I. GENERAL INFORMATION

A. Background: The Common Working File (CWF) July release does not allow downstream systems to implement 5010 file formats changes. Therefore continue sending Common Working File Medicare Quality Assurance (CWFMQA) the existing 4010 file formats until a future CR can be written once CWFMQA can accept 5010 file formats.

B. Policy: The Administrative Simplification Provisions of HIPAA require the Secretary of HHS to adopt standard electronic transactions and code sets for administrative health care transactions. The Secretary may also modify these standards periodically.
