Find and Compare Hospitals

Welcome to Hospital Compare. In this tool you will find information on how well hospitals care for patients with certain [medical conditions or surgical procedures](#), and results from a survey of patients about the quality of care they received during a recent hospital stay. This information will help you compare the quality of care hospitals provide. Talk to your doctor about this information to help you, your family and your friends make your best hospital care decisions.

Hospital Compare was created through the efforts of the Centers for Medicare & Medicaid Services (CMS), the Department of Health and Human Services, and other members of the [Hospital Quality Alliance: Improving Care Through Information \(HQA\)](#). The information on this website comes from hospitals that have agreed to submit quality information for Hospital Compare to make public.

The Veterans Health Administration (VA) is now providing information about the quality of care given in VA Medical Centers. The Veterans Health Administration's (VA's) medical benefits package is available to Veterans (including Reservists and National Guard) who served on active duty and meet eligibility requirements. Other groups can also be eligible. For more information, visit www.va.gov/healtheligibility.

The screenshot shows the redesigned Hospital Compare home page. At the top is a blue header with the U.S. Department of Health & Human Services logo and 'HHS.gov'. Below the header is a navigation bar with green buttons for 'Medicare.gov', 'Manage Your Health', 'Medicare Basics', 'Resource Locator', and 'Help & Support'. The main content area is titled 'Hospital Compare Home' and features a large search box with the heading 'Where do you want to find a hospital?'. The search box includes a 'Search Information' section with a 'Location' field (containing '21244') and a 'Search Type' section with radio buttons for 'General', 'Condition', and 'Surgical Procedure'. A 'Find Hospitals' button is at the bottom of the search box. To the right of the search box is a 'Hospital Spotlight' section with a photo of healthcare workers. Below the search box is an 'Additional Info' section with links to contact information, the database, and an interactive database. A 'Back to Top' button is at the bottom left.

Choose a plan that meets your needs:

Original Medicare

This fee-for-service plan covers many health care services. You can go to any doctor or supplier that is enrolled and accepts Medicare and is accepting new Medicare patients, or to any hospital or other facility.

[Learn more](#)

Medicare Health Plans (like HMOs and PPOs)

These plans are approved by Medicare and run by private companies. When you join one of these plans, you are still in Medicare. Some of these plans require referrals to see specialists. They provide all of your Part A (hospital) and Part B (medical) coverage. They generally offer extra benefits, and many include prescription drug coverage. These plans often have networks, which means you may have to see doctors who belong to the plan or go to certain hospitals to get covered services. In many cases, your costs for services can be lower than in Original Medicare, but it is important to check with the plan because the costs for services will vary.

[Learn more](#)

Medicare Prescription Drug Plans

These plans add prescription drug coverage to Original Medicare, some Medicare Cost Plans, some Medicare Private Fee-for-Service Plans, and Medicare Medical Savings Account Plans.

[Learn more](#)

Medigap (Medicare Supplement Insurance) Policies

These policies help pay some of the health care costs that Original Medicare doesn't cover. If you are in Original Medicare, you could get a Medigap policy to help cover the extra health care costs.
