I. GENERAL INFORMATION

A. Background: The Department of Health and Human Services (HHS) adopted the Phase III Council for Affordable Quality Healthcare (CAQH) Committee on Operating Rules for Information Exchange (CORE) EFT & ERA Operating Rule Set that must be implemented by January 1, 2014 under Patient Protection and Affordable Care Act (ACA) of 2010. Health Insurance Portability and Accountability Act (HIPAA) amended the Act by adding Part C—Administrative Simplification—to Title XI of the Social Security Act, requiring the Secretary of HHS (the Secretary) to adopt standards for certain transactions to enable health information to be exchanged more efficiently and to achieve greater uniformity in the transmission of health information. More recently, the National Committee on Vital and Health Statistics (NCVHS) reported to the Congress that the transition to Electronic Data Interchange (EDI) from paper has been slow and disappointing. Through the ACA, Congress sought to promote implementation of electronic transactions and achieve cost reduction and efficiency improvements by creating more uniformity in the implementation of standard transactions. This was done by mandating the adoption of a set of operating rules for each of the HIPAA transactions. The ACA defines operating rules and specifies the role of operating rules in relation to the standards.

This CR deals with the regular update in CAQH CORE defined code combinations per Operating Rule 360 - Uniform Use of Claim Adjustment Reason Codes and Remittance Advice Remark Codes (835) Rule.

CAQH CORE will publish the next version of the Code Combination List on or about February 1, 2016. This update is based on the Claim Adjustment Reason Code (CARC) and Remittance Advice Remark Code (RARC) updates as posted at the WPC website on or about November 1, 2015.

Please go to <http://www.wpc-edi.com/reference> for CARC and RARC updates and <http://www.caqh.org/CORECodeCombinations.php> for CAQH CORE defined code combination updates.

Note: Per ACA mandate all health plans including Medicare must comply with CORE 360 Uniform Use of CARCs and RARCs (835) rule or CORE developed maximum set of CARC/RARC/Group Code for a minimum set of 4 Business Scenarios. Medicare can use any code combination if the business scenario is not one of the 4 CORE defined business scenarios but for the 4 CORE defined business scenarios, Medicare must use the code combinations from the lists published by CAQH CORE.

B. Policy: Medicare implements HIPAA transactions and related Operating Rules to be compliant.
