Streamline Your Paperwork

Administrative Simplification for Health Care Providers

Use Technology

Take advantage of technology. Use electronic transactions for:

Billing | Payment | Eligibility | Benefits Verification | Claims Status

That's Administrative Simplification.

Save Time and Money

Benefits

Using electronic transactions simplifies many burdensome administrative functions.

Save time with less paperwork- Reduce routine manual processes. Decrease the need for phone calls, faxes, and traditional mail.

Speed payments via electronic funds transfer- Receive payment faster for billed services. Automatically post payments to your accounts receivable.

Use patient data to improve care and service- Accurate and timely exchange of information for and about the patient.

Administrative Simplification Covers Everyone

Everyone who is a HIPAA covered entity and conducts electronic health care transactions must use the adopted standards and operating rules. This includes health plans, clearinghouses, and providers or their representatives – not just those who work with Medicare or Medicaid.

Get the Most Out of Administrative Simplification

✔ Learn about requirements for health plans, clearinghouses, and providers

✔ Review current manual processes

✔ Discuss electronic transactions with your vendors

✔ File a complaint with CMS if necessary at https://htct.hhs.gov/asett/public/banner.act
