SUBJECT: Revised X12N 4010A1 837 Professional Flat File

I. GENERAL INFORMATION

A. Background: Two changes to the flat file are needed. The first change is to the COBOL picture clause for SVD05 when F2 international units are billed in CTP05-1. The second change is to place hold the bytes for CRC06 and CRC07 EPSDT Referral.

B. Policy: The Part B flat file has been developed to facilitate claims processing of HIPAA compliant claims.

C. Provider Education: None.

II. BUSINESS REQUIREMENTS

"Shall" denotes a mandatory requirement

"Should" denotes an optional requirement

Requirement #	Requirements	Responsibility
2840.1	To change the COBOL picture clause for SVD05 (Paid Service Unit Count) to 9(7)V999. This change expands the Paid Service Unit Count to accept the maximum size values for all of the potential qualifiers.	Carriers, DMERCs, and Shared System Maintainers
2840.2	To correct an error in the CRC06 and CRC07 EPSDT Referral. Although these two elements are "Not Used" in this particular segment, CRC06 and CRC07 should still place hold the 2 bytes min/max in the flat file. This change brings these two elements in line with the original Joint Application Design group decision to place hold the bytes if Not Used elements were used in other segments of the flat file.	Carriers, DMERCs, and Shared System Maintainers
2840.3	Create pre-pass edits to reject claims that contain qualifiers F2 (international units), GR (grams), or ML (milliliters) on inbound claims, per the MEHUGS workgroup.	MCS contractors and EDS
