DEFINITIONS

- A blank in a field indicates ‘no change’
- The “old” column describes the attribute prior to the change being made in the current update, which is indicated in the “new” column. If the effective date of the change is the same as the effective date of the new update, ‘old’ describes the attribute up to the last day of the previous quarter. If the effective date is retroactive, then ‘old’ describes the attribute for the same date in the previous release of the software.
- “Unassigned”, “Pre-defined” or “Placeholder” in APC or HCPCS descriptions indicates that the APC or HCPCS code is inactive. When the APC or HCPCS code is activated, it becomes valid for use in the OCE, and a new description appears in the “new description” column, with the appropriate effective date.
- Activation Date (ActivDate) indicates the mid-quarter date of FDA approval for a drug, or the mid-quarter date of a new or changed code resulting from a National Coverage Determination (NCD). The Activation Date is the date the code becomes valid for use in the OCE. If the Activation Date is blank, then the effective date takes precedence.
- Termination Date (TermDate) indicates the mid-quarter date when a code or change becomes inactive. A code is not valid for use in the OCE after its termination date.
- For codes with SI of “Q1, Q2, and Q3”, the APC assignment is the standard APC to which the code would be assigned if it is paid separately.

Summary of Quarterly Release Modifications

The modifications of the IOCE for the **January 2017 V18.0** release are summarized in the table below. Readers should also read through the entire document and note the highlighted sections, which also indicate changes from the prior release of the software. Some IOCE modifications in the update may be retroactively added to prior releases. If so, the retroactive date appears in the 'Effective Date' column.

#	Type	Effective Date	Edits Affected	Modification
1	Logic	1/1/2017	24	Modify the software to maintain 28 prior quarters (7 years) of programs in each release. Remove older versions with each release. The earliest date included for this release is 4/1/2010.
2	Logic	1/1/2017		Implement new program logic for CMHC outlier limitation (see OPPS processing logic and Appendix E). Apply new Payment Method Flag 6 to all OPPS payable lines if condition code 66 is present for claims with bill type 76x.
3	Logic	1/1/2017		Implement new program logic to include Negative Pressure Wound Therapy (NPWT) procedure codes 97607 and 97608 to the list of codes reportable for Home Health claims with bill type 34x that are payable under OPPS (see OPPS special processing logic and Appendix F-(a)).
4	Logic	8/1/2016	67	Implement mid-quarter FDA approval edit for 90674.
5	Logic	1/1/2017	100	Implement new edit: Claim for HSCT allogeneic transplantation lacks required revenue code line for donor acquisition services (RTP). Edit criteria: A claim reporting HSCT allogeneic transplantation (procedure code 38240) is reported and there is no additional line on the claim reporting revenue code 815 for donor acquisition services (see Table 4).
6	Logic	1/1/2017	41	Add new revenue code 815 (Allogeneic stem cell acquisition services) to the valid revenue code list.
7	Logic	1/1/2017		Implement updated program logic to process conditional APC/packaging, critical care ancillary packaging and advance care planning across the claim rather than by day (see OPPS processing logic).
8	Logic	1/1/2017		Implement updated program logic for processing terminated device-intensive procedure offset determinations by HCPCS code, not by APC. Note: This also includes table changes for the quarterly data file reports.
9	Logic	1/1/2017		Implement new program logic for payment adjustment of film x-ray HCPCS codes. Film x-ray HCPCS codes with modifier FX reported are assigned new payment adjustment flag 21 (see OPPS processing logic, Table 7 and Appendix G).
10	Logic	1/1/2017	22	Add new modifiers FX (X-ray taken using film), PN (Non-excepted off-campus svc), 95 (Synchronous Telemedicine Service) and V1, V2, V3 (Demonstration modifiers 1, 2, 3) to the valid modifier list.
