This revision manualizes Program Memorandum (PM) A-00-08, Change Request 1064, dated March 2000.

CLARIFICATION/MANUALIZATION--EFFECTIVE/IMPLEMENTATION DATE: Not Applicable

Section 1, Medical Review of Skilled Nursing Facility Prospective Payment System (SNFPPS) Bills, revises the existing SNF MR guidelines and manualizes the medical review instructions in PM A-00-08, and includes the following subsections.

Section 1.1, Types of Review
Section 1.2, Bill Review Requirements
Section 1.3, Bill Review Process
Section 1.4, Workload
Section 1.5, Data Analysis
Section 1.6, MIP-PET
Section 1.7, Quality Issues in SNF and Referral to Other Agencies
Section 1.8, Reporting

These instructions should be implemented within your current operating budget.

NOTE: Red italicized font identifies new material.

Chapter 6 - Intermediary MR Guidelines for Specific Services

Table of Contents

1 – Medical Review of Skilled Nursing Facility Prospective Payment Services (SNF PPS) Bills

1.1 - Types of Review

1.2 - Bill Review Requirements

1.3 - Bill Review Process

1.4 - Workload

1.5 - Data Analysis

1.6 - MIP-PET

1.7 - Quality Issues in SNF and Referral to Other Agencies

1.8 - Reporting

1 – Medical Review of Skilled Nursing Facility Prospective Payment System (SNFPSS) Bills (Rev. 18, 01-17-02)

Effective with cost reporting periods beginning on or after July 1, 1998, Medicare began paying Skilled Nursing Facilities (SNFs) under a Prospective Payment System (PPS). PPS payments are per diem rates based on the patient's condition as determined by classification into a specific Resource Utilization Group (RUG). This classification is done by the use of a clinical assessment tool, the Minimum Data Set (MDS) and is required to be performed periodically according to an established schedule for purposes of Medicare payment. Each MDS represents the patient's clinical status based on an assessment reference date and various look back periods for the time that is covered by that MDS. Medicare expects to pay at the rate based on the most recent clinical assessment, i.e., MDS, until the next required assessment is due or until skilled care is no longer needed. This means that the level of payment for each day of the SNF stay may not match exactly the level of services provided. Accordingly, the medical review process for SNF PPS bills must be consistent with the new payment process. The methodology of medical review for SNFs has changed under the prospective payment system from a review of individualized services to a review of the beneficiary's clinical condition. Medical review decisions are based on the observation, look back periods relevant to the MDS(s), and supporting documentation for the claim period billed.

“Rules of thumb” in the MR process are prohibited. Intermediaries must not make denial decisions solely on the reviewer's general inferences about beneficiaries with similar diagnoses or on general data related to utilization. Any “rules of thumb” that would declare a claim not covered solely on the basis of elements, such as, lack of restoration potential, ability to walk a certain number of feet, or degree of stability is unacceptable without individual review of all pertinent facts to determine if coverage may be justified. Medical denial decisions must be based on a detailed and thorough analysis of the beneficiary's total condition and individual need for care.

All FIs are to review, when indicated, Medicare SNF PPS bills, except for the excluded services identified in §4432(a) of the BBA and PM A-98-37. The goal of medical review is to determine whether the services are reasonable and necessary, delivered in the appropriate setting, delivered and coded correctly, and appropriately documented. Under PPS, beneficiaries must continue to meet the regular eligibility requirements for a SNF stay as described in MIM §3131 (e.g., 3-day medically necessary hospital stay, transfer to a participating SNF within 30 days after discharge from the hospital, and the services must be for treatment of a condition for which the beneficiary was treated in the hospital or one that arose while in the SNF for treatment of a condition for which he was treated in the qualifying hospital stay).

*Under PPS the beneficiary must continue to meet level of care requirements as defined in 42 CFR 409.31. CMS has established a policy that when the initial Medicare required 5-day assessment results in a beneficiary being correctly assigned to one of the upper 26 RUG-III groups, this effectively creates a presumption of coverage for the period from the first day of the Medicare covered services up to, and including, the assessment reference date for that assessment (which may include grace days). **This presumption does not arise in connection with any of the subsequent assessments**, but applies specifically to the period ending with the assessment reference date for the initial Medicare required 5-day assessment. For all days*

subsequent to the assessment reference date of the Medicare required 5-day assessment or for cases where the provider billed HIPPS codes indicating that the beneficiary was correctly assigned to one of the lower 18 RUG-III groups, you are to review the bill and supporting medical information to determine whether the beneficiary did indeed meet the SNF level of care requirement. If the beneficiary met the level of care requirement, you are to also determine whether the furnished services and intensity of those services, as defined by the billed RUG-III group, were reasonable and necessary for the beneficiary's condition payable according to the final rule. To determine if the beneficiary was correctly assigned to a RUG-III group, you are to verify that the billed RUG-III group is supported by the associated provider documentation. You are to consider all available information in determining coverage. This includes the MDS, the medical records including physician, nursing, and therapy documentation, and the beneficiary's billing history.

1.1 - Types of Review (Rev. 18, 01-17-02)

FI's should no longer perform random postpayment reviews specific to SNFPSS bills. Instead, SNFPSS MR should be conducted on a prepayment targeted basis. Where an FI cannot perform prepayment review for SNFPSS bills, targeted reviews may be conducted on a postpayment basis. Consider the principles of Progressive Corrective Action when conducting MR. (See Program Memorandum AB-00-72, "Medical Review—Progressive Corrective Action" dated August 7, 2000. FIs are also required to continue review of demand bills. (See B below.)

A – Targeted (Focused) Reviews

FIs are to conduct targeted reviews, focusing on specific program vulnerabilities inherent in the PPS as well as provider/service specific problems.

- *Bill Selection--In selecting their overall workload, an FI may choose specific claims or target providers with high error rates, and must include newly participating providers.*
 - *In addition, CMS may be directing targeted reviews based on data obtained from the CMS Repository or other sources.*
 - *Continue to track and report edit effectiveness through the standard activity reports.*

B - Demand Bills

Intermediaries must conduct MR of all patient generated demand bills with the following exception:

Demand bills for services to beneficiaries who are not entitled to Medicare or do not meet eligibility requirements for payment of SNF benefits (i.e., no qualifying hospital stay) do not require MR. A denial notice with the appropriate reasons for denial must be sent.

Demand bills are bills submitted by the SNF at the beneficiary's request because the beneficiary disputes the provider's opinion that the bill will not be paid by Medicare and wishes the bill to be

submitted for a payment determination. The demand bill is identified by the presence of a condition code 20. The SNF must have a written request from the beneficiary to submit the bill, unless the beneficiary is deceased or incapable of signing. In this case, the beneficiary's guardian, relative, or other authorized representative may make the request. *(See 42 CFR 424.36, Signature requirements.)*

When determining eligibility for Medicare coverage, review to determine that both technical and clinical criteria are met. In the absence of a completed MDS, review the medical record and documentation, including the notice of noncoverage, to determine provider/beneficiary liability. If you disagree with the provider's decision of noncoverage, follow the medical review instructions in §1.3 to determine that the services were reasonable and necessary and use the RUG-III Adjustment Matrices (EXHIBIT II) to adjust the RUG-III code billed if necessary.

The HIPPS code and revenue code 0022 must be present on the demand bill. If an MDS has been completed, the provider must use the RUG-III group from that MDS, even if it is one of the top 26 RUG-III groups. If no assessment was completed, the provider may use the default code. If the 14-day State assessment has an assessment reference date within the assessment window of either the Medicare 5-day or 14-day assessments, it may be used as a basis for billing the days associated with that Medicare-required assessment.

C – Bills Submitted for Medicare Denial Notices

Providers may submit bills for a denial from Medicare for Medicaid or another insurer that requires a Medicare denial notice. These bills are identified by condition code 21. *The SNF is required to issue a notice of noncoverage to the beneficiary that includes the specific reasons the services were determined to be noncovered. A copy of this notice must be maintained on file by the SNF in case the FI requests a copy of the notice.*

1.2 - Bill Review Requirements (Rev. 18, 01-17-02)

FIs must conduct review of SNF PPS bills in accordance with these instructions. This includes all applicable PIM sections, FI standard operating procedures for soliciting additional documentation, time limitations for receipt of the solicited documentation, claim adjudication, and recoupment of overpayment. Minimum requirements of a valid SNF PPS bill are:

- *Revenue Code 0022 must be on the bill. This is the code that designates SNF PPS billing.*
- *A Health Insurance Prospective Payment System (HIPPS) code must also be on the bill. This is a five-character code. The first three characters are an alpha/numeric code identifying the RUG III classification. The last two characters are numeric indicators of the reason for the MDS assessment. (See Exhibit III, SNF PPS Assessment Indicator Codes.)*

1.3 - Bill Review Process

(Rev. 18, 01-17-02)

A - Request Records

FIs must request documentation necessary to make a MR determination. FIs are to use the MDS as part of the medical documentation used to determine whether the HIPPS codes billed were accurate and appropriate. As a result, when you solicit information necessary to support a medical review decision, include a request for a hardcopy version of each MDS related to the billing period being reviewed. An electronic copy that replicates the hardcopy version of the MDS is acceptable. You must also request documentation to support the HIPPS code(s) billed, including notes related to the assessment reference date, documentation relating to the look back periods which may fall outside the billing period under review, and documentation related to the claim period billed. Since the assessment reference date for each MDS marks the end of the look back period (which may extend back 30 days), the FI must be sure to obtain supporting documentation for up to 30 days prior to the assessment reference date if applicable. The requested documentation may include hospital discharge summaries and transfer forms; physician orders and progress notes; patient care plans; nursing and rehabilitation therapy notes; and treatment and flow charts and vital sign records, weight charts and medication records.

Clinical documentation that support medical necessity may be expected to include: physician orders for care and treatments, medical diagnoses, rehabilitation diagnosis (as appropriate), past medical history, progress notes that describe the beneficiary's response to treatments and his physical/mental status, lab and other test results, and other documentation supporting the beneficiary's need for the skilled services being provided in the SNF.

- *You are to consider all available information in determining coverage. This includes the MDS, the medical records including physician, nursing, and therapy documentation, and the beneficiary's billing history. We expect that review of the bill (i.e., UB-92) alone would not provide sufficient information in making a coverage determination.*
 - *During the review process, if the provider fails to furnish you with solicited documentation within the prescribed time frame, deny the bill and/or adjust the claim accordingly. If the provider furnishes documentation that is incomplete/insufficient to support medical necessity, adjust the bill in accordance with §1862(a)(1)(A) of the Act. A denial based on §1862(a)(1)(A) of the Act is subject to appeal rights.*
 - *During the review of demand bills, continue current prepayment operating procedures if the provider fails to furnish solicited documentation within the prescribed time frames.*

B - Make a Coverage Determination

For all selected claims, review medical documentation and determine whether the services provided were covered. In order to be covered, a service must meet all three of the following criteria:

- **Level of care requirement must be met**--Determine whether the services met the requirements according to the Final Rule, CMS-1913-F. The Final Rule reinstated management and evaluation of a care plan, observation and assessment of the patient's changing condition, patient education, and insertion and sterile irrigation and replacement of suprapubic catheters as examples of skilled care.
 - CMS has established a policy that when the initial Medicare required 5-day assessment results in a beneficiary being correctly assigned to one of the upper 26 RUG-III groups, this creates a presumption of coverage. This meets the requirements of 42 CFR 409.31 for the period from the first day of the Medicare covered stay up to, and including, the assessment reference date for that assessment but not later than day 8 of the covered stay. This presumption does not arise in connection with any of the subsequent assessments, but applies specifically to the period ending with the assessment reference date for the initial Medicare required 5-day assessment. For all other assessments, determination of the continued need for, and receipt of, a skilled level of care will be based on the beneficiary's overall clinical status and needs for the dates of service under review. An apparent interruption in daily skilled services should not be interpreted to signal an end to daily skilled care. Rather, consideration should be given to the provision of observation and assessment and management and evaluation during the review of medical records.
 - The above criteria for determining the need for and receipt of a skilled level of care also applies to beneficiaries assigned to one of the lower 18 RUG-III groups.
 - Management and evaluation of a patient care plan refers to the management and evaluation of a patient care plan, based on the physician's orders, constitute skilled nursing services when, in terms of the patient's physical or mental condition, these services require the involvement of skilled nursing personnel to meet the patient's medical needs, promote recovery, and ensure medical safety. However, the planning and management of a treatment plan that does not involve the furnishing of skilled services may not require skilled nursing personnel. Skilled management would be required where the sum total of unskilled services which are a necessary part of the medical regimen, when considered in light of the patient's overall condition, makes the involvement of skilled nursing personnel necessary to promote the patient's recovery and medical safety.
 - Observation and assessment of a patient's condition refers to skilled services when the likelihood of change in a patient's condition requires skilled nursing or skilled rehabilitation personnel to identify and evaluate the patient's need for possible modification of treatment or initiation of additional medical procedures, until the patient's treatment regimen is essentially stabilized.

If a patient was admitted for skilled observation but did not develop a further acute episode or complication, the skilled observation services still are covered so long as there was a reasonable probability for such a complication or further acute episode. "Reasonable probability" means that a potential complication or further acute episode was a likely possibility.

- ***The services must not be statutorily excluded***--Determine whether the services are excluded from coverage under any provision in 1862(a) of the Act other than 1862(a)(1)(A).
- ***Services are Reasonable and Necessary***--Determine whether the services are reasonable and necessary under 1862(a)(1)(A) of the Act. In making a reasonable and necessary determination, you must determine whether the clinical condition and/or services indicated on the MDS are reasonable and necessary for the beneficiary's condition as reflected by medical record documentation. If you determine that some or all of the services were not reasonable and necessary at the RUG level billed, which if disallowed would result in reclassification to a lower RUG-III category (using the chart in EXHIBIT I--MDS2.0 RUG III Codes), adjust the bill according to the matrices in EXHIBIT II--RUG-III Adjustment Matrices. For examples of case review determinations, see EXHIBIT III--Medical Review Outcomes.

It is important to recognize the possibility that the necessity of some services could be questioned and yet not impact the RUG-III classification. The RUG-III classification may not change because there are many clinical conditions and treatment regimens that qualify the beneficiary for the RUG-III group to which he was classified. For instance, a beneficiary who classifies into the Special Care category because he is aphasic, is being tube fed and has a fever would continue to classify into this category even though the reviewer notices that the documentation of his fever does not support the presence of a fever during the assessment period under review. Although fever with tube feeding is a qualifier for classification into the Special Care category, so is tube feeding with aphasia. The beneficiary is still being tube fed and is still aphasic; that combination of clinical conditions is adequate to qualify him for the Special Care category. None of the qualifying conditions listed on the chart in Exhibit I of this document has a higher weight than any other, and the presence of any one condition or combination of conditions as listed is adequate for classification. If that occurs, no change in RUG-III classification should be made. If the medical record does not support one or both of the above conditions, appropriate adjustment to the RUG-III classification should be made.

When reviewing bills, if you suspect fraudulent behavior, e.g., a pattern of intentional reporting of inaccurate information for the purpose of payment or the billing for services which were not furnished, it is your responsibility to comply with CMS's Fraud and Abuse guidelines (PIM Chapter 3 ff.)

C - Outcome of Review

After making a medical review determination, take appropriate actions using the following guidelines. (Also Refer to Exhibit IV for Specific Examples of Medical Review Outcomes.)

- ***HIPPS Codes Indicating Classification into a Rehabilitation Group***
 - ***Rehabilitation Services Reasonable and Necessary At Level Billed***--If the rehabilitation services were appropriate at the level billed during the time of the relevant assessment period for the timeframe being billed, accept the claim as billed for the entire payment period, even if the level of therapy changed during the payment period.

- **Rehabilitation Services Reasonable and Necessary but Not at Billed Level**--If the rehabilitation services were appropriate, but not at the level billed, during the time of the relevant assessment period for the timeframe being billed, adjust the billed RUG-III code according to Matrix A of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period.
- **Rehabilitation Services Not Reasonable and Necessary**--If all rehabilitation services are determined to be medically unnecessary during the time of the relevant assessment period for the timeframe being billed, use EXHIBIT I to determine if there is a clinical group for which the beneficiary qualified. Based on the selected category, adjust the RUG-III code billed according to Matrix B of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period. If there are no other skilled services indicated in the medical records, deny all days.
- **Rehabilitation Services Projected On 5-Day Assessment Not Provided**--If rehabilitation services are not provided at the level projected on the 5-day assessment, look for documentation to support the reason the rehabilitation services were not provided. If documentation supports that the projection was made in good faith, e.g., the physician orders and the therapy plan of treatment reflect the projected level of minutes, accept the claim as billed.
 - If, however, the documentation does not support that rehabilitation services were reasonable and necessary at the projected level during the 5-day assessment period, adjust the RUG-III code billed according to Matrix A or B of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period.
- **All Rehabilitation Services Discontinued With No Other Medicare Required Assessment (OMRA)/Other Skilled Services Provided**--If the provider discontinued all rehabilitation services at some point during the payment period but did not complete an OMRA as required by Medicare 8-10 days after therapy is discontinued, pay at the HIPPS code billed for eight days after the date the rehabilitation services were discontinued, then at the default rate for the remainder of the payment period, as long as skilled need remains.
- **All Rehabilitation Services Discontinued With No Other Medicare Required Assessment (OMRA)/No Other Skilled Services Provided**--If the provider discontinued all rehabilitation services at some point during the payment period but did not complete an Other Medicare Required Assessment (OMRA) as required by Medicare 8-10 days after therapy is discontinued) and no other skilled care is needed, deny the claim from the date that the rehabilitation services were discontinued.
- **All Rehabilitation Services Become Not Reasonable and Necessary--Skilled Need Continues**--If you determine that all provided rehabilitation services are no longer reasonable and necessary at some point during the payment period but that other skilled services are being provided, use EXHIBIT I to determine the clinical group for which the beneficiary qualified. Based on the selected category, adjust the RUG-III code billed according to Matrix B of RUG-III Adjustment Matrices, EXHIBIT II from the date that the rehabilitation services are determined to be not reasonable and necessary.

- **All Rehabilitation Services Become Not Reasonable and Necessary--No Skilled Need Continues**--If you determine that provided rehabilitation services are no longer reasonable and necessary at some point during the payment period and that no other skilled services are being provided, deny the bill from the date that the rehabilitation services are determined to be not reasonable and necessary.
- **HIPPS Codes Indicating Classification into a Clinical Group**
 - **Services Reasonable and Necessary At Level Billed**--If services were appropriate at the level billed during the time of the relevant assessment period for the timeframe being billed, accept the claim as billed for the entire payment period, even if the level of skilled care changes during the payment period.
 - **Services Not Reasonable and Necessary At Level Billed**--If the clinical group billed was not appropriate during the time of the relevant assessment period for the timeframe being billed, select the proper category that reflects the skilled services provided to the beneficiary or the beneficiary's clinical condition at the time of the observation period (e.g., Extensive Services, Special Care, Clinically Complex) according to the MDS2.0 RUG III Codes chart (EXHIBIT I). Based on the selected category, adjust the billed RUG-III code according to Matrix B of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period.
 - **Need For Skilled Care Ends**--If you determine that the beneficiary falls to a non-skilled level of care at some point during the payment period, discontinue Medicare coverage effective when the beneficiary no longer meets level of care criteria.
- **HIPPS Codes Indicating Classification into the Lower 18 RUG-III Groups**
 - **Lower 18 RUG-III Group Billed - Level of Care Criteria Met**--If the beneficiary met the SNF level of care criteria as defined in Section 1.3B, accept the claim as billed for the entire payment period, as long as skilled need remains.
 - **Lower 18 RUG-III Group Billed - Level of Care Criteria Not Met**--If the beneficiary did not meet the SNF level of care criteria as defined in Section 1.3B, deny the bill in full for the entire payment period.
- **General Information For All HIPPS Codes**
 - **No Skilled Care Needed or Provided**--If you determine that none of the services furnished were reasonable and necessary and that no skilled care is needed or provided, deny the bill from the date that care was determined to be non-covered.
 - **Services Billed But Not Furnished**--If you determine that any of the services billed were not furnished, deny the bill in part or full for the entire payment period and, if applicable, apply the fraud and abuse guidelines in PIM Chapter 3.

A partial denial is defined as either the disallowance of specific days within the stay or reclassification into a lower RUG-III group.

For any full or partial denials made, adjust the claim accordingly to recoup the overpayment. A partial denial based on classification into a new RUG-III code or a full denial because the level of care requirement was not met are considered reasonable and necessary denials (§1862(a)(1)(A)) and are subject to appeal rights.

1.4 - Workload

(Rev. 18, 01-17-02)

All FIs must review some level of SNF PPS bills based on data analysis. These are complex reviews and should be reviewed by professionals, i.e., at a minimum, by LPNs. Workload projections are to be addressed through the annual Budget Performance Requirements process.

1.5 - Data Analysis

(Rev. 18, 01-17-02)

Conduct data analysis to identify normal practice patterns, aberrancies, potential areas of overutilization, and patterns of noncovered care. This MR activity should add a strong foundation for targeting medical review of claims. As indicated in PIM Chapter 2, continue data collection and analysis of SNF PPS billing information, data from other Federal sources (PROs, carriers, Medicaid); and referrals from internal or external sources (e.g., provider audit, fraud and abuse units, beneficiary or other complaints) to ensure targeting and directing MR efforts on bills where there is the greatest risk of inappropriate program payment.

1.6 - MIP-PET

(Rev. 18, 01-17-02)

Education is key to ensure proper billing. As problems are identified, FIs should not only educate the individual providers of problems, but also the SNF community about the results of their review and of common problems found through medical review. This education should be as interactive as possible. FIs should be proactive in using the results of medical review to educate providers and prevent future errors. The costs associated with these work products and activities are to be budgeted and charged to the appropriate MIP-PET CAFM2 code.

1.7 - Quality Issues in SNF and Referral to Other Agencies

(Rev. 18, 01-17-02)

A - Premature Discharge From Acute Hospital

Intermediaries refer cases to the RO where evidence indicates a patient was prematurely discharged from the acute care setting, and the patient continues to require and receive acute care services. Based upon review of the medical record, intermediaries determine whether:

- The patient received any SNF services during the stay;*

- *If so, at what point the patient began receiving them;*
- *The total number of SNF days, if any, during which the patient received SNF services; and*
- *The dates the SNF services were rendered, if applicable.*

All information (e.g., medical record) used in the review determination must be forwarded to the RO.

The RO forwards the material to the PRO for its review of the alleged premature discharge and the acute care services. The PRO determines if, in fact the patient was prematurely discharged, and the number of acute days billed as SNF days. They inform the intermediary of the number of days and dates for service to deny. The PRO issues a denial notice to the provider and informs the beneficiary of the number of days counted as hospital days for utilization purposes. The SNF payment must be treated as an overpayment. (See PIM Chapter 4 s 7ff.)

B - Other Quality Issues

The identification of quality of care issues, which may appear during the course of medical review, are to be referred to the RO for referral to the State agency. These may include but are not limited to issues of potential under-utilization of services by a provider in an effort to maximize payment.

1.8 – Reporting *(Rev. 18, 01-17-02)*

Reporting requirements will be issued under separate instructions.

MDS2.0 RUG III Codes

| CATEGORY | ADL INDEX | END SPLITS | MDS RUG III CODES |
|--|---|--|--|
| REHABILITATION | | | |
| ULTRA HIGH Rx 720 minutes a week minimum At least 2 disciplines, 1st -5 days, 2nd - at least 3 days | 16-18 9-15 4-8 | NOT USED NOT USED NOT USED | RUC RUB RUA |

| | | | <p>Default</p> |

**To qualify as receiving Nursing Rehabilitation, the rehabilitation must be in at least 2 activities, at least 6 days a week. As defined in the Long Term Care RAI User's Manual, Version 2 activities include: Passive or Active ROM, amputation care, splint or brace assistance and care, training in dressing or grooming, eating or swallowing, transfer, bed mobility or walking, communication, scheduled toileting program or bladder retraining*

RUG-III ADJUSTMENT MATRICES

Matrix A

| RUG Category Billed | Adjust to: |
|---------------------------------------|-------------------|
| <i>Rehabilitation - RUC, RVC, RHC</i> | <i>RMC</i> |
| <i>Rehabilitation - RUB, RVB, RHB</i> | <i>RMB</i> |
| <i>Rehabilitation - RUA, RVA, RHA</i> | <i>RMA</i> |
| <i>Rehabilitation - RMC</i> | <i>RLB</i> |
| <i>Rehabilitation -RMB, RMA</i> | <i>RLA</i> |

Note: The adjusted RUG codes in the above matrix, were determined by selecting the RUG code in the Medium rehabilitation service category that most closely matched the billed ADLs. Services billed in the Medium Rehabilitation category were reduced to Low Rehabilitation category.

MATRIX B

| RUG Category Billed | Adjust to: | | | | |
|--|---------------------------|---------------------|---------------------------|-----------------|---|
| | <i>Extensive Services</i> | <i>Special Care</i> | <i>Clinically Complex</i> | <i>Lower 18</i> | <i>Not R&N and no other RUG-III qualifying clinical condition</i> |
| <i>Rehabilitation - RUC, RVC, RHC, RMC, RLB</i> | <i>SE1</i> | <i>SSC</i> | <i>CC1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Rehabilitation - RUB, RVB, RHB, RMB</i> | <i>SE1</i> | <i>SSA</i> | <i>CB1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Rehabilitation - RUA, RVA, RHA, RMA, RLA</i> | <i>X</i> | <i>CA1</i> | <i>CA1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Extensive Services - SE3, SE2, SE1</i> | <i>X</i> | <i>SSA</i> | <i>CA1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Special Care - SSC</i> | <i>X</i> | <i>X</i> | <i>CC1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Special Care - SSB</i> | <i>X</i> | <i>X</i> | <i>CB1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Special Care – SSA</i> | <i>X</i> | <i>X</i> | <i>CA1</i> | <i>PA1</i> | <i>Deny</i> |
| <i>Clinically Complex - CC2, CC1, CB2, CB1, CA2, CA1</i> | <i>X</i> | <i>X</i> | <i>X</i> | <i>PA1</i> | <i>Deny</i> |
| <i>All Lower 18 RUG III Codes</i> | <i>X</i> | <i>X</i> | <i>X</i> | <i>PA1</i> | <i>Deny</i> |

NOTE: The adjusted RUG codes in the above matrix were determined by selecting the RUG code for each category that most closely matched the ADL index of the billed RUG code. When the ADL index was the same for the entire category the lowest RUG code in that category was selected. In some cases, the adjusted RUG code may fall into a different category than was selected when using the MDS2.0 RUG III Codes chart (EXHIBIT I) because of a low ADL index.

When using Matrix B to reclassify a case for payment, there will be instances in which the reviewer will need to calculate the ADL score in order to determine for which RUG-III group the beneficiary qualifies. For example, if a bill at a rehabilitation RUG-III group level comes in for review and the reviewer determines that none of the rehabilitation therapy service that was provided was reasonable and necessary, the bill will be re-classified using Matrix B. The process for this re-classification relies on the reviewer being able to determine for which of the clinical RUG-III groups the beneficiary qualifies.

There are four instances in which the combination of a diagnosis and an ADL score are the qualifying condition for the RUG-III category. These four combinations are: Quadriplegia with an ADL score of 10 or higher, Multiple Sclerosis with an ADL score of 10 or higher, Cerebral Palsy with an ADL score of 10 or higher and Hemiplegia with an ADL score of 10 or higher. The first three combinations qualify the beneficiary for the Special Care category, the last combination is a qualifier for the Clinically Complex category.

Although it is not appropriate to alter the ADL values reported on the MDS, the reviewer can use those values to calculate the ADL score that is used for RUG-III classification. The following exhibit illustrates how to perform this calculation. Notice that not all of the ADL items in section G of the MDS are relevant for the calculation of the RUG-III ADL sum score. Use only the items used in the explanation below (G1a, G1b, G1h, G1i). Additionally, items K5a, K5b, K6a and K6b are used in the calculation for beneficiaries who receive a significant portion of their nutrition enterally or parenterally.

To calculate the RUG-III ADL Sum Score:

First, calculate the RUG-III ADL scores for items G1a, G1b and G1i.

| MDS ITEM | IF COLUMN A VALUE= | IF COLUMN B VALUE= | ADL SCORE= | SCORE |
|----------|---|--------------------|------------|-------|
| G1a | 0 or 1 | any number | 1 | |
| | 2 | any number | 3 | |
| | 3, 4 or 8 | <=2 | 4 | |
| | 3, 4 or 8 | 3 or 8 | 5 | G1a= |
| G1b | Calculate this score using the same values as for G1a | | | G1b= |
| G1i | Calculate this score using the same values as for G1a | | | G1i= |

Next, check the items related to enteral and parenteral feeding. If item **K5a** is checked, and item **K6a** indicates that the beneficiary received at least 51 percent of his calories parenterally, or if items **K6a** and **K6b** together indicate that the beneficiary received at least 26 percent of his calories and at least 501 cc fluids per day parenterally, then the eating ADL score is 3.

If **K5b** is checked, and item **K6a** indicates that the beneficiary received at least 51 percent of his calories via tube feedings or items **K6a** and **K6b** together indicate that the beneficiary received

at least 26 percent of his calories and at least 501 cc of fluid via tube feedings, then the ADL score for eating is 3.

If either **K5a** or **K5b** is checked and **K6a** and **K6b** do not have values that indicate that the minimum amounts of fluid and/or calories were received by the beneficiary, then there is no ADL score for enteral/parenteral feeding to be added.

If beneficiary does not receive a score of 3 based on K5a, K5b, K6a and K6b, then go on to items G1h (eating).

| <i>MDS ITEM</i> | <i>If COLUMN A VALUE=</i> | <i>ADL SCORE =</i> | <i>SCORE</i> |
|-----------------|---------------------------|--------------------|--------------|
| <i>G1h</i> | <i>0 or 1</i> | <i>1</i> | |
| | <i>2</i> | <i>2</i> | |
| | <i>3, 4 or 8</i> | <i>3</i> | <i>G1h=</i> |

Sum the values for G1a, G1b, G1i. Add 3, if appropriate, based on the enteral/parenteral values or, if the beneficiary is not being tube or parenterally fed at a level high enough to warrant the score of 3, add the value from the calculation for G1h instead. The final sum is the ADL score used by the grouper to classify beneficiaries into the RUG-III groups.

EXAMPLE: A beneficiary's MDS reports the following scores in the relevant items of section G of the MDS 2.0:

| <i>MDS ITEM</i> | <i>A</i> | <i>B</i> | <i>ADL Score</i> |
|-----------------|----------|----------|------------------|
| <i>G1a</i> | <i>1</i> | <i>2</i> | <i>1</i> |
| <i>G1b</i> | <i>1</i> | <i>1</i> | <i>1</i> |
| <i>G1h</i> | <i>1</i> | <i>1</i> | <i>1</i> |
| <i>G1i</i> | <i>2</i> | <i>2</i> | <i>3</i> |

This beneficiary's score is a 6. (1+1+1+3=6)

SNFPPS
ASSESSMENT INDICATOR CODES

| MODIFIER | TYPE OF ASSESSMENT |
|-----------------|--|
| 01 | <i>5-day Medicare-required assessment/not an initial admission assessment</i> |
| 02 | <i>30-day Medicare-required assessment</i> |
| 03 | <i>60-day Medicare-required assessment</i> |
| 04 | <i>90-day Medicare-required assessment</i> |
| 05 | <i>Readmission/Return Medicare-required assessment</i> |
| 07 | <i>14-day Medicare-required assessment/not an initial admission assessment</i> |
| 08 | <i>Off-cycle Other Medicare-required assessment (OMRA)</i> |
| 11 | <i>5-day (or readmission/return) Medicare-required assessment AND initial admission assessment</i> |
| 17 | <i>14-day Medicare-required assessment and initial admission assessment: This code is being activated to facilitate the planned automated generation of all assessment indicator codes. Currently, code 07 is used for all 14-day Medicare assessments, regardless of whether it is also a clinical initial admission assessment (i.e., an assessment mandated a part of the Medicare/Medicaid certification process).</i> |
| 18 | <i>OMRA replacing 5-day Medicare-required assessment</i> |
| 28 | <i>OMRA replacing 30-day Medicare-required assessment</i> |
| 30 | <i>Off-cycle significant change assessment (outside assessment window)</i> |
| 31 | <i>Significant change assessment REPLACES 5-day Medicare-required assessment</i> |
| 32 | <i>Significant change assessment REPLACES 30-day Medicare-required assessment</i> |
| 33 | <i>Significant change assessment REPLACES 60-day Medicare-required assessment</i> |
| 34 | <i>Significant change assessment REPLACES 90-day Medicare-required assessment</i> |
| 35 | <i>Significant change assessment REPLACES a readmission/return Medicare-required assessment</i> |
| 37 | <i>Significant change assessment REPLACES 14-day Medicare-required assessment</i> |
| 38 | <i>OMRA replacing 60-day Medicare-required assessment</i> |
| 40 | <i>Off-cycle significant correction assessment of a prior assessment (outside assessment window)</i> |
| 41 | <i>Significant correction of a prior assessment REPLACES 5-day Medicare-Required assessment</i> |
| 42 | <i>Significant correction of a prior assessment REPLACES 30-day Medicare-Required assessment</i> |
| 43 | <i>Significant correction of a prior assessment REPLACES 60-day Medicare-Required assessment</i> |
| 44 | <i>Significant correction of a prior assessment REPLACES 90-day Medicare-Required assessment</i> |
| 45 | <i>Significant correction of a prior assessment REPLACES a readmission/return assessment</i> |
| 47 | <i>Significant correction of a prior assessment REPLACES 14-day Medicare-Required assessment</i> |
| 48 | <i>OMRA replacing 90-day Medicare-required assessment</i> |
| 54 | <i>90-day Medicare assessment that is also a quarterly assessment</i> |
| 78 | <i>OMRA replacing 14-day Medicare-required assessment</i> |
| 00 | <i>Default code</i> |

EXAMPLES OF MEDICAL REVIEW OUTCOMES

HIPPS Codes Indicating Classification into a Rehabilitation Group

- 1. Rehabilitation Services Reasonable and Necessary At Level Billed--***If the rehabilitation services were appropriate at the level billed during the time of the relevant assessment period for the timeframe being billed, accept the claim as billed for the entire payment period, even if the level of therapy changed during the payment period.*

Services Billed: *RHC07 for days 15-30*

Supporting Documentation:

MDS:

- *14 day assessment*
- *P1ba indicated speech therapy 5days/150 minutes*
- *P1bb indicated occupational therapy 5 days/150 minutes*
- *P1bc indicated physical therapy 5 days/150 minutes*

Medical Record:

- *The resident was hospitalized for 8 days for an acute CVA.*
- *In the 7-day look-back period including the assessment reference date (ARD) he received 450 minutes of therapy.*
- *The therapy documentation shows that ST, OT & PT are each treating him/her for 30 minutes each day.*
- *The evaluation and progress notes indicate the patient has deficits in speech, swallowing, activities of daily living (ADLs), range of motion (ROM) and mobility.*
- *OT is discontinued on the 20th day because the beneficiary's condition had improved.*

Review Determination:

- *The claim would be paid as billed for the entire payment period even though the level of therapy decreased during the payment period.*

HIPPS Codes Indicating Classification into a Rehabilitation Group

2. ***Rehabilitation Services Reasonable and Necessary but Not at Billed Level--If the rehabilitation services were appropriate, but not at the level billed, during the time of the relevant assessment period for the timeframe being billed, adjust the billed RUG-III code according to Matrix A of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period.***

Services Billed: RUC07 for days 15-30

Supporting Documentation:

MDS:

- *14 day assessment*
- *P1ba indicated speech therapy 5 days/240 minutes*
- *P1bb indicated occupational therapy 5 days/240 minutes*
- *P1bc indicated physical therapy 5 days/240 minutes*

Medical Record:

- *The resident was hospitalized for 8 days with a diagnosis of acute CVA.*
- *Speech Therapy notes indicated that therapy services were provided BID on 5 days/240 minutes during the look back period.*
- *Occupational Therapy notes indicated that therapy services were provided BID on 5 days/240 minutes during the look back period.*
- *Physical Therapy notes indicated that therapy services were provided BID on 5 days/240 minutes.*
- *Documentation in the nursing notes indicated that the patient complained of being exhausted at the end of the day and requested that BID therapy be discontinued.*
- *Therapy progress notes indicated that the patient participated minimally in his afternoon therapy sessions due to complaints of fatigue.*

Review Determination:

- *The documentation supports the medical necessity of rehabilitative services but not at the level billed.*
- *The documentation indicated that the therapy provided with every day (QD) services by all therapy disciplines met/exceeded the requirements for the rehab medium category.*
- *Using Matrix A, the claim would be down-coded to RMC07.*

HIPPS Codes Indicating Classification into a Rehabilitation Group

- 3. Rehabilitation Services Not Reasonable and Necessary--***If all rehabilitation services are determined to be medically unnecessary during the time of the relevant assessment period for the timeframe being billed, use EXHIBIT I to determine if there is a clinical group for which the beneficiary qualified. Based on the selected category, adjust the RUG-III code billed according to Matrix B of Rug-III Adjustment Matrices, EXHIBIT II for the entire payment period.*

SCENARIO 3a:

Services Billed: RHB07 for days 15-30

Supporting Documentation:

MDS:

- 14 day assessment
- P1ba indicated speech therapy was provided 5 days/325 minutes

Medical Record:

- The resident was hospitalized as an acute care patient for an exacerbation of Chronic Obstructive Pulmonary Disease (COPD) for greater than 3 days.
- Upon admission to the SNF, Speech Therapy began treating the resident for a "speech impediment." Nursing notes, social services notes, and dietary notes indicated that the patient's speech was clear and coherent and he was able to make his needs known. The documentation did not establish the medical necessity for skilled Speech Therapy intervention, a skilled need for a condition which was treated during the resident's qualifying hospital stay, or skilled intervention for a condition which arose while in the facility as a result of a condition treated during the qualifying hospital stay.

Review Determination 3a: No other skilled needs documented

- The HIPPS code billed would be denied because the services were not reasonable and necessary.

SCENARIO 3b:

Services Billed: RHB07 for days 15-30

Supporting Documentation:

MDS:

- 14 day assessment
- P1ba indicated speech therapy 5 days/325 minutes
- P1ac indicated IV medications in the last 14 days

- *The patient's ADL Sum Score totaled 10*

Medical Record:

- *The resident was hospitalized as an acute care patient for an exacerbation of Chronic Obstructive Pulmonary Disease (COPD) with pneumonia for greater than 3 days.*
- *Upon admission to the SNF, Speech Therapy began treating the resident for a "speech impediment." Nursing notes, social services notes, and dietary notes indicated that the patient's speech was clear and coherent and he was able to make his needs known. The documentation did not establish the medical necessity for skilled Speech Therapy intervention.*
- *The documentation in the Medication Administration Record (MAR) indicated the patient received IV antibiotics in the 14-day look-back period including the ARD for pneumonia.*

Review Determination 3b: Another skilled need was identified

- *The documentation does not support the level billed.*
- *The HIPPS code billed would be down-coded to SE107 using Matrix B.*

HIPPS Codes Indicating Classification into a Rehabilitation Group

4. Rehabilitation Services Projected On 5-Day Assessment Not Provided

If rehabilitation services are not provided at the level projected on the 5-day assessment, look for documentation to support the reason the rehabilitation services were not provided. If documentation supports that the projection was made in good faith, e.g., the physician orders and the therapy plan of treatment reflect the projected level of minutes, accept the claim as billed.

SCENARIO 4a:

Services Billed: RHC01 for days 1-14

Supporting Documentation:

MDS:

- *5 day assessment*
- *T1c indicated the projected therapies would total 10 days*
- *T1d indicated the projected therapies would total 900 minutes*

Medical Record:

- *The actual therapy minutes for this assessment were 5 days/450 minutes.*
- *ST, OT & PT each documented 30 minutes of treatment per day for 5 days.*
- *Dr orders and plan of treatment were for all three therapies at 5 days each week.*
- *During the 2nd week of treatment the resident was ill with nausea, vomiting and diarrhea and was unable to participate in therapies for 2 days.*

Review Determination 4a: The medical necessity of the therapy service is demonstrated at the level billed.

- *The illness was unforeseen. The documentation showed that the projection was made in good faith. The HIPPS code billed would be paid.*

SCENARIO 4b:

Services Billed: RHC01 for days 1-14

Supporting Documentation:

MDS:

- *5 day assessment*
- *T1c indicated the projected therapies would total 10 days*
- *T1d indicated the projected therapies would total 900 minutes*

Medical Record:

- *Dr orders and plan of treatment were for all three therapies at 5 days each week.*
- *There was no documentation to support therapy services being rendered and no rationale as to why they were not provided.*

Review Determination 4b: Documentation did not show therapy minutes were provided.

- *The HIPPS code billed would be denied for the entire payment period because the services provided were not reasonable and medically necessary.*
- *Quality of Care concerns should be referred to the RO for referral to the State Agency.*

SCENARIO 4c:

Services Billed: RHC01 for days 1-14

Supporting Documentation:

MDS:

- *5 day assessment*
- *T1c indicated the projected therapies would total 10 days*
- *T1d indicated the projected therapies would total 900 minutes*

Medical Record:

- *The patient's qualifying hospital stay diagnosis was aspiration pneumonia secondary to dysphagia/dysphasia.*
- *Documentation in the nursing notes indicated that the patient continued to cough with all fluid intake.*
- *The patient remained at his prior level of function as prior to his hospitalization.*
- *The actual therapy minutes documented in the therapist's progress notes for this assessment were 5 days and 450 minutes.*
- *ST, OT, and PT each documented 30 minutes each for 5 days totaling 450 minutes.*

Review Determination 4c: The medical necessity of the therapy service at the level billed was not demonstrated in the documentation provided during the 5-day assessment period.

- *Documentation does not support level billed.*
- *OT and PT were not medically reasonable or necessary to treat this patient's condition.*
- *ST was medically reasonable and necessary to treat this patient's condition for 30 minutes a day for 5 days per week*

- *The projection in T1c and T1d would be readjusted to 10days/300 minutes.*
- *Adjust the RUG-III code billed according to Matrix A of the Rug-III Adjustment Matrices, EXHIBIT II to pay at RMC for the entire payment period.*

HIPPS Codes Indicating Classification into a Rehabilitation Group

5. **All Rehabilitation Services Discontinued With No Other Medicare Required Assessment (OMRA)/Other Skilled Services Provided** --If the provider discontinued all rehabilitation services at some point during the payment period but did not complete an OMRA as required by Medicare 8-10 days after therapy is discontinued, pay at the HIPPS code billed for eight days after the date the rehabilitation services were discontinued, then at the default rate for the remainder of the payment period, as long as skilled need remains.

Services Billed: RHC02 for days 31-60

Supporting Documentation:

MDS:

- 30 day MDS
- M1d indicated 1 Stage IV ulcer
- M5a,b,c,e,g,h were all checked
- P1bb indicated occupational therapy was provided 5 days/175 minutes
- P1bc indicated physical therapy was provided 5 days/175 minutes

Medical Record:

- The patient's qualifying hospital stay resulted from a fractured hip with repair.
- Therapies were found to be discontinued on day 40.
- The resident continued to be treated by nursing for a Stage IV. Decubitus Ulcer with twice a day (BID) medication and dressing, changes which resulted from the immobility caused by the fracture.

Review Determination:

- No OMRA was completed by the facility.
- RHC02 would be paid through the 48th day (8 days after therapies discontinued – the first possible day an OMRA could/should have been completed).
- Days 49-60 would be down coded to AAA00 (the default rate), because the documentation does not support level billed.

HIPPS Codes Indicating Classification into a Rehabilitation Group

- 6. All Rehabilitation Services Discontinued With No Other Medicare Required Assessment (OMRA)/No Other Skilled Services Provided**—If the provider discontinued all rehabilitation services at some point during the payment period but did not complete an Other Medicare Required Assessment (OMRA) as required by Medicare 8-10 days after therapy is discontinued) and no other skilled care is needed, deny the claim from the date that the rehabilitation services were discontinued.

Services Billed: RHC02 for days 31-60

Supporting Documentation:

MDS:

- 30 day assessment
- P1bb indicated occupational therapy provided services 5 days/175 minutes
- P1bc indicated physical therapy services 5 days/175 minutes

Medical Record:

- The patient's qualifying hospital stay was for a fractured hip.
- Therapies were discontinued on day 40.
- There are no other skilled needs documented.

Review Determination:

- RHC02 would be paid for days 31-40.
- Days 41-60 would be denied because no skilled services were provided and services not reasonable and necessary.

HIPPS Codes Indicating Classification into a Rehabilitation Group

- 7. All Rehabilitation Services Become Not Reasonable and Necessary – Skilled Need Continues--***If you determine that all provided rehabilitation services are no longer reasonable and necessary at some point during the payment period but that other skilled services are being provided, use EXHIBIT I to determine the clinical group for which the beneficiary qualified. Based on the selected category, adjust the RUG-III code billed according to Matrix B of Rug-III Adjustment Matrices, EXHIBIT II from the date that the rehabilitation services are determined to be not reasonable and necessary.*

Services Billed: *RHC02 for days 31-60*

Supporting Documentation:

MDS:

- *30 day assessment*
- *P1a indicated the patient received chemotherapy services during the last 14 days*
- *P1ba indicated the patient received speech therapy services 5 days/100 minutes*
- *P1bb indicated the patient received occupational therapy services 5 days/175 minutes*
- *P1bc indicated the patient received physical therapy services 5 days/175 minutes*

Medical Record:

- *The patient's acute care stay was for a Transient Ischemic Attack (TIA) and was diagnosed with Leukemia.*
- *On the 45th day, documentation shows the resident was independent with ADL's, ambulated independently with a rolling walker >300 feet with a steady gait, was able to feed himself without signs or symptoms (S/S) of swallowing difficulties, and speech was clear and coherent.*
- *The resident continued to receive chemotherapy at a local cancer center 5 days a week and was having nausea and vomiting.*
- *Documentation indicated that the patient's urine output was low and his skin turgor was poor.*

Review Determination:

- *Skilled rehab services were no longer R/N after day 45.*
- *The resident would qualify for the clinically complex category due to his chemotherapy and need for observation and assessment.*
- *The claim would be paid at RHC02 for days 31-45.*

- *Using Matrix B days 46-60 would be down-coded to CC102 because documentation does not support medical necessity at the level billed.*

HIPPS Codes Indicating Classification into a Rehabilitation Group

- 8. All Rehabilitation Services Become Not Reasonable and Necessary – No Skilled Need Continues--***If you determine that provided rehabilitation services are no longer reasonable and necessary at some point during the payment period and that no other skilled services are being provided, deny the bill from the date that the rehabilitation services are determined to be not reasonable and necessary.*

Services Billed: *RHC02 for days 31-60*

Supporting Documentation:

MDS:

- *30 day assessment*
- *P1ba indicated speech therapy services 5 days/100 minutes*
- *P1bb indicated occupational therapy services 5 days/175 minutes*
- *P1bc indicated physical therapy services 5 days/175 minutes*

Medical Record:

- *The medical record indicated the patient's qualifying hospital stay diagnosis as TIA.*
- *On the 45th day, the documentation shows the resident was independent with ADL's, ambulated independently with a rolling walker >300 feet with a steady gait, was feeding himself without signs or symptoms (S/S) of swallowing difficulties, and his speech was clear and coherent.*

Review Determination:

- *There were no other documented skilled needs.*
- *Therapies were no longer R/N after day 45.*
- *The claim would be paid at RHC02 for days 31-45.*
- *Days 46-60 would be denied as skilled services were not medically reasonable or necessary.*

HIPPS Codes Indicating Classification into a Clinical Group

- 9. Services Reasonable and Necessary At Level Billed--***If services were appropriate at the level billed during the time of the relevant assessment period for the timeframe being billed, accept the claim as billed for the entire payment period, even if the level of skilled care changes during the payment period.*

Services Billed: *SSB07 for days 15-30*

Supporting Documentation:

MDS:

- *K5b Feeding Tube was checked*
- *K6a 4 (76-100%) was checked*
- *K6b 4 (1501- 2000cc's/day) was checked*
- *M4g surgical wound was checked*
- *M5f surgical wound care was checked*

Medical Record:

- *The patient was treated in his acute hospital stay for a surgically released bowel obstruction and malnutrition for which he had a PEG tube placed.*
- *Treatment to the surgical wound was clearly documented on the treatment sheets and in the nurse's notes for the 7-day look-back period including the ARD. The treatment was discontinued on day 20.*
- *The patient continued to be tube fed 100% of his caloric intake and > 1501 cc's daily.*

Review Determination:

- *The claim would be paid as billed for the entire payment period even though the level of skilled services decreased after day 20.*

HIPPS Codes Indicating Classification into a Clinical Group

10. Services Not Reasonable and Necessary At Level Billed--*If the clinical group billed was not appropriate during the time of the relevant assessment period for the timeframe being billed, select the proper category that reflects the skilled services provided to the beneficiary or the beneficiary's clinical condition at the time of the observation period (e.g., Extensive Services, Special Care, Clinically Complex) according to the MDS2.0 RUG III Codes chart (EXHIBIT I). Based on the selected category, adjust the billed RUG-III code according to Matrix B of RUG-III Adjustment Matrices, EXHIBIT II for the entire payment period.*

Serviced Billed: SSB07 for days 15-30

Supporting Documentation:

MDS:

- 14 day assessment
- K5b Feeding tube checked
- K6a 4 (76-100%) checked
- K6b 4 (1501-2000cc/day) checked
- M5f surgical wound care checked

Medical Record:

- The patient was in the acute stay for an appendectomy and malnutrition for which she had a PEG tube placed.
- There was no surgical wound treatment documented in the look back period of this assessment.
- The patient continued to be tube fed 100% of her caloric intake & >1501cc's daily.

Review Determination:

- Using Matrix B days 15-30 would be down coded to CB107 because documentation does not support level billed.

HIPPS Codes Indicating Classification into a Clinical Group

11. Need For Skilled Care Ends--*If you determine that the beneficiary falls to a non-skilled level of care at some point during the payment period, discontinue Medicare coverage effective when the beneficiary no longer meets level of care criteria.*

Services Billed: *SSB07 for days 15-30*

Supporting Documentation:

MDS:

- *14 day assessment*
- *M4g Surgical wound checked*
- *M5f surgical wound care checked*

Medical Record:

- *The patient was in the acute hospital for the removal of a large tumor.*
- *Surgical wound care was clearly documented through day 20 when the treatment was discontinued and the wound was documented as healed.*
- *There were no other documented skilled needs from day 21 through day 30.*

Review Determination:

- *This claim would be paid at SSB07 for days 15-20.*
- *Days 21 through 30 would be denied because skilled services were no longer reasonable and necessary.*
- *The provider would be liable for days 21 through 30.*

HIPPS Codes Indicating Classification into the Lower 18 RUG-III Groups

12. Lower 18 RUG-III Group Billed - Level of Care Criteria Met--*If the beneficiary met the SNF level of care criteria, accept the claim as billed for the entire payment period, as long as skilled need remains.*

Services Billed: BB201 for days 1-7

Supporting Documentation:

MDS:

- *5 day assessment*
- *E4a Wandering + 3 (occurred daily) checked*
- *E4c Physically abusive behavioral symptoms = 3 (occurred daily) checked*
- *E4e Resists care = 3 (occurred daily) checked*

Medical Record:

- *The resident was in the acute care setting for greater than 3 days for a new onset of confusion and anxiety.*
- *Documentation clearly shows these behaviors on a daily basis in the seven-day look back period including the ARD and the behavior continued throughout the billing period.*
- *Documentation noted the need to switch the patient's medications being used to modify his behavior due to the sudden appearance of a rash over his entire body on the 4th day of his admission to the SNF.*

Review Determination:

- *This claim would be paid as billed.*

HIPPS Codes Indicating Classification into the Lower 18 RUG-III Groups

13. Lower 18 RUG-III Group Billed--Level of Care Criteria Not Met--*If the beneficiary did not meet the SNF level of care criteria, deny the bill in full for the entire payment period.*

Services Billed: BB201 for days 1-7

Supporting Documentation:

MDS:

- *5 day assessment*
- *E4a Wandering + 3 (occurred daily) checked*
- *E4c Physically abusive behavioral symptoms = 3 (occurred daily) checked*
- *E4c Resists care = 3 (occurred daily) checked*

Medical Record:

- *The resident was in the acute care setting for greater than 3 days for a new onset of confusion and anxiety.*
- *The documentation provided did not show than any of these behaviors were exhibited.*
- *Nursing notes describe the patient as “pleasantly confused-easily reoriented.”*

Review Determination:

- *The HIPPS code billed would be denied for the entire payment period because the services provided were not medically reasonable and necessary.*
