## Novel H1N1 Influenza

Information on the novel H1N1 influenza investigation is posted daily to the CDC website at <http://www.cdc.gov/h1n1flu>

### **Novel H1N1 Influenza: Resources for Clinicians - CDC - June 1**

This page is designed to give clinicians access to the latest guidelines and information on the evolving novel H1N1 influenza investigation.

<http://www.cdc.gov/h1n1flu/clinicians>

### **Recent Research Results: 2009 H1N1 Influenza Virus - USDA - May 26**

USDA's Agricultural Research Service researchers tested serum samples from pigs previously infected with U.S swine influenza viruses or vaccinated with commercial vaccines to determine if U.S commercial swine herds are susceptible to the new swine origin (S/O) H1N1 influenza virus. They found that there was limited cross reactivity against the new S/O H1N1 influenza virus.

## Clinical Resources

### **The Electronic Preventive Services Selector (ePSS) - AHRQ - May 26**

The ePSS application is designed to help primary care clinicians identify the screening, counseling, and preventive medication services that are appropriate for their patients. This Web-based and PDA-downloadable application, is continually expanding its mobile device support and is now available for download to the Apple iPhone.

## Seasonal Influenza

### **Seasonal Influenza Weekly Report: Influenza Summary Update - CDC - June 1**

During week 20 (May 17 - 23, 2009), influenza activity decreased in the United States, however there are still higher levels of influenza-like illness than is normal for this time of year.

## Travelers' Health

**Hand, foot, and mouth disease in Asia - CDC - May 29**

Since March 2009, a growing number of cases of hand, foot, and mouth disease (HFMD) have been reported in parts of Asia, including China, Hong Kong, Singapore, and Taiwan. HFMD is common among infants and children, and most of the recently reported cases have occurred in children.

**Outbreak Notice Update: Dengue, Tropical and Subtropical Regions - CDC - May 27**

Dengue infections are frequently reported from most tropical countries of the South Pacific, Asia, the Caribbean, the Americas, and Africa. See the Distribution of Dengue maps for areas where cases have been reported in previous years.
