## 2 Summary of Quarterly Release Modifications

The modifications of the IOCE for the **October 2018 V19.3** release are summarized in the table below. Readers should also read through the entire document and note the highlighted sections, which also indicate changes from the prior release of the software. Some IOCE modifications in the update may be retroactively added to prior releases. If so, the retroactive date appears in the 'Effective Date' column.

#	Type	Effective Date	Edits Affected	Modification
1	Logic	10/1/2018	<a href="#">24</a>	Modify the software to maintain 28 prior quarters (7 years) of programs in each release. Remove older versions with each release. The earliest date included for this release is 1/1/2012.
2	Logic	10/1/2018	<a href="#">1, 2, 3, 5, 86</a>	Updated diagnosis code editing for validity, age, gender and manifestation based on the FY 2019 ICD-10-CM code revisions to the Medicare Code Editor (MCE).
3	Logic	10/1/2018	<a href="#">29</a>	Updated the mental health diagnosis list based on the FY 2019 ICD-10-CM code revisions.
4	Logic	<b>4/1/2018</b>	<a href="#">106, 107, 108</a>	Update Critical Care exception under <a href="#">Add-on Code Editing</a> to only be applicable to bill type 85x submitting professional services with revenue codes 96x, 97x, and 98x.
5	Logic	<b>4/1/2018</b>	<a href="#">107</a>	Update the logic for <a href="#">Add-on Code Edit 107</a> to be applied only for claims with bill type 85x (CAH) and only for professional services reported with revenue codes 96x, 97x and 98x. See also the <a href="#">Edits Applied by Bill Type</a> tables.
5	Logic	<b>4/1/2018</b>	<a href="#">106, 107, 108</a>	Update logic for <a href="#">Add-on Code Editing</a> to implement the edit processing at the claim level rather than line level (LIDOS). Exception: Claims with 85x bill type reporting professional services with revenue codes 96x, 97x, and 98x continue to process add-on edits at the day level (LIDOS).
6	Logic	<b>1/1/2012</b>	<a href="#">20, 40</a>	Update logic for <a href="#">NCCI Editing</a> to not apply edits 20 or 40 across professional revenue codes (96x, 97x, or 98x) and facility revenue codes submitted on an 85x bill type for CAH. (Note: This change will be made retroactively to both edits inception)

8	Documentation	10/1/2018		Update <a href="#">Partial Hospitalization</a> section to note that PHP/DMH processing logic does not occur if there is an inpatient only procedure on the same claim. This is already existing logic within the component that just needed to be documented within its respective processing section.

## DEFINITIONS

- A blank in a field indicates 'no change'
- The "old" column describes the attribute prior to the change being made in the current update, which is indicated in the "new" column. If the effective date of the change is the same as the effective date of the new update, 'old' describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then 'old' describes the attribute for the same date in the previous release of the software.
- "Unassigned", "Pre-defined" or "Placeholder" in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the "new description" column, with the appropriate effective date.
- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.
- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.
- For codes with SI of "Q1, Q2, and Q3", the APC assignment is the standard APC to which the code would be assigned if it is paid separately.
