u>Medicare Wellness Visits</u> to learn about exceptions).
- Physical exams performed without a specific sign, symptom, or patient complaint. This includes
 exams required by third parties, like insurance companies, businesses, or government agencies.
- Eye exams for prescribing, fitting, or changing eyeglasses.
- Eye refractions provided by practitioners for any purpose.
- Eyeglasses or contact lenses.
- Hearing aids or hearing exams.
- Chiropractic services other than manual manipulation of the spine to correct a subluxation (if legal
 in the state where it's performed).
- Immunizations.

We may cover these items and services:

- Physician services (or services and supplies incident to a physician's service) to diagnose and treat an eye disease, like glaucoma or cataracts
- 1 pair of eyeglasses or contact lenses after each cataract surgery with insertion of an intraocular lens
- Shots directly related to treating an injury or direct exposure to a disease or condition, like anti-rabies treatment or immune globulin
- Shots specifically covered by statute, like COVID-19, hepatitis B, pneumococcal, or seasonal flu virus (visit Preventive Services to learn more)
- Reasonable supply of antigens (no more than a 12-month supply) prepared for a patient by a
 doctor of medicine (MD) or a doctor of osteopathy (DO) after examining the patient and determining
 a treatment plan and dosage regimen
- Cochlear implants and auditory brainstem implants that replace cochlear structures or auditory nerve function and deliver electrical energy to auditory nerve fibers and other neural tissue through implanted electrode arrays
- Osseointegrated implants that replace the middle ear function and deliver mechanical energy to the cochlea through a mechanical transducer as prosthetic devices if hearing aids are medically inappropriate, or the patient can't use them due to:
 - Congenital malformations
 - Chronic disease

- Severe sensorineural hearing loss
- Surgery

Cosmetic Surgery

We don't cover cosmetic surgery or related expenses. <u>Cosmetic surgery</u> includes any procedure to improve the patient's appearance.

Exceptions

We may cover prompt (as soon as medically feasible) repair of an accidental injury or improvement of the functioning of a malformed body member, like surgery for:

- Treating severe burns
- Repairing the face after a serious auto accident
- Therapeutic purposes that coincidentally serve some cosmetic purpose

Items & Services Provided by Patient's Immediate Relatives & Members of the Patient's Household

We don't pay for items and services provided by the patient's immediate relatives and members of the patient's household. Medicare Benefit Policy Manual, Chapter 16, section 130 has more information. These items and services are usually provided at no cost because of their relationship. A patient's immediate relatives include:

- Spouse
- Natural or adoptive parent, child, or sibling
- Stepparent, stepchild, stepbrother, or stepsister
- Father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law
- Grandparent or grandchild
- Grandparent's or grandchild's spouse

If the step- or in-law marriage relationship ends through divorce or death, the prohibited relationship continues to exist.

Members of the patient's household include those who share a common residence as part of a single-family unit:

- People related by blood, marriage, or adoption
- Domestic employees

 Other people living together as part of a single-family unit (not roomers or boarders)

We also don't pay for these items and services:

- Services related to a physician's professional work when the physician provides, orders, or supervises the services for their immediate relatives or for members of their household
- Services when a physician or supplier has a prohibited relationship with the patient, and someone unrelated (an individual, partnership, or professional corporation) bills for those services

Professional Corporation

A professional corporation is a corporation that 1 or more physicians completely own. These corporations practice medicine, osteopathy, dentistry, podiatry, optometry, or chiropractic services. State law may also authorize other health care professionals to own these corporations.

We consider any incorporated physician or group of physicians a professional corporation. We don't pay for items and services from non-physician suppliers who aren't incorporated, even if:

- A sole proprietor owns the supplier and has an excluded relationship to the patient
- A partnership owns the supplier and even 1 partner is related to the patient

This payment restriction doesn't apply to regular corporations (not professional corporations). We'll pay these corporations regardless of how the patient relates to:

- Corporate stockholders
- Officers or directors

The individual who provided the service

Dental Services

We don't cover items and services for the care, treatment, filling, removal, or replacement of teeth or structures directly supporting the teeth, like preparing the mouth for dentures or removing diseased teeth in an infected jaw. Structures directly supporting the teeth are the periodontium, which includes:

- Gingivae
- Dentogingival junction
- Periodontal membrane

- Cementum
- Alveolar bone (alveolar process and tooth sockets)

Regardless of whether we cover inpatient hospital services, we don't cover physician medical services connected to noncovered dental services.

See the Medicare Benefit Policy Manual, Chapter 1, section 70 and Medicare Benefit Policy Manual, Chapter 15, section 150 for more information.

Exceptions

We may cover some dental services, such as:

Inpatient Hospital Dental Services

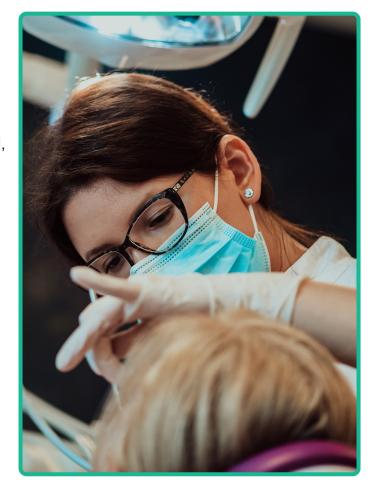

Under section 1862(a)(12) of the Social Security

Act and 42 CFR 411.15(i), we don't pay for (also called "payment exclusion") items and services in connection with the care, treatment, filling, removal, or replacement of teeth or structures directly supporting the teeth ("dental services"), except for inpatient hospital services connected to dental services when the patient requires hospitalization because of 1 of these:

- The patient's underlying medical condition and clinical status
- The severity of the dental procedure

Dental Services Integral to Medicare-Covered Services

The dental services payment exclusion doesn't apply, and we can pay under Part A and Part B, when dental services are <u>inextricably linked</u> to the clinical success of other Medicare-covered procedures or services.

Examples of dental services that are inextricably linked to, and substantially related and integral to the clinical success of, certain Medicare-covered services could include, but aren't limited to:

- Dental or oral exams as part of a comprehensive workup before the Medicare-covered services listed below and medically necessary diagnostic and treatment services to eliminate an oral or dental infection before or at the same time as these Medicare-covered services:
 - Organ transplant, including hematopoietic stem cell and bone marrow transplant
 - Cardiac valve replacement
 - Valvuloplasty procedures
 - Chemotherapy, chimeric antigen receptor (CAR) T-cell therapy, and the administration of high-dose bone-modifying agents (antiresorptive therapy) when used to treat cancer
- Dental or oral exams as part of a comprehensive workup before medically necessary diagnostic
 and treatment services to eliminate an oral or dental infection before or at the same time as
 medically necessary diagnostic and treatment services to address dental or oral complications
 after Medicare-covered treatment of head and neck cancer using radiation, chemotherapy,
 surgery, or any combination of these.
- Dental ridge reconstruction done because of and at the same time as surgery to remove a tumor.
- Services to stabilize or immobilize teeth related to reducing a jaw fracture.
- Dental splints, only when used as part of the covered treatment of a covered medical condition, like dislocated jaw joints.

Medicare covers ancillary services and supplies under Part A and Part B when they relate to covered dental services. These include:

- Administering anesthesia
- Diagnostic X-rays

- Operating room use
- Other related procedures

Inpatient Hospital or SNF Services Not Delivered Directly or Under Arrangement

We don't normally cover non-physician services for Part A or Part B hospital inpatients unless those services are provided either:

- Directly by the hospital or SNF
- Under an arrangement the hospital or SNF makes with an outside source

<u>SNF Consolidated Billing</u> has more information about billing SNF bundled services as part of the prospective payment system.

We may cover these items and services if they're medically necessary, even though they're not provided directly or under an arrangement:

- Physician services to hospital inpatients and SNF residents except for therapy in SNFs (the SNF must provide these services to Part A and Part B inpatients directly or under arrangement)
- Physician assistant services

- Nurse practitioner services
- Clinical nurse specialist services
- Certified nurse-midwife services
- Qualified clinical psychologist services
- Certified registered nurse anesthetist services

For SNF Part A inpatients, we may cover these services if they're provided by another authorized provider or supplier:

- Home dialysis supplies and equipment, self-care home dialysis support services, and institutional dialysis services and supplies (including related necessary ambulance services)
- Ambulance transportation related to dialysis services
- Epoetin Alfa (EPO) for certain dialysis patients
- Hospice care related to the patient's terminal condition
- Radioisotope services
- Some customized prosthetic devices
- Some chemotherapy and chemotherapy administration services
- These categories of exceptionally intensive outpatient services, which we've determined are beyond the scope of SNF care plans and require the intensity of a hospital (including a critical access hospital) setting to provide them safely and effectively:
 - Cardiac catheterization
 - Computerized axial tomography scans
 - Magnetic resonance imaging
 - Ambulatory surgery using an operating room or comparable setting
- Radiation therapy services
- Angiography
- Certain lymphatic and venous procedures
- Emergency services

This exception doesn't apply when the patient gets these services in an ambulatory surgical center. Coverage includes transportation from the SNF to the hospital and back when the patient's medical condition requires an ambulance.

See the <u>Medicare Benefit Policy Manual, Chapter 1</u> for information on covered and noncovered inpatient hospital services and the <u>Medicare Benefit Policy Manual, Chapter 8</u> for covered and noncovered SNF services.

Foot Care Services & Supportive Devices

We don't normally cover these foot care services and devices. See the Medicare Benefit Policy Manual, Chapter 15, section 290:

- Flat foot treatment
- Routine foot care, including:
 - Cutting or removing corns and calluses
 - Trimming, cutting, clipping, or debriding nails
 - Other hygienic and preventive maintenance foot care, like cleaning and soaking the feet, using skin creams to maintain ambulatory or bedridden patient skin tone, and other services without localized illness, injury, or symptoms
- Orthopedic shoes and other supportive foot devices

Exceptions

We may cover these devices and services:

- Orthopedic shoes integral to a leg brace
- Therapeutic shoes for patients with diabetes
- Services necessary and integral to a covered service, like diagnosis and treatment of ulcers, wounds, or infections
- Foot wart (including plantar wart) treatment
- Mycotic nails treatment:
 - For an ambulatory patient, the physician attending the patient's mycotic condition must document:
 - Clinical evidence of toenail mycosis
 - The patient has marked ambulation limitation, pain, or secondary infection from thickening and dystrophy of the infected toenail plate
 - For a non-ambulatory patient, the physician attending the patient's mycotic condition must document:
 - Clinical evidence of toenail mycosis
 - The patient has pain or a secondary infection resulting from thickening and dystrophy of the infected toenail plate

- When foot care is needed for metabolic, neurologic, or peripheral systemic diseases, such as:
 - Diabetes mellitus*
 - Arteriosclerosis obliterans (A.S.O., arteriosclerosis of the extremities, occlusive peripheral arteriosclerosis)
 - Buerger's disease (thromboangiitis obliterans)
 - Chronic thrombophlebitis*
 - Peripheral neuropathies involving the feet associated with:
 - Malnutrition and vitamin deficiency:*
 - ✓ Malnutrition (general, pellagra)
 - ✓ Alcoholism
 - ✓ Malabsorption (celiac disease, tropical sprue)
 - ✓ Pernicious anemia
 - Carcinoma*
 - Diabetes mellitus*
 - Drugs and toxins*
 - Multiple sclerosis*
 - Uremia (chronic renal disease)*
 - Traumatic injury
 - Leprosy or neurosyphilis
 - Hereditary disorders:
 - ✓ Hereditary sensory radicular neuropathy
 - ✓ Angiokeratoma corporis diffusum (Fabry's)
 - ✓ Amyloid neuropathy

*We cover routine procedures for this condition when the patient is under the active care of an MD or a DO who documented the condition.

Investigational Devices

We may cover Category B devices if they:

- Are considered medically reasonable and necessary
- Meet all other Medicare coverage requirements

Services Related to & Required as a Result of Noncovered Services

We don't pay for medical and hospital services that relate to or result from noncovered services, such as:

- Cosmetic surgery
- Noncovered organ transplants
- Noncovered artificial organ implant
- Follow-up care or treatment related to complications during a hospital stay for a noncovered service

Exceptions

We may cover unrelated services when you hospitalize a patient for a noncovered service and the patient needs services unrelated to that noncovered service. For example, if a patient breaks a leg while hospitalized for a noncovered service, we may cover the services you provide to treat the broken leg because it's unrelated to the noncovered service.

We may cover reasonable and necessary medical or hospital services after you discharge a patient from a hospital stay for noncovered services when the patient needs services to treat a condition or complication that resulted from the noncovered services, such as:

- Repairing complications after cosmetic surgery
- Treating a noncovered surgical site infection

We don't pay for subsequent services that are normally incorporated into a global fee.

Services & Supplies Denied as Bundled or Included in Another Service's Basic Allowance

We don't pay for services and supplies denied as bundled or included in another service's basic allowance, such as:

- Fragmented services included in the initial service's basic allowance
- Indirect prolonged care
- Physician standby services
- Case management services, like patient phone calls
- Supplies included in the procedure's basic allowance

Items & Services Paid by Other Organizations or Provided Without Charge

Services Paid Under the Medicare Secondary Payer Program

We don't pay for items and services paid (or expected to be paid) by:

- Auto insurance
- No-fault insurance
- Liability insurance
- Workers' compensation (WC) or U.S. or state plan

Exceptions

We may pay if the primary payer denied the claim and issued documentation indicating it was denied in these situations:

- Group Health Plan denies service payment because:
 - The patient isn't covered by the health plan
 - The patient exhausted certain service plan benefits
 - The plan doesn't cover the services
 - A deductible applies
 - The patient isn't entitled to benefits
- Benefits exhausted, so no-fault or liability insurer denies payment
- WC plan denies payment, like when it isn't required to make payment
- Federal Black Lung Program doesn't pay the bill

In liability, no-fault, or WC situations, we may make conditional payments for covered services to prevent patient financial hardship when:

- Prompt claim payment isn't expected
- A properly submitted claim was denied in whole or in part
- The patient's physical or mental incapacity prohibits submitting a proper claim with the primary insurer

When we make a conditional payment, the insurer, patient, or both must pay us if the primary insurer makes any later payments.

Medicare Secondary Payer has more information on who pays first, second, and third.

Items & Services Authorized or Paid by a Government Entity

We normally don't pay for items and services that federal, state, or local government entities authorize or pay for, including:

- Services that government or non-government providers deliver at public expense when a federal agency, like the U.S. Department of Veterans Affairs (VA), authorizes them
- Services that federal providers or agencies deliver. We may pay federal hospitals (like other non-participating hospitals) for emergency inpatient and outpatient hospital services
- Services that federal, state, or local government entities directly or indirectly pay for or provide without expecting payment from any source and without considering the individual's ability to pay
- Services that non-government providers or suppliers deliver when either condition applies:
 - A government program other than Medicare pays the charges
 - The provider or supplier intends to get payment from another government program (unless that program's payment only covers Medicare deductible and coinsurance)

Items & Services the Patient, Another Individual, or an Organization Has No Legal Obligation to Pay for or Provide

We don't pay when the patient, another individual, or an organization has no legal obligation to pay for or provide the items or services, such as:

- X-rays or shots provided to a patient without regard to their ability to pay and without expecting payment from any source.
- A volunteer ambulance transport company. If an ambulance company asks for but doesn't require
 a donation from a patient to help offset the service cost, there's no legal obligation for the patient
 or any other individual to pay for the service.
- A device or item provided at no cost to the service provider.

We don't exclude payment when providers or suppliers provide items or services at no cost to patients who can't pay, as long as the providers bill their patients who can afford to pay.

Defective Equipment or Medical Devices Covered Under Warranty

We don't pay for defective medical equipment or medical devices under warranty if either of these apply:

- They're replaced at no cost by the warrantor
- The patient could get an acceptable replacement at no cost under the warranty, but they bought the replacement instead

When a hospital or other provider replaces defective equipment or medical devices under warranty, we may cover them when a replacement from another manufacturer is substituted because the warranty-offered replacement is unacceptable to the patient or their physician. We may make partial payments in situations where the warrantor supplied defective equipment or medical devices and they impose a charge or a pro rata payment.

We limit payment to the warranty amount the hospital or other provider would've paid if they could have purchased an acceptable replacement at a reduced price under a warranty, but either of these can apply instead:

- They paid full price to the original manufacturer
- A different manufacturer or other source purchased a new replacement

Advance Beneficiary Notices

You must issue an Advance Beneficiary Notice of Non-coverage (ABN) to a patient before providing items or services we usually cover but may not cover in specific situations (for example, if an item or service isn't medically necessary for the patient). The ABN helps patients decide whether to get an item or service and informs them about their financial liability. We may hold you financially liable if you're required to issue an ABN but you don't issue it to the patient.

You don't need to notify a patient before you provide items or services we never cover or aren't a Medicare benefit, but we recommend you issue a voluntary ABN or similar notice as a courtesy to inform the patient about their financial liability.

The Advance Beneficiary Notice of Non-coverage Tutorial shows you how to complete an ABN form, and Medicare Advance Written Notices of Non-coverage explains the ABN notice types, uses, and timing.
