Upcoming Conference Calls

Information Sharing from HHS on H1N1

Date: September 14, 2009
Time: 1:30 -3:00 pm ET
Call: 1-800-837-1935; Conference ID: 2H1N1
You are invited to submit questions to: H1N1.listening@hhs.gov

Purpose of this information session is to update and inform the provider community about issues around H1N1 preparedness and response, vaccine availability, infection control, and other questions that have come in.

If you cannot participate on September 14, access the Encore feature 2 hours after completion of the call on September 14: please dial (800) 642-1687 and enter Conference ID 2H1N1. This access will expire March 14, 2010.

COCA Conference Call

Date: September 16, 2009
Time: 4:00 - 5:00pm ET
Call-In: Information to Come

Purpose of the call is to discuss pediatric issues related to the CDC Updated Interim Recommendations for the Use of Antiviral Medications in the Treatment and Prevention of Influenza for the 2009-2010 Season found at <http://www.cdc.gov/h1n1flu/recommendations.htm>.

At the end of the call, participants will be able to:

1. Describe the current H1N1 situation
2. Discuss interim recommendations for use of antiviral medications to treat and prevent influenza and how this recommendation impacts children.
3. Identify potential issues as well as suggestions for additional resources that may be of benefit to health

care providers.

Novel H1N1 & Seasonal Influenza

Novel H1N1 Flu Situation Update - CDC - Sep 11

<http://www.cdc.gov/h1n1flu/update.htm>

Novel H1N1 Influenza: Resources for Clinicians - CDC

This page is designed to give clinicians access to the latest guidelines and information on the evolving novel H1N1 influenza investigation.

<http://www.cdc.gov/h1n1flu/clinicians/>

WHO issues advice on measures in school settings - WHO - Sep 11

WHO is issuing advice on measures that can be undertaken in schools to reduce the impact of the H1N1 influenza pandemic.

http://www.who.int/csr/disease/swineflu/notes/h1n1_school_measures_20090911/en/index.html

Statement from Agriculture Secretary Vilsack Regarding Animal Health and 2009 Pandemic H1N1 Influenza - USDA - Sep 11

Swine influenza has been present in the United States for over 80 years, but the 2009 pandemic H1N1 influenza virus now circulating among humans is not the same as "swine flu".

Emergency Preparedness and Response

Four-Fifths of Businesses Foresee Severe Problems Maintaining Operations if Significant H1N1 Flu Outbreak - Harvard School of Public Health Press Release - Sep 09

In a national survey of businesses that looks at their preparations for a possible widespread H1N1 outbreak, Harvard School of Public Health (HSPH) researchers found that only one-third believe they could sustain their business without severe operational problems if half their workforce were absent for two weeks due to H1N1 (also known as "swine flu").

Vaccine

School located vaccination planning materials and templates - CDC - Sep 13

Documents designed to provide information for planning and conducting school-located 2009 H1N1 influenza vaccination clinics that target school-aged children enrolled in school and potentially other groups in the community. The targeted audience for these materials is primarily state and local public health department immunization and preparedness staff who are responsible for carrying out 2009 H1N1 influenza vaccination, but also education officials, school nurses, and others who are interested in planning and carrying out such activities.
