SUBJECT: January 2013 Integrated Outpatient Code Editor (I/OCE) Specifications Version 14.0

EFFECTIVE DATE: January 1, 2013

I. GENERAL INFORMATION

A. Background: This instruction informs the Fiscal Intermediaries (FIs), A/B MACs, RHHs and the Fiscal Intermediary Shared System (FISS) that the I/OCE was updated for January 1, 2013. The I/OCE routes all institutional outpatient claims (which includes non-OPPS hospital claims) through a single integrated OCE which eliminates the need to update, install, and maintain two separate OCE software packages on a quarterly basis.

B. Policy: This notification provides the Integrated OCE instructions and specifications for the Integrated OCE that will be utilized under the OPPS and Non-OPPS for hospital outpatient departments, community mental health centers, all non-OPPS providers, and for limited services when provided in a home health agency not under the Home Health Prospective Payment System or to a hospice patient for the treatment of a non-terminal illness. The I/OCE specifications will be posted to the CMS Website and can be found at <http://www.cms.gov/OutpatientCodeEdit/>.

Some IOCE modifications in the update may also be retroactively added to prior releases. If so, the retroactive date will appear in the 'Effective Date' column.

#	Type	Effective Date	Edits Affected	Modification
1.	Logic	1/1/13	24	Modify the software to maintain 28 prior quarters (7 years) of programs in each release. Remove older versions with each release. (The earliest version date included in this January 2013 release will be 4/1/06.
2.	Logic	1/1/13		Modify the criteria for assignment of the electrophysiology/ablation composite APC (appK): *Assign the composite APC 8000 if there is a single code present from group C, or if there is one code from group A and one code from group B. *If multiple codes from group C are present, assign the APC to the code with the lowest numerical value and assign SI of N to additional group C codes on the same day. *If the criteria for APC assignment are met from group C as well as groups A&B, assign the APC to the group C code and assign the SI of N to the codes from groups A&B. * Terminated group C codes (with modifier 52 or 73) will be assigned to the composite APC and have the terminated procedure discount applied.
3	Logic	1/1/13	84	Apply edit 84 (claim lacks required primary code) to PHP claims if new psychiatric add-on codes are submitted without a code for the primary service on the same day.
4.	Logic	1/1/13		Modify the PHP logic to ignore the psychiatric add-on codes in the count of the number of services (3 or 4) required to assign the PHP APCs.

DEFINITIONS

- A blank in a field indicates ‘no change’
- The “old” column describes the attribute prior to the change being made in the current update, which is indicated in the “new” column. If the effective date of the change is the same as the effective date of the new update, ‘old’ describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then ‘old’ describes the attribute for the same date in the previous release of the software.
- “Unassigned”, “Pre-defined” or “Placeholder” in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the “new description” column, with the appropriate effective date.
- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.
- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.
- For codes with SI of “Q1, Q2, and Q3”, the APC assignment is the standard APC to which the code would be assigned if it is paid separately.
