SUBJECT: Outpatient Intravenous Insulin Treatment (Therapy)

EFFECTIVE DATE: DECEMBER 23, 2009

IMPLEMENTATION DATE: APRIL 5, 2010

I. GENERAL INFORMATION

A. Background: The Centers for Medicare & Medicaid Services (CMS) internally generated a request for a National Coverage Determination on Outpatient Intravenous Insulin Therapy (OIVIT). On December 23, 2009, CMS issued a non-coverage decision on the use of OIVIT.

B. Policy: Effective December 23, 2009, CMS determines that the evidence does not support a conclusion that OIVIT improves health outcomes in Medicare beneficiaries. Therefore, OIVIT is not reasonable and necessary for any indication under section 1862(a)(1)(A) of the Social Security Act, and services comprising an OIVIT regimen are nationally non-covered under Medicare when furnished pursuant to an OIVIT regimen.

NOTE: A new HCPCS code, G9147, Outpatient Intravenous Insulin Treatment (OIVIT) either pulsatile or continuous, by any means, guided by the results of measurements for: respiratory quotient; and/or, urine urea nitrogen (UUN); and/or, arterial, venous or capillary glucose; and/or potassium concentration, Outpt IV insulin tx any mea, type of service 9, effective December 23, 2009, to be implemented with the April 2010 Integrated Outpatient Code Editor (IOCE) and Medicare Physician Fee Schedule Database (MPFSDB), was created for use with this non-coverage decision.

NOTE: HCPCS code 99199, unlisted special service, procedure, or report, is no longer an appropriate code to be used for OIVIT. HCPCS code 94681, exhaled air analysis CO2, should not be used in conjunction with OIVIT or diabetes-related conditions (250.00-250.93). Claims billed with these codes will be returned to provider/returned as unprocessable to be billed with new HCPCS code G9147.
