SUBJECT: 2007 Healthcare Common Procedure Coding System (HCPCS) Annual Update Reminder

I. GENERAL INFORMATION

A. Background: Medicare providers submitting claims to Medicare contractors for Part B services use a HCPCS code to indicate the service that was provided. HCPCS consist of Level I codes, which are the American Medical Association’s (AMA) Current Physician Terminology Codes (CPT-4) and Level II codes which are alpha-numeric and maintained by CMS. The updated HCPCS file is released annually to Medicare contractors via the CMS’s mainframe telecommunications system.

B. Policy: This is our annual reminder that the 2007 HCPCS file and its print file will be made available via the CMS’s mainframe telecommunication system. The file may be retrieved after 8:00 p.m., Eastern time, on October 18, 2006.

The paper documentation which consists of a cover memorandum, HCPCS tape characteristics and record layout, and transaction list printouts will be sent to you via U.S. Postal Service priority mail. The alpha-numeric index and the table of drugs will be posted to the CMS Website by the end of October.

Instructions for the Retrieval of the 2007 HCPCS
via CMS's Mainframe Telecommunications System
(Formerly Network Data Mover)

Listed below are the most common problems encountered when carriers/ intermediaries receive data via the mainframe telecommunications system:

- o Receipt was performed in interactive mode, rather than in batch. If transmission is performed interactively, it is impossible for the Division of Data Systems (DDS) to access the log to verify the transmission success/failure.

- o Omission or change of NEWNAME parameter. Omission of this parameter makes it extremely difficult and cumbersome for DDS to access the log to verify transmission success/failure. Make sure that the NEWNAME parameter equals HCPCS.

- o Omission or change of START parameter. This parameter establishes the starting time for the batch job. As stated earlier, transmission must occur during the evening hours. Setting the START to 20:00:00 hours assures that transmission will not commence prior to 8:00 p.m. eastern standard time.

NOTE: In order not to incur additional transmission line cost, transmission must occur during the evening hours, specifically after 8:00 p.m., eastern standard time.

The following is the JCL required for setting up a mainframe telecommunications system transmission of the 2007 HCPCS file from the CMS's Data Center.

Prior to submitting this job, please supply the following parameters particular to your job site:

UID# = Your system User ID

ACCTNG = Accounting Information, if applicable
