## I. GENERAL INFORMATION

**A. Background:** The Clinical Laboratory Improvement Amendments of 1988 (CLIA) regulations require a facility to be appropriately certified for each test performed. To ensure that Medicare & Medicaid only pay for laboratory tests categorized as waived complexity under CLIA in facilities with a CLIA certificate of waiver, laboratory claims are currently edited at the CLIA certificate level.

Listed below are the latest tests approved by the Food and Drug Administration (FDA) as waived tests under CLIA. The Current Procedural Terminology (CPT) codes for the following new tests must have the modifier QW to be recognized as a waived test. However, the tests mentioned on the first page of the attached list (i.e., CPT codes: 81002, 81025, 82270, 82272, 82962, 83026, 84830, 85013, and 85651) do not require a QW modifier to be recognized as a waived test.

The CPT code, effective date and description for the latest tests approved by the FDA as waived tests under CLIA are the following:

- G0434QW [from August 21, 2015 to December 31, 2015] and G0477QW [on and after January 1, 2016], Healgen Scientific LLC, Healgen Multi-Drug Urine Test Dip Card;

The new waived complexity code 87338QW [Qualitative or semiquantitative detection test for helicobacter pylori in stool, multiple-step method] was assigned for the detection of Helicobacter pylori antigens in stool performed using the Meridian Bioscience Immunocard STAT! HpSA (Stool) test.

This Recurring Update Notification applies to Chapter 16, section 70.8 of the IOM.

**B. Policy:** The CLIA regulations require a facility to be appropriately certified for each test performed. To ensure that Medicare and Medicaid only pay for laboratory tests categorized as waived complexity under CLIA in facilities with a CLIA certificate of waiver, laboratory claims are currently edited at the CLIA certificate level.
