NOTE: CR 6313 rescinds and replaces CR6138 released on July 25, 2008. Please see BR 6313.2 for additional ICD-9-CM codes inadvertently omitted. All other information remains the same.

Subject: Correction to Prothrombin Time (PT/INR) Monitoring for Home Anticoagulation Management

I. SUMMARY OF CHANGES: Adds ICD-9-CM diagnosis codes that were inadvertently omitted from original implementation.

New / Revised Material
Effective Date: March 19, 2008
Implementation Date: February 9, 2009

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revised information only, and not the entire table of contents.

II. CHANGES IN MANUAL INSTRUCTIONS: (N/A if manual is not updated)
R=REVISED, N=NEW, D=DELETED-Only One Per Row.

III. FUNDING:

SECTION A: For Fiscal Intermediaries and Carriers:
No additional funding will be provided by CMS; Contractor activities are to be carried out within their operating budgets.

SECTION B: For Medicare Administrative Contractors (MACs):
The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

Manual Instruction

*Unless otherwise specified, the effective date is the date of service.
NOTE: CR 6313 rescinds and replaces CR6138 released on July 25, 2008. Please see BR 6313.2 for additional ICD-9-CM codes inadvertently omitted. All other information remains the same.

SUBJECT: Correction to Prothrombin Time (PT/INR) Monitoring for Home Anticoagulation Management

Effective Date: March 19, 2008

Implementation Date: February 9, 2009

I. GENERAL INFORMATION

A. Background: The prothrombin time (PT) test is an in-vitro test to assess coagulation. PT testing and its normalized correlate, the International Normalized Ratio (INR), are the standard measurements for therapeutic effectiveness of warfarin therapy. Warfarin, Coumadin®, and others, are self-administered, oral anticoagulant, or blood thinner, medications that affect a person’s Vitamin K-dependent clotting factors.

The Centers for Medicare & Medicaid Services (CMS) received a formal, complete, written request for reconsideration to expand the population eligible for coverage of home PT/INR monitoring to patients on warfarin. This revised NCD is a result of that request.

B. Policy: Effective for claims with dates of service on and after March 19, 2008, CMS revised its NCD on Prothrombin Time (PT/INR) Monitoring for Home Anticoagulation Management as follows:

Medicare will cover the use of home PT/INR monitoring for chronic, oral anticoagulation management for patients with mechanical heart valves, chronic atrial fibrillation, or venous thromboembolism (inclusive of deep venous thrombosis and pulmonary embolism) on warfarin. The monitor and the home testing must be prescribed by a treating physician as provided at 42 CFR 410.32(a) and all of the following requirements must be met:

1. The patient must have been anticoagulated for at least 3 months prior to use of the home INR device; and,
2. The patient must undergo a face-to-face educational program on anticoagulation management and must have demonstrated the correct use of the device prior to its use in the home; and,
3. The patient continues to correctly use the device in the context of the management of the anticoagulation therapy following the initiation of home monitoring; and,
4. Self-testing with the device should not occur more frequently than once a week.

NOTE: Applicable HCPCS Codes G0248, G0249, and G0250 will continue to be used for claims processing purposes for PT/INR. With the July 2008 OCE and Medicare Physician Fee Schedule updates (MPFS), the descriptors of these codes will change to reflect the revised coverage policy. The new descriptors reflect the expanded NCD criteria and are effective back to March 19, 2008. See below:

Long Descriptor G0248: Demonstration, prior to initial use, of home INR monitoring for patient with either mechanical heart valve(s), chronic atrial fibrillation, or venous thromboembolism who meets Medicare coverage criteria, under the direction of a physician; includes: face-to-face demonstration of use and care of the INR monitor, obtaining at least one blood sample, provision of instructions for reporting home INR test results, and documentation of patient ability to perform testing prior to its use
Short Descriptor G0248: Demonstrate use home INR mon

Long Descriptor G0249: Provision of test materials and equipment for home INR monitoring of patient with either mechanical heart valve(s), chronic atrial fibrillation, or venous thromboembolism who meets Medicare coverage criteria; includes provision of materials for use in the home and reporting of test results to physician; not occurring more frequently than once a week

Short Descriptor G0249: Provide INR test mater/equip

Long Descriptor G0250: Physician review, interpretation, and patient management of home INR testing for a patient with either mechanical heart valve(s), chronic atrial fibrillation, or venous thromboembolism who meets Medicare coverage criteria; includes face-to-face verification by the physician that the patient uses the device in the context of the management of the anticoagulation therapy following initiation of the home INR monitoring; not occurring more frequently than once a week

Short Descriptor G0250: MD INR test revie inter mgmt

NOTE: Test materials continue to include 4 tests. Frequency of reporting requirements shall remain the same.

NOTE: Porcine valves are not included in this NCD, so Medicare will not make payment on Home INR Monitoring for patients with porcine valves unless covered by local Medicare contractors.

NOTE: This NCD is distinct from, and makes no changes to, the PT clinical laboratory NCD at Pub. 100-03, section 190.17, of the NCD Manual.

VI. FUNDING

Section A: For Fiscal Intermediaries (FIs) and Carriers:
No additional funding will be provided by CMS; contractor activities are to be carried out within their operating budgets.

Section B: For Medicare Administrative Contractors (MACs):
The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.
Table of Contents
(Rev. 1663, 01-08-09)

60.4.1 – Allowable Covered Diagnosis Codes
60.5.2 – Applicable Diagnosis Code for Carriers
60.4.1 – Allowable Covered Diagnosis Codes
(Rev. 1663; Issued: 01-08-09; Effective Date: 03-19-08; Implementation Date: 02-09-09)

For services furnished on or after July 1, 2002, the applicable ICD-9-CM diagnosis code for this benefit is V43.3, organ or tissue replaced by other means; heart valve.

For services furnished on or after March 19, 2008, the applicable ICD-9-CM diagnosis codes for this benefit are:

   V43.3 (organ or tissue replaced by other means; heart valve),
   289.81 (primary hypercoagulable state),
   453.0-453.3 (other venous embolism & thrombosis),
   453.40-453.49 (includes 453.40-453.42, 453.8-453.9) (venous embolism and thrombosis of the deep vessels of the lower extremity, and other specified veins/unspecified sites)
   415.11-415.12, 415.19 (pulmonary embolism & infarction) or,
   427.31 (atrial fibrillation (established) (paroxysmal)).

60.5.2 – Applicable Diagnosis Codes for Carriers
(Rev. 1663; Issued: 01-08-09; Effective Date: 03-19-08; Implementation Date: 02-09-09)

For services furnished on or after July 1, 2002, the applicable ICD-9-CM diagnosis code for this benefit is V43.3, organ or tissue replaced by other means; heart valve.

For services furnished on or after March 19, 2008, the applicable ICD-9-CM diagnosis codes for this benefit are:

   V43.3 (organ or tissue replaced by other means; heart valve),
   289.81 (primary hypercoagulable state),
   453.0-453.3 (other venous embolism & thrombosis),
   453.40-453.49 (includes 453.40-453.42, 453.8-453.9) (venous embolism and thrombosis of the deep vessels of the lower extremity, and other specified veins/unspecified sites)
   415.11-415.12, 415.19 (pulmonary embolism & infarction) or,
   427.31 (atrial fibrillation (established) (paroxysmal)).
