

Alternative Payment Models Panel

Brandy Alston

CMS, Center for Medicare

September 10, 2015

Objectives

At the end of this session, you should be able to

- Understand how some Medicare Advantage Organizations are collaborating with providers through alternative payment models to promote high-value care
- Understand experiences of two MAOs, including successes and challenges

Alternative Payment Models

Traditional Medicare

HHS Alternative Payment Model Goals

*<http://www.cms.gov/Newsroom/MediaReleaseDatabase/Fact-Sheets/2015-Fact-Sheets-Items/2015-01-26-3.html>

Medicare Advantage

- What does this mean for Medicare Advantage?
- What is happening in Medicare Advantage?

Panelists

Julie May, *Aetna*

Ghita Worcester, *UCare*

Alternative Payment Models Panel

Building a Healthier World

Aetna's mission to build a consumer-centric health care system that promotes high quality outcomes, health and wellness

1

PARTNER TO BUILD A VALUE-BASED PAYMENT MODEL that offers consumers more value for their healthcare dollar.

2

BUILD A CONSUMER-CENTRIC EXPERIENCE by making insurance products simpler and easier to use. Build a consumer-centric health and wellness model to meet individual needs via big data and creating a digital experience.

3

IMPROVE POPULATION HEALTH AT THE LOCAL LEVEL through sustainable, competitive pricing and a differentiated consumer experience. We expect to increase retention rates via high consumer engagement and improve our ability to manage member health and wellness.

Accelerating Transformation from Fee-for-Service to Value-Based Healthcare

The transaction-oriented model of the past will **transition to a local population health model**, focused on creating **value-based payment models** with providers and **engaging consumers** to improve their health and wellness.

Collaborate to
allocate care
management
and care
delivery
responsibilities

Fully utilize
multi-
disciplined
resources as
appropriate to
care for
patients

Utilize point
of care tools
to optimize
patient
visits

Regularly
exchange
patient
data

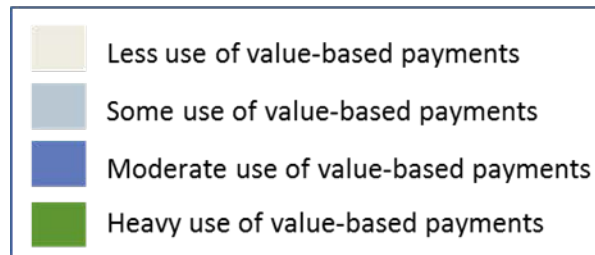

Act on
opportunities
to improve
care quality
and efficiency

How Value-Based Contracting Transforms Care

| Fee-For-Service | Value-Based Contracting |
|--|---|
| Volume-driven model with unaligned incentives between payers and providers: Providers increase volume of care to increase revenue | Aligned incentives between payers and providers through improved health outcomes and chronic condition management |
| Minimize Cost of Service | Better Value for Patients |
| Process Compliance | Quality Performance |
| Reduce Costs | Increase Value |
| Culture of Denial | Competition to be in network based on performance (cost and quality) |
| Acute, Singular Care Event | Center on medical conditions over the full cycle of care, episode of care payments |

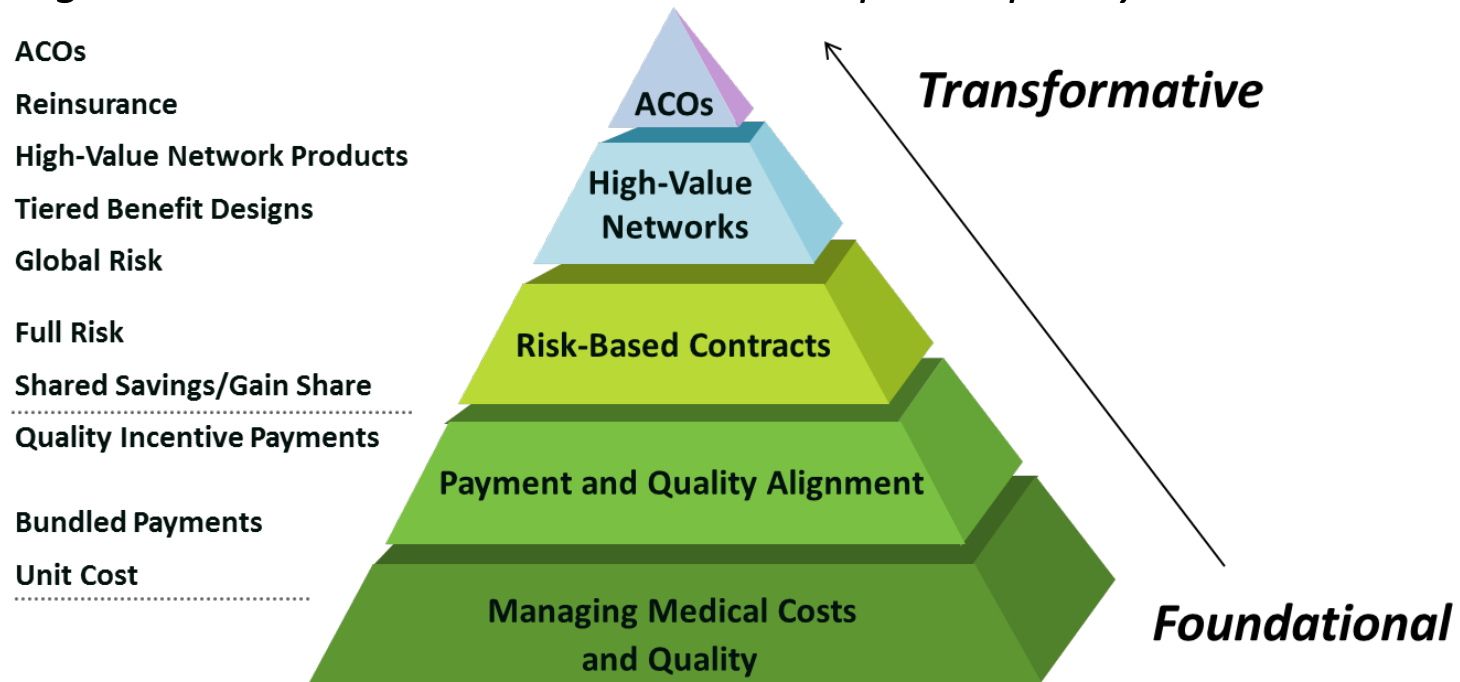

Balancing Access with Improved Quality and Cost

- The benefit strategies for Medicare beneficiaries are evolving
- Smaller, high-value networks with strong provider partnerships balanced against large networks with less integration

Medicare Value-Based Contracting

Increase value-based reimbursement with providers by aligning incentives and enabling them to lower medical costs and improve quality

Categories of Assessment

- Ensuring providers are ready for the VBC accountability

**Geographic
Opportunity**

**Operational
Efficiency**

**Physician
Alignment**

**Care
Transformation**

**Patient
Engagement**

**Financial
Stability**

Challenges and Successes

Challenges

- Ensuring providers are ready for certain VBC activity
- Meeting accessibility standards for geographies with limited providers/systems
- Implementing a new way of thinking – conversation from volume driven fee-for-service to value-driven
- Integrating disparate systems and levels of practice
- For some providers, fundamentally changing to align incentives differently
- The time it takes to implement and see results
- Engaging differently from a clinical perspective

Successes

- Provider assessments create a roadmap for movement along the contracting value chain
- Providers that embrace accountability improve medical record documentation and risk score accuracy
- Star quality metrics improved when compared to straight FFS contracts
- Focus on improved health outcomes drives more value and cost efficiency
- More opportunities are created to collaborate, integrate, and coordinate care delivery

UCare: Value-Based Purchasing

Ghita Worcester

UCare

September 10, 2015

Social System of Care Coordination

UCare's Value-Based Contracting

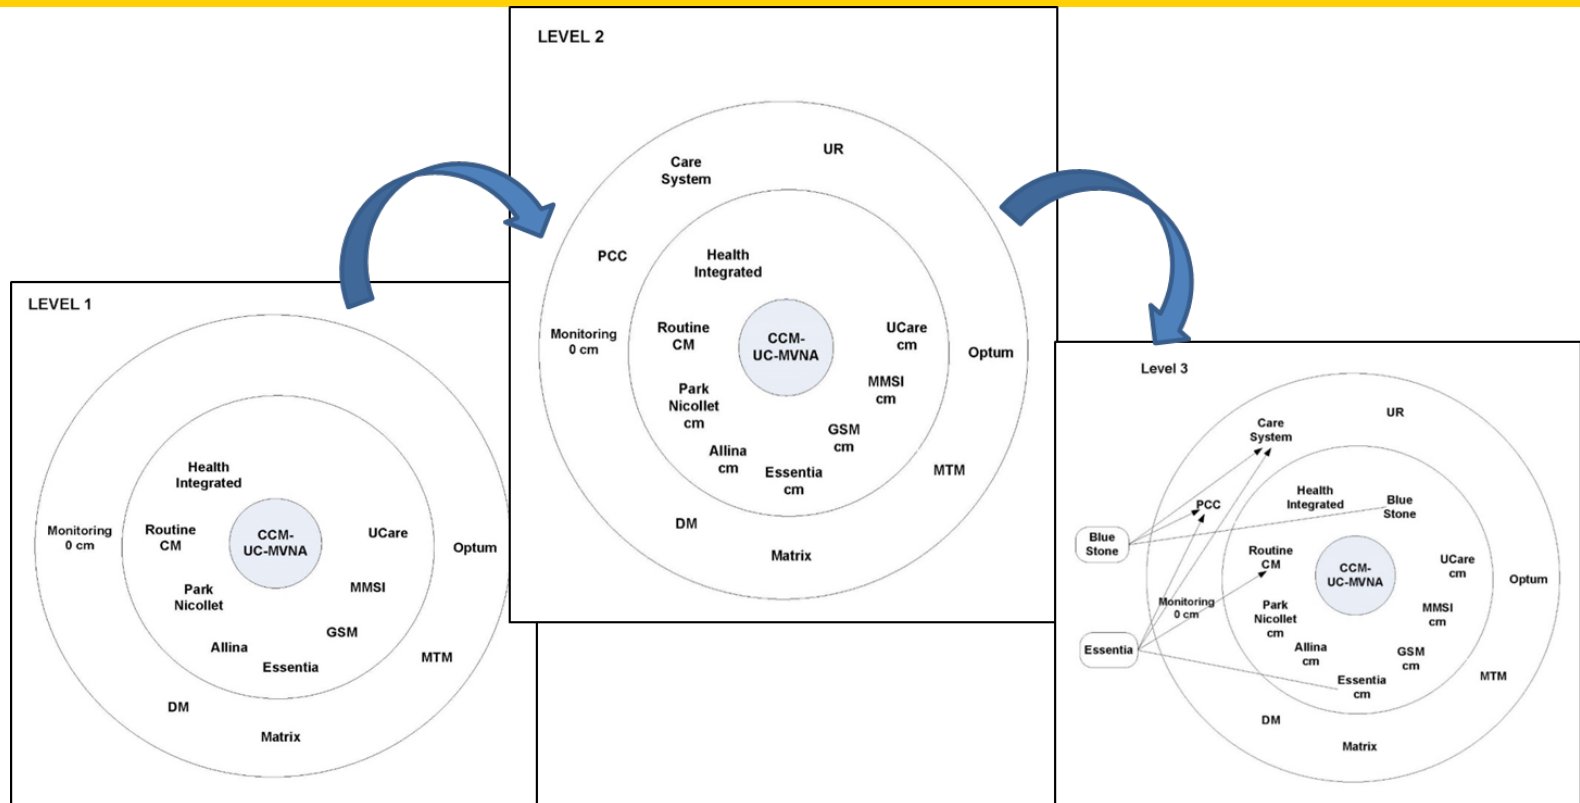

Methods

- Cost of Care contracts
- Pay for Performance
- Shared improvement
- New provider/plan model

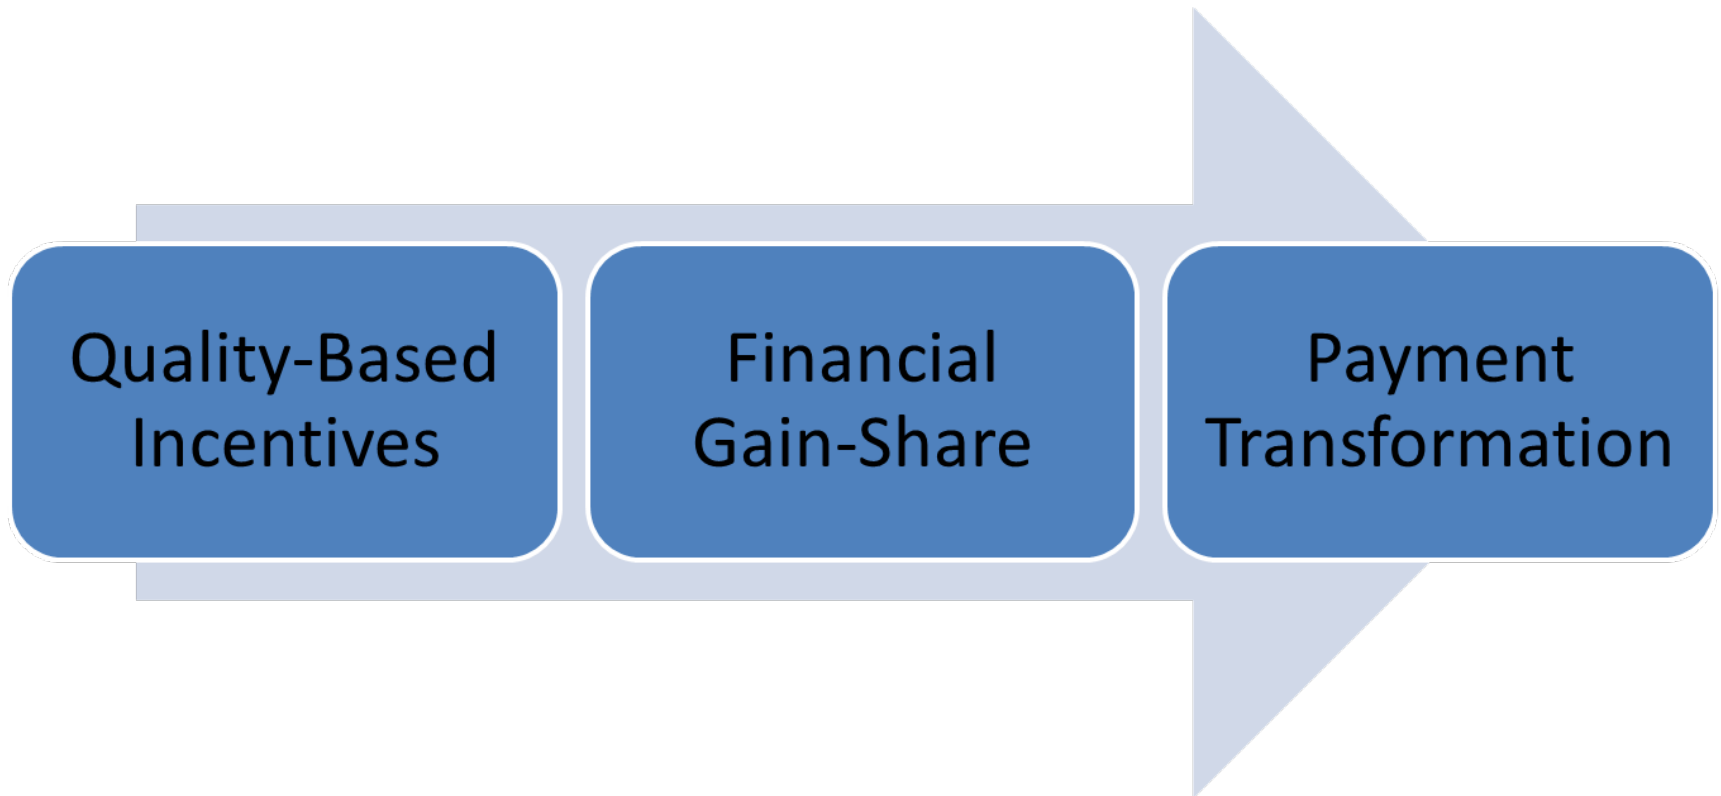

Provider selection and involvement

- Patient volume and current experiences
- Data analytics and metrics
- High-quality health care delivery

Complex Social, Economic & Medical Environment

Payment Model Overview

Payment Model Continuum

Simple Structures

Contractual Relationship (Lite)

- Example:
- ACO pilot
 - HCDS partnership
 - Joint data analytics initiative

Contractual Relationship (Robust)

- Example:
- New global budget/capitation arrangement for Medicare
 - Specific, limited network products
 - Gain sharing approach

Joint Venture

- Example:
- New jointly-owned entity
 - Joint care coordination business
 - Unified targeted services organization

Integrated Relationships

Shared Governance Model

- No corporate membership
- Shared control via board positions
- Limited operational integration

Affiliation (Lite)

- Sole member
- Limited reserved powers
- Limited operational integration

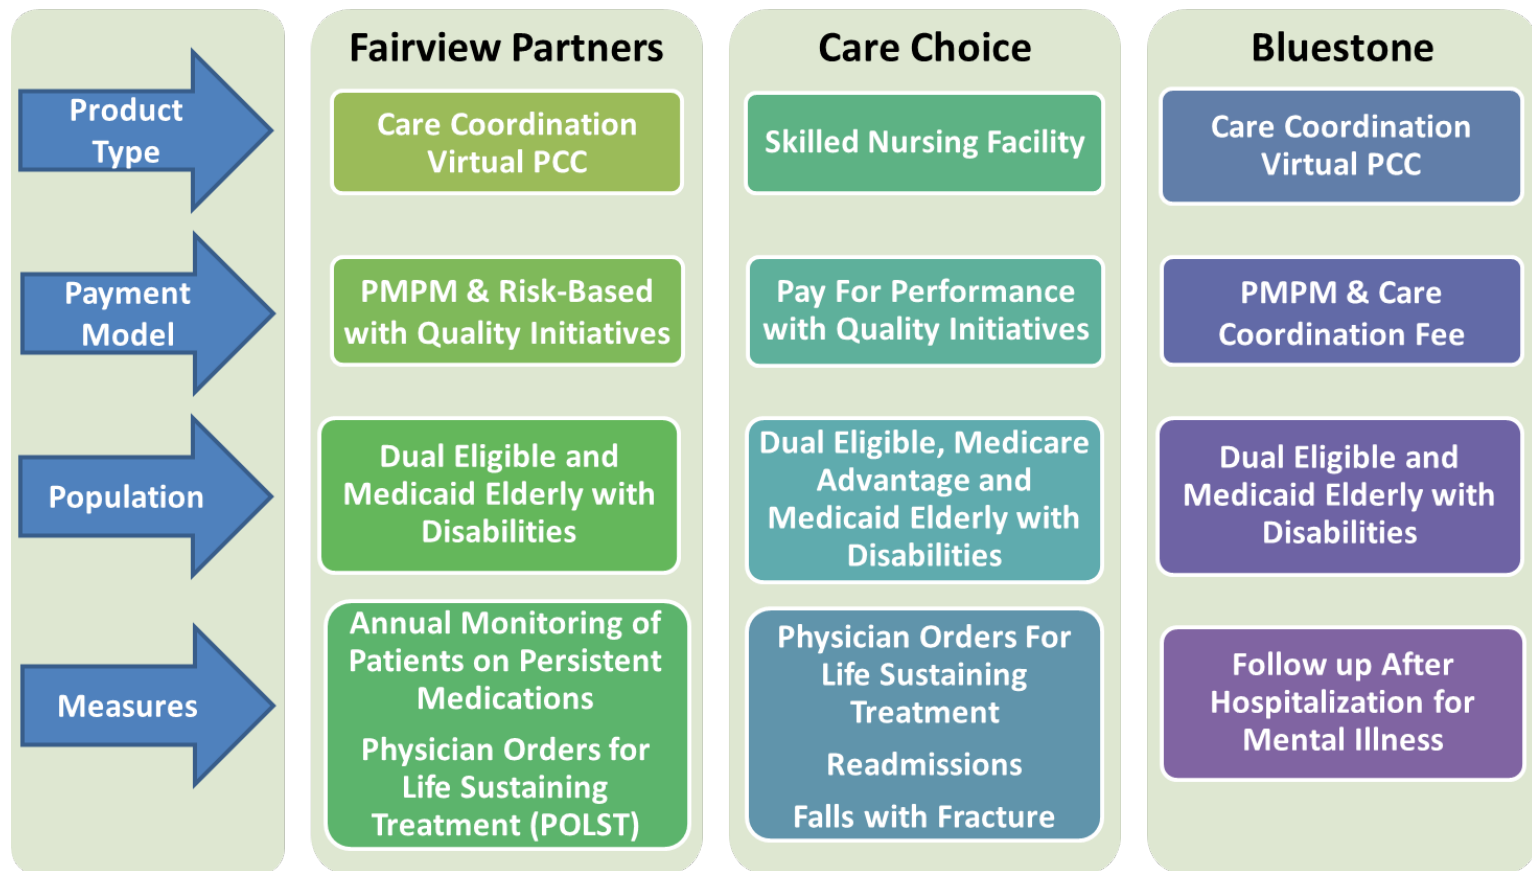

Affiliation (Robust)

- Sole member
- Robust reserved powers
- Robust operational integration

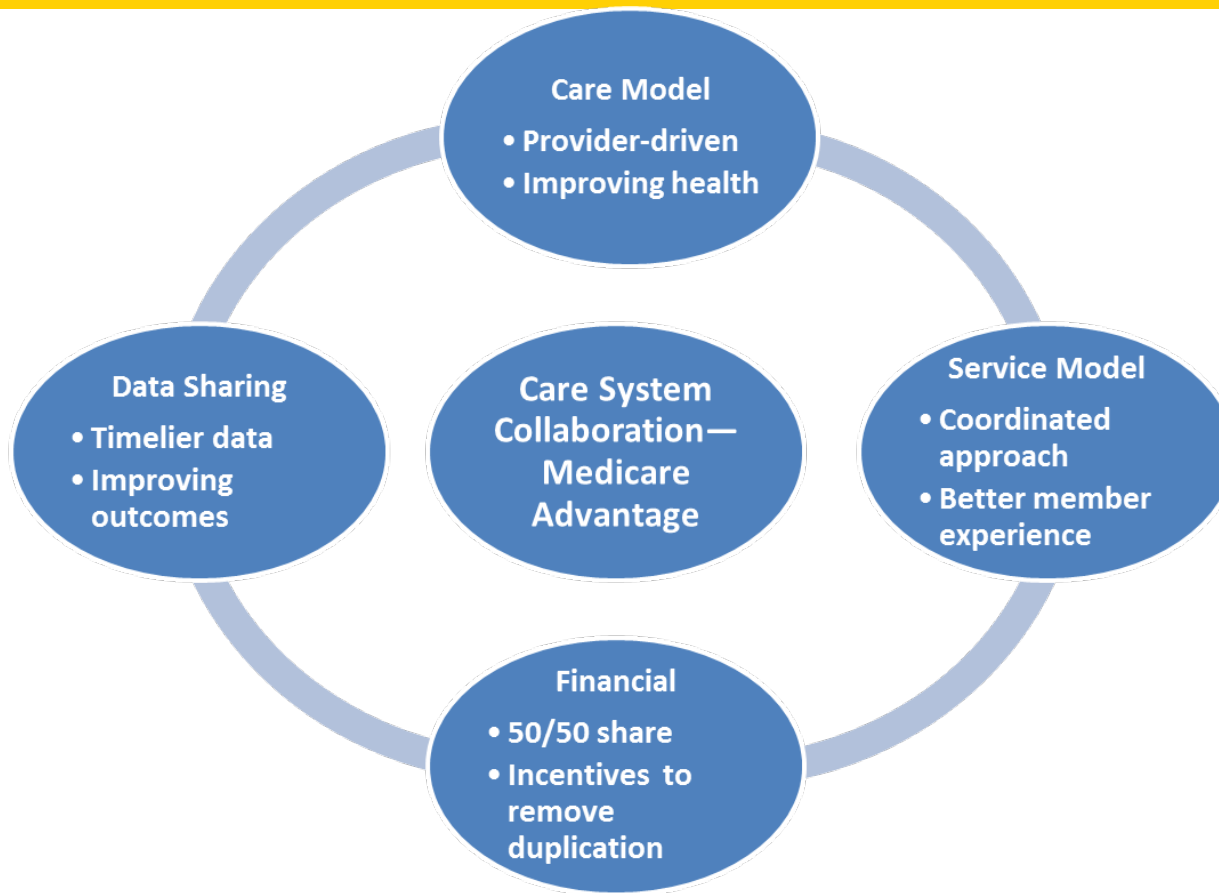

Full Merger

- One entity merges into the other

Innovative Care & Payment Models

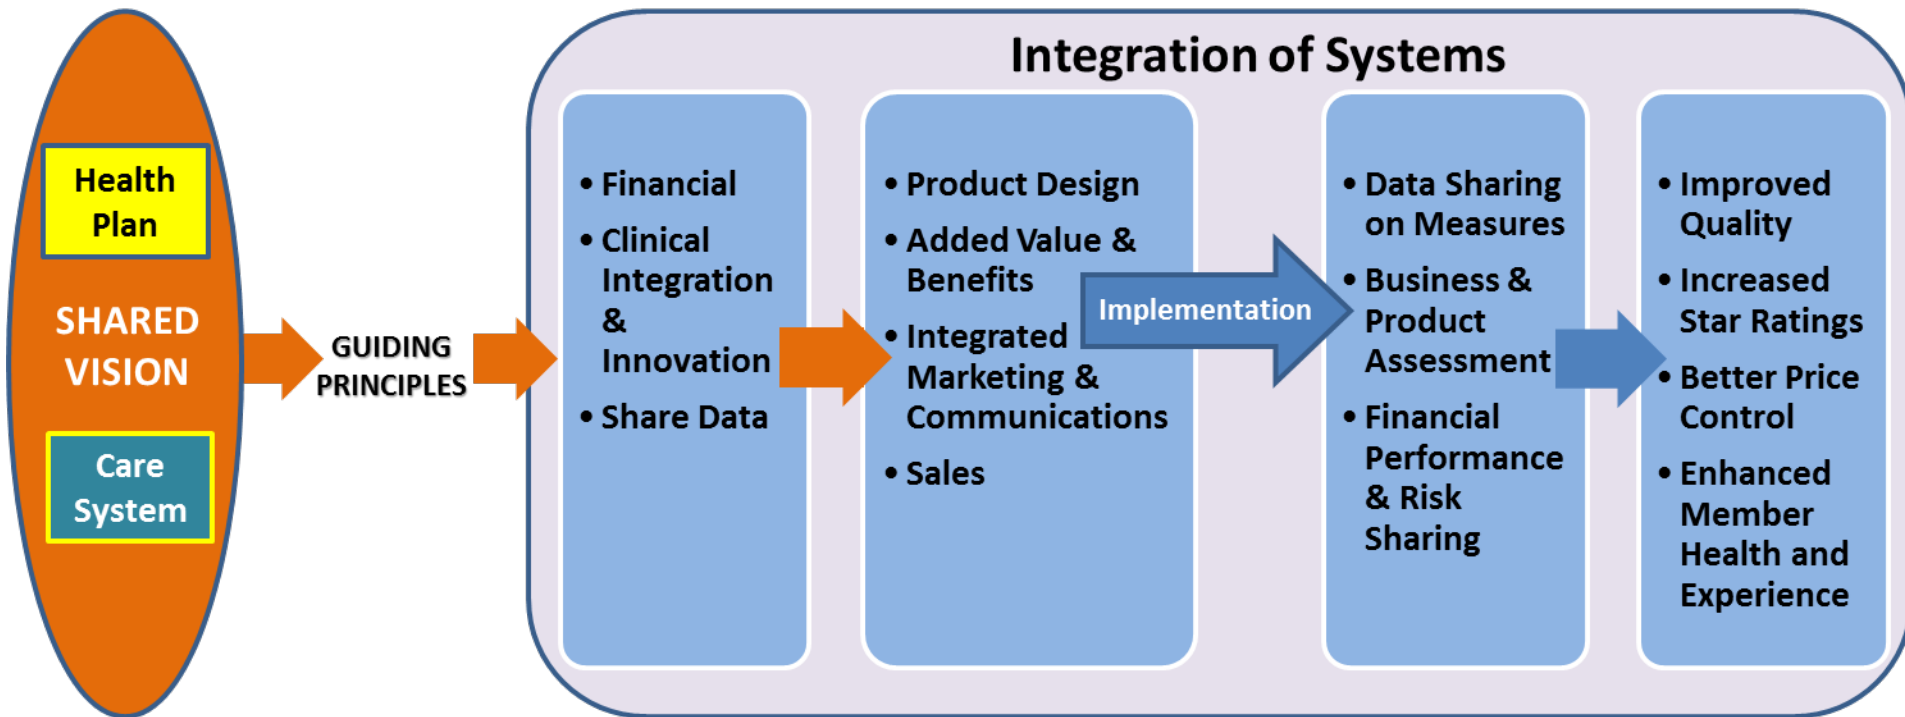

Care System Transformation

Guiding Principles

- Member experience that differentiates and drives loyalty
- Meet network adequacy requirements for service area
- Incentives for members to stay within the network
 - Requiring authorizations
 - Higher cost-sharing for going out-of-network
- Avoid duplication of administrative functions
- Leverage brand recognition of each organization
- High-performing network
- Shared risk and rewards

Collaborative Partnership Development & Transformation
