COCA CALL TODAY!

Pediatric Health Issues Related to the Current Outbreak of Novel H1N1 Influenza

We will have an update on pediatric health issues that have been addressed since the beginning of the outbreak, followed by a section for questions and answers from participants on the call. We look forward to hearing your questions and concerns on pediatric health related to the current outbreak.

Date: May 11, 2009

Time: 4:00PM ET

Call in number: 800-369-1826

Participant Passcode: 5072327

Novel H1N1 Influenza Investigation

Information on the novel H1N1 influenza investigation is posted daily to the CDC website at <http://www.cdc.gov/h1n1flu>

CDC is reporting **2,600** laboratory confirmed human infections with novel H1N1 flu in **43** states and the District of Columbia (D.C.) in the United States. Three deaths in the U.S. have been confirmed from this outbreak to date. The third death occurred in the state of Washington in a 39-year old and was reported on Sunday, May 10, 2009.

Novel H1N1 Influenza: Resources for Clinicians - CDC - May 11

This page is designed to give clinicians access to the latest guidelines and information on the evolving novel H1N1 influenza investigation.

Detection of Novel Influenza A (H1N1) Virus by Laboratory Testing - FDA - May 6

Laboratorians should maintain awareness of unusual findings and report inaccurate testing results or other problems to the device manufacturer and/or FDA. Health care professionals and consumers may report serious adverse events, such as inaccurate results, or product quality problems with the use of influenza detection assays to the FDA's MedWatch Adverse Event Reporting program either online, by regular mail, fax or phone.

Travelers' Health

Travel Warning: Novel H1N1 Flu and Severe Cases of Respiratory Illness in Mexico - Avoid Nonessential Travel to Mexico - CDC - May 9

The Government of Mexico is continuing to report confirmed human cases of novel H1N1 flu in Mexico. For the most current case count and information, see the updates posted on the [World Health Organization \(WHO\) Influenza A \(H1N1\) website](#). Experts from WHO, the Global Alert and Response Network (GOARN), and the Centers for Disease Control and Prevention (CDC) are working with health authorities in Mexico to investigate the spread and severity of the novel H1N1 flu outbreak in Mexico.
