Medicare Coverage Issues Manual

Department of Health and Human Services (DHHS) HEALTH CARE FINANCING ADMINISTRATION (HCFA)

Transmittal 141

Date: JUNE 15, 2001

CHANGE REQUEST 1455

HEADER SECTION NUMBERS	PAGES TO INSERT	PAGES TO DELETE
Table of Contents	2	2
80-1 – 80-2	2	2

NEW/REVISED MATERIAL--EFFECTIVE DATE: February 27, 2001 IMPLEMENTATION DATE: July 16, 2001

<u>Section 80-2</u>, <u>Diabetes Outpatient Self-Management Training</u>, is revised to delete the old section of policy that has been superceded by 42 CFR 410.140 – 410.146 and replace with a cross-reference.

DISCLAIMER: The revision date and transmittal number only apply to the redlined material. All other material was previously published in the manual and is only being reprinted.

These instructions should be implemented within your current operating budget.

70 BRACES - TRUSSES - ARTIFICIAL LIMBS AND EYES

70-1 CORSET USED AS HERNIA SUPPORT

A hernia support (whether in the form of a corset or truss) which meets the definition of a brace is covered under Part B under \$1861(s)(9) of the Act.

See Intermediary Manual, §3110.5; Medicare Carriers Manual, §2133; and Hospital Manual, §228.5.

70-2 SYKES HERNIA CONTROL

Based on professional advice, it has been determined that the sykes hernia control (a spring-type, U-shaped, strapless truss) is not functionally more beneficial than a conventional truss. Make program reimbursement for this device only when an ordinary truss would be covered. (Like all trusses, it is only of benefit when dealing with a reducible hernia). Thus, when a charge for this item is substantially in excess of that which would be reasonable for a conventional truss used for the same condition, base reimbursement on the reasonable charges for the conventional truss.

See Intermediary Manual, §3110.5; Medicare Carriers Manual, §2133; and Hospital Manual, §228.5.

70-3 PROSTHETIC SHOE

A prosthetic shoe (a device used when all or a substantial portion of the front part of the foot is missing) can be covered as a terminal device; i.e., a structural supplement replacing a totally or substantially absent hand or foot. The coverage of artificial arms and legs includes payment for terminal devices such as hands or hooks even though the patient may not require an artificial limb. The function of the prosthetic shoe is quite distinct from that of excluded orthopedic shoe and supportive foot devices which are used by individuals whose feet, although impaired, are essentially intact. (Section 1862(a)(8) of the Act excludes payment for orthopedic shoes or other supportive devices for the feet.)

See Intermediary Manual, §3110.5; Medicare Carriers Manual, §2133; and Hospital Manual, §228.5.

80 PATIENT EDUCATION PROGRAMS

80-1 INSTITUTIONAL AND HOME CARE PATIENT EDUCATION PROGRAMS

While the Act does not specifically identify patient education programs as covered services, reimbursement may be made under Medicare for such programs furnished by providers of services (i.e., hospitals, SNFs, HHAs, and OPT providers) to the extent that the programs are appropriate, integral parts in the rendition of covered services which are reasonable and necessary for the treatment of the individual's illness or injury. For example, educational activities carried out by nurses such as teaching patients to give themselves injections, follow prescribed diets, administer colostomy care, administer medical gases, and carry out other inpatient care activities may be reimbursable as a part of covered routine nursing care. Also, the teaching by an occupational therapist of compensatory techniques to improve a patient's level of independence in the activities of daily living may be reimbursed as a part of covered occupational therapy. Similarly, the instruction of a patient in the carrying out of a maintenance program designed for him/her by a physical therapist may be reimbursed as part of covered physical therapy.

However, when the educational activities are not closely related to the care and treatment of the patient, such as programs directed toward instructing patients or the public generally in preventive health care activities, reimbursement cannot be made since the Act limits Medicare payment to covered care which is reasonable and necessary for the treatment of an illness or injury. For example, programs designed to prevent illness by instructing the general public in the importance of good nutritional habits, exercise regimens, and good hygiene are not reimbursable under Medicare.

80-2 DIABETES OUTPATIENT SELF-MANAGEMENT TRAINING

Please refer to 42 CFR 410.140 – 410.146 for conditions that must be met for Medicare coverage.
