1. Introduction

Title II of the Health Insurance Portability and Accountability Act (HIPAA), known as the Administrative Simplification provisions, requires national standards for electronic healthcare transactions and national identifiers for providers and employers.

The standards improve the efficiency and effectiveness of the nation's healthcare system by encouraging widespread use of electronic data interchange (EDI) in the U.S. healthcare system.

Section 1104 of the ACA requires implementing transaction operating rules and additional standards. It also requires periodic compliance reviews.

The Administrative Simplification Enforcement and Testing Tool (ASETT) supports the Administrative Simplification and the ACA by providing complainants a way to file complaints, check the status and update their complaints (including electronic submission of supporting documents), and test healthcare transactions for compliance with HIPAA/ACA standards and Operating Rules. The tool also allows the staff of the Centers for Medicare and Medicaid Services (CMS), on behalf of the Department of Health and Human Services (HHS), to manage the overall complaint process, add information about a complaint, review and upload documents, test transactions, and generate reports to track activities and complaint status.

1.1 Purpose

This manual contains procedures for ASETT users (registrants, site users, administrators, and filed-against entities) to use all the ASETT functions and features.
2. Overview

The ASETT application is available for industry users (health plans, healthcare clearinghouses, providers, and their business partners or associates) to obtain information about the Administrative Simplification provisions, to file a complaint for a potential violation of those provisions, and for the National Standards Group (NSG) to monitor and enforce those provisions.

2.1 Business Processes

The ASETT application is comprised of the following business processes:

<table>
<thead>
<tr>
<th>Business Process</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complainant Registration</td>
<td>Prospective complainants can create user credentials for ASETT</td>
</tr>
<tr>
<td>Complaint Filing</td>
<td>Complainants can submit an electronic complaint and provide support for that complaint</td>
</tr>
<tr>
<td>Complaint Management</td>
<td>Registered users can check the status of a complaint or upload support documents. The complainant must have filed their complaint in the ASETT tool</td>
</tr>
<tr>
<td>Transaction Testing</td>
<td>Registered users can test a healthcare transaction for Administrative Standards compliance, with or without filing a complaint</td>
</tr>
<tr>
<td>Complaint Response</td>
<td>The Filed-Against Entity (FAE) can accept or dispute allegations, upload response documents, and certify a corrective action plan is complete, via a web portal</td>
</tr>
</tbody>
</table>

ASETT is available 24 hours a day, seven (7) days a week, except for downtime for system maintenance.

2.2 Conventions

This User Manual provides screen images and corresponding descriptions for how to use the system. The manual follows the flow of ASETT screens. The manual begins with an overview and navigation of the ASETT Website Home Page, then moves to overviews of the ASETT Complaint filing and response tools.

Several of the screen images of the system are modified to fit into this user manual. The modifications provide a reasonable facsimile of the pages seen in your web browser.

Page names, field names, action buttons, and important information is displayed in Bold text.

As an instructional guide, this User Manual employs command syntax conventions adhering to the Microsoft Manual of Style for Technical Publications.
2.3 Cautions and Warnings

ASETT has one warning message, which is displayed before allowing access to the system, a warning about the penalties for unauthorized use.
