Learn about these Medicare-certified Federally Qualified Health Center (FQHC) topics:

- FQHC background
- FQHC certification
- FQHC services
- FQHC visits
- FQHC payment
- FQHC cost reports
- Resources
- Lists of helpful websites and Regional Office Rural Health Coordinators

Note: The information in this publication does not necessarily apply to Grandfathered Tribal FQHCs.

FQHC BACKGROUND

The FQHC benefit under Medicare was added effective October 1, 1991, when Section 1861(aa) of the Social Security Act (the Act) was amended by Section 4161 of the Omnibus Budget Reconciliation Act of 1990. FQHCs are safety net providers that primarily provide services typically furnished in an outpatient clinic. FQHCs include community health centers, migrant health centers, health care for the homeless health centers, public housing primary care centers, and health center program “look-alikes.” They also include outpatient health programs or facilities operated by a tribe or tribal organization or by an urban Indian organization. FQHCs are paid based on the FQHC Prospective Payment System (PPS) for medically-necessary primary health services and qualified preventive health services furnished by an FQHC practitioner.

FQHC CERTIFICATION

To be certified as an FQHC, an entity must meet one of these requirements:

- Is receiving a grant under Section 330 of the Public Health Service (PHS) Act (42 United States Code Section 254a) or is receiving funding from such a grant and meets other requirements
- Is not receiving a grant under Section 330 of the PHS Act but is determined by the Secretary of the Department of Health & Human Services (HHS) to meet the requirements for receiving such a grant (qualifies as a “FQHC look-alike”) based on the recommendation of the Health Resources and Services Administration
- Was treated by the Secretary of HHS for purposes of Medicare Part B as a comprehensive Federally-funded health center as of January 1, 1990, or
• Is operating as an outpatient health program or facility of a tribe or tribal organization under the Indian Self-Determination Act or as an urban Indian organization receiving funds under Title V of the Indian Health Care Improvement Act as of October 1991

For certification as an FQHC, the entity must meet all of these requirements:

• Provides comprehensive services and carries out, or arranges for, an annual evaluation of its total program
• Meets other health and safety requirements and
• Is not concurrently approved as a Rural Health Clinic

FQHCs that receive a Section 330 grant or are determined to be an FQHC look-alike must meet all requirements contained in Section 330 of the PHS Act, including:

• Serve a designated medically-underserved area or medically-underserved population
• Offer a sliding fee scale to persons with incomes below 200 percent of the Federal poverty level and
• Be governed by a board of directors, of whom a majority of the members receive care at the FQHC

**FQHC SERVICES**

FQHC services include:

• Physician services
• Services and supplies “incident to” the services of physicians
• Nurse practitioner (NP), physician assistant (PA), certified nurse-midwife (CNM), clinical psychologist (CP), and clinical social worker (CSW) services
• Services and supplies “incident to” the services of NPs, PAs, CNMs, and CPs
• Medicare Part B-covered drugs furnished by and “incident to” services of an FQHC practitioner
• Visiting nurse services to the homebound in an area where CMS determined there is a shortage of home health agencies and
• Outpatient diabetes self-management training (DSMT) and medical nutrition therapy (MNT) for patients with diabetes or renal disease furnished by qualified practitioners of DSMT and MNT

**FQHC VISITS**

An FQHC visit is a medically-necessary face-to-face medical or mental health visit or a qualified preventive health visit between the patient and a physician, NP, PA, CNM, CP, or CSW during which time one or more qualified FQHC services are furnished. In certain limited situations, an FQHC visit may also include a visit by a registered professional nurse or a licensed practical nurse to a homebound patient.
FQHC visits may take place in any of these locations:

- The FQHC
- The patient’s residence (including an assisted living facility)
- A Medicare-covered Part A Skilled Nursing Facility or
- The scene of an accident

FQHC visits may not take place in either of these locations:

- An inpatient or outpatient hospital (including a Critical Access Hospital) or
- A facility that has specific requirements that preclude FQHC visits

**FQHC PAYMENT**

**Medicare FQHC PPS**

Section 10501(i)(3)(A) of the Affordable Care Act (Public Law 111-148 and 111-152) added Section 1834(o)(2) of the Act to establish the FQHC PPS for cost reporting periods beginning on or after October 1, 2014. FQHCs transitioned to the FQHC PPS between October 1, 2014, and December 31, 2015.

FQHCs must include an FQHC payment code on their claim for payment. They are paid 80 percent of the lesser of their charges based on the FQHC payment codes or the FQHC PPS rate (a national encounter-based rate with geographic and other adjustments). Beginning on January 1, 2017, the FQHC PPS base payment rate is updated annually using the FQHC market basket. For calendar year 2018, the market basket update under the FQHC PPS is 1.9 percent and the FQHC PPS base payment rate is $166.60.

**Per-Diem Payment and Exceptions**

Encounters with more than one FQHC practitioner on the same day, regardless of the length or complexity of the visit or multiple encounters with the same FQHC practitioner on the same day, constitute a single visit, except when the patient has either or both of these:

- An illness or injury requiring additional diagnosis or treatment subsequent to the first encounter (for example, the patient sees the practitioner in the morning for a medical condition and later in the day has a fall and returns to the FQHC)
- A qualified medical visit and a qualified mental health visit on the same day
Payment Adjustments

These adjustments apply to the FQHC PPS payment rate:

- FQHC Geographic Adjustment Factor
- New patient adjustment and
- Initial Preventive Physical Examination (IPPE) or Annual Wellness Visit (AWV) adjustment

Charges and Payment

FQHCs set their own charges for the services they provide and determine which services to include in the bundle of services associated with each FQHC G code. Charges must be uniform for all patients.

To find the specific FQHC payment codes to use when submitting claims under the PPS and a list of billable visits, visit the FQHC webpage.

Payment is for professional services only. Laboratory tests (excluding venipuncture) and the technical component of billable visits are paid separately. Procedures are included in the payment of an otherwise qualified visit and are not separately billable. If a procedure is associated with a qualified visit, include the charges for the procedure on the claim with the visit.

Coinsurance and Deductible

Coinsurance is 20 percent of the lesser of the FQHC’s charge for the specific payment code or the PPS rate, except for certain preventive services. Patient cost-sharing requirements for most Medicare-covered preventive services are waived, and Medicare pays 100 percent of the costs for these services. No coinsurance is required for the IPPE, AWV, and any covered preventive services recommended with a grade of A or B by the United States Preventive Services Task Force. For a complete list of preventive services and their coinsurance requirements, refer to the Federally Qualified Health Center (FQHC) Preventive Services Chart. There is no Part B deductible in FQHCs for FQHC-covered services.

Influenza and Pneumococcal Vaccine

Influenza and pneumococcal vaccines and their administration are paid at 100 percent of reasonable cost through the cost report. The cost is included in the cost report and no visit is billed. FQHCs must include these charges on the claim if they are furnished as part of an encounter. If the administration of the vaccine is the only service furnished on that day, no claim is filed. The beneficiary coinsurance is waived.

Hepatitis B Vaccine (HBV)

The HBV and its administration are included in the FQHC visit and are not separately billable. If a qualifying FQHC visit is furnished on the same day as the HBV, report the charges for the vaccine and related administration on a separate line item to ensure that coinsurance is not applied.
**Telehealth Services**

FQHCs are authorized to serve as an originating site for telehealth services if the FQHC is located in a qualifying area. An originating site is the location of an eligible Medicare patient at the time the service being furnished via a telecommunications system occurs. FQHCs that serve as an originating site for telehealth services are paid an originating site facility fee.

FQHCs are not authorized to serve as a distant site for telehealth consultations. A distant site is the location of the practitioner at the time the telehealth service is furnished. The cost of a visit may not be billed or included on the cost report.

**Care Management Services**

Effective January 1, 2018, FQHCs can receive payment for:

- Chronic Care Management (CCM) or general Behavioral Health Integration (BHI) services when 20 minutes or more of CCM or general BHI services are furnished and FQHCs bill HCPCS code G0511 either alone or with other payable services. For CCM services furnished on or before December 31, 2017, FQHCs bill using Current Procedural Terminology (CPT) code 99490 alone or with other payable services on an FQHC claim.

- Psychiatric Collaborative Care Model (CoCM) services when 70 minutes or more of initial psychiatric CoCM services or 60 minutes or more of subsequent psychiatric CoCM services are furnished and FQHCs bill HCPCS code G0512 either alone or with other payable services on an FQHC claim.

Coinsurance is applied and the FQHC face-to-face requirements are waived for these care management services.

**FQHC COST REPORTS**

FQHCs must file a cost report annually using Form CMS-224-14, Federally Qualified Health Center Cost Report. Graduate medical education, bad debt, and influenza and pneumococcal vaccines and their administration are paid through the cost report.

Provider-based FQHCs must complete the appropriate worksheet designated for FQHC services within the parent provider’s cost report.
